Why Atlanta, USA?

Atlanta pharmaceutical giant maintained a robust lead over drug makers in our annual ranking of the largest Bio-Pharma companies in the United States of America.

However, the pharmaceutical market is still dominated by a few very large companies that control the import/ distribution, retail and manufacturing sectors. While these companies have played an important role in the pharmaceutical sector's development in Atlanta, their market dominance leads to high mark-up for medicines which explain the high expenditures on pharmaceuticals. The mark-up for medicines in Atlanta is far above the average mark-up for medicines than in European countries.

Why to Attend?

With members from around the world focused on learning about Chemistry, organic and inorganic chemistry; this is your single best opportunity to reach the largest assemblage of participants. Conduct demonstrations, distribute information, meet with current and potential customers, make a splash with a new product line, and receive name recognition at this 2-day event. World renowned speakers, the most recent techniques, tactics, and the newest updates in fields are hallmarks of this conference.

The Fox Theatre (16 min (9.9 mi) via I-85 N)

The interior of the theatre has seen considerable restoration work over the years in an attempt to maintain its original elegance, including the repair and restoration of the furniture collection to preserve its 1929 appearance. Performances at the Fox include diverse entertainment options such as operas, ballet, rock concerts, and movies, with hundreds of performances each year. In addition to the theatre, there are two ballrooms, the Egyptian Ballroom and the Grand Salon. Both of these have been beautifully restored and are available for special events.

World of Coca-Cola (17 min (10.3 mi) via I-85 N)

The World of Coca-Cola is a museum, located in Atlanta, Georgia, showcasing the history of The Coca-Cola Company. In 1886 a chemist named Dr John Pemberton devised a syrup designed to relieve headaches. A friend of his mixed the glutinous liquid with water and carbonic acid, and the result of the mixture soon became the world's most popular soft drink. The World of Coca-Cola entertainingly illustrates the history and triumphal progress of the world-famous drink.

Fernbank Museum of Natural History (24 min (12.5 mi) via I-85 N and GA-10 E)

The Fernbank Museum of Natural History portrays the natural history of Georgia as well as technical and scientific phenomena with the aid of modern techniques. Some of the most eye catching exhibits at the museum are the huge dinosaur statues at the entrance and the dinosaur skeletons in the Great Hall. Perhaps more entertaining are the interactive displays of the "Sensing Nature". The floors are made of limestone tiles with embedded fossils. A huge gallery are dedicated to special exhibitions of temporary and traveling exhibits. There is also an IMAX theater showing nature related movies, as well as an on-site Star Gallery.
