About the conference

Welcome to the Pharmaceutical Science and Drug Manufacturing and Development The 2nd Global Summit on Generic Drugs and Quality Control is a prestigious international event that will bring together leading pharmaceutical scientists, regulatory experts, healthcare professionals, quality assurance specialists, researchers, academicians, industry leaders, and policymakers from across the globe. Scheduled to take place in London, UK, on October 29–30, 2026, this summit serves as a premier platform for sharing knowledge, fostering collaborations, and exploring the latest advancements in generic pharmaceuticals and quality management systems.

As the demand for affordable, safe, and effective medicines continues to rise worldwide, the summit focuses on addressing the critical challenges and opportunities within the generic drug industry. Under the theme of advancing pharmaceutical excellence through innovation, compliance, and quality assurance, the conference will highlight emerging technologies, regulatory developments, manufacturing best practices, bioequivalence studies, analytical testing, quality control strategies, and global harmonization efforts. Participants will gain valuable insights into maintaining high standards of drug quality while ensuring accessibility and affordability for patients worldwide.

Theme: “Advancing Generic Medicines Through Innovation, Quality Excellence, and Global Regulatory Compliance”.

Why to attend the conference

The Generic Drugs and Quality Control Summit focuses on the development, manufacturing, evaluation, regulation, and quality assurance of generic pharmaceutical products. Generic medicines play a vital role in global healthcare systems by providing cost-effective alternatives to branded drugs while maintaining equivalent safety, efficacy, and therapeutic performance. As healthcare expenditures continue to increase worldwide, generic drugs have become essential in improving patient access to affordable treatments.
