Tokyo is Japan's capital and the world's most populous metropolis. Tokyo, Japan's busy capital mixes the ultramodern and the traditional, from neon-lit skyscrapers to historic temples. The opulent Meiji Shinto Shrine is known for its towering gate and surrounding woods. The Imperial Palace sits amid large public gardens. The city's many museums offer exhibits ranging from classical art (in the Tokyo National Museum) to a reconstructed kabuki theater (in the Edo-Tokyo Museum).

Tokyo is a mega-metropolis of dizzying contradictions, both familiar and foreign. It has neon, skyscrapers, and salary man crowds, packed trains, cutting-edge architecture and futuristic technology. But it also has ancient shrines, plant-covered wooden houses, cycling grannies, old-school sweet shops and village-like lanes. It is one of the planet's most densely populated cities (as any rush-hour train journey will demonstrate), with a hyperactive skyline that changes as regularly as the sun rises and sets. Yet it is also a city rooted in its traditions and in possession of a calm and efficient rhythm that belies its sprawling dimensions. And even though its home to a 13 million-plus population, trains run on time, there is no public litter and street crime is near non-existent. In short, it works. Another key enticement is the food – from sushi to soba, and everything in between.
