Welcome Message

Dear Colleagues, Scientists and Friends,

Japan is a high tech country but the people still preserve their wonderful culture and tradition. The life expectancy in Japan is one of the longest in the world. The medical inventions and researches have given many contributions to better medical treatments and services.

Please spare your valuable time to come to Osaka, one of the beautiful cities in Japan, and join the **World Heart Congress** held during **May 22- 24, 2017**. During this outstanding meeting you will find and attend presentations on current researches and first-hand information from experts of cardiovascular medicine from all over the world during the meeting.

The congress will provide enough space for discussion, meetings and workshops in order to allow a close contact between speakers and visitors. I look forward to meet you and assure that you will have engaging, exciting and memorable experience on your participation during the meeting.

See you there...

Welcome Message

Dear colleagues and friends,

As a Keynote Speaker and Organizing Committee Member, it is my great pleasure to welcome you to attend the **World Heart Congress** during **May 22- 24, 2017** in the beautiful city of Osaka which was the capital of Japan before the move to Tokyo.

I like this city which remembers me to be invited during a fabulous week in 1983 to give the most important lecture in Japan which is called the "Mikamo lecture. I was invited in Japan to meet Dr. Mikamo on year before his lecture. However, something strange happened before I had to go to the podium to speak before 2,500 cardiologists from Japan. After my talk on the surgical treatment of cardiac arrhythmias it was said by the Chairman that Dr. Mikamo was found dead at home in his bath at 4:00 am. I was told by Pr Kunitake Hashiba (the Japanese Long QT syndrome expert) not to be sad, that will make my lecture even more memorable…

The World Heart Congress will provide enough space for discussion, meetings and workshops in order to allow a close contact between speakers and visitors. Cardiology -specialized physicians and scientists from all over the world are invited to Osaka in 2017 to present the new research and inventions. From prevention to optimal care the whole range of heart diseases will be presented with world-class professors and scientists as well as health care professionals.

We are looking forward to see you in Osaka, Japan
See you there...
