Welcome Message

Dear colleagues and friends,

As a Keynote Speaker and Organizing Committee Member, it is my great pleasure to welcome you to attend the **World Heart Congress** during **May 22- 24, 2017** in the beautiful city of Osaka which was the capital of Japan before the move to Tokyo.

I like this city which remembers me to be invited during a fabulous week in 1983 to give the most important lecture in Japan which is called the "Mikamo lecture. I was invited in Japan to meet Dr. Mikamo on year before his lecture. However, something strange happened before I had to go to the podium to speak before 2,500 cardiologists from Japan. After my talk on the surgical treatment of cardiac arrhythmias it was said by the Chairman that Dr. Mikamo was found dead at home in his bath at 4:00 am. I was told by Pr Kunitake Hashiba (the Japanese Long QT syndrome expert) not to be sad, that will make my lecture even more memorable…

The World Heart Congress will provide enough space for discussion, meetings and workshops in order to allow a close contact between speakers and visitors. Cardiology -specialized physicians and scientists from all over the world are invited to Osaka in 2017 to present the new research and inventions. From prevention to optimal care the whole range of heart diseases will be presented with world-class professors and scientists as well as health care professionals.

We are looking forward to see you in Osaka, Japan
See you there...
