About Rome

Rome is the capital city of Italy. With 2.9 million residents in 1,285 km2 and it is also the country's largest and most populated community and fourth populous city in the European continent. Rome is the Metropolitan City with a population of 4.3 million residents. Rome which is the Metropolitan City and is located in the central-western portion of the Italian Peninsula and along the shores of Tiber river. Geographically the City of Vatican which is an independent country located within the city boundaries of Rome and it is the only existing country within a city. This is the reason why Rome has been defined as capital of two states.

It has a very large number of Colleges as well as Universities. The Metropolitan City Rome is ranked number two according to the historical as well as in case of education and also in case of culture and it is the most beautiful city located in Italy. Rome is also named as the world's most tourist destination. The city is located with many museums and also there are many historical buildings as well as many monuments and Catacombs and it receives almost 7-10 million tourists every year. The main archeological research center is located in Rome and it is also named as a hub for archeology. Rome is also named as the world's fashion capital and it also has a very huge and vast collection of paintings, frescos, sculpture, fountains and mosaics. Not only regarding historical places, tourists attractions and educational societies, when the topic comes to the climate Rome has also equipped with Mediterranean climate with cool winters and warm to hot summers. In winter the days are not as short as in the northern part of the continent and the average hours of daylight in January, February and December is 10 hours.
