It portrayed more than 5 million international visitors in 2014. The city is also known for its nightlife and festival activity Kloveniersburgwal canals. Three towers of the old fortifications still position. Outside the Singel are the three main canals dating from the early 17th century: the Herengracht , Keizersgracht , and Prinsengracht. These concentric canals, collected with the smaller radial canals, form a characteristic spiderweb configuration, which was extended east along the harbour and west into the district known as the Jordaan throughout the thriving Golden Age.

The old part of Amsterdam has many ancient buildings, most notably the Old Church , built in the 13th century, and the New Church , bring into being in the 15th century. Next to the New Church is the 17th-century city hall, now the Royal Palace, fabricated in classical Palladian style. The former Jewish quarter, in the eastern portion of the old town, is the whereabouts of the Portuguese Synagogue (1671) and the Rembrandt House , which is now a museum. The old town's three main squares are the Dam, the Leidseplein , and the Rembrandtplein ..

Like most modern cities, Amsterdam is a service centre, with only about one-tenth of its workforce employed in developed. Banking and insurance also have been a backbone of the Amsterdam economy, self-possessed secretarial for about one-eighth of all jobs, while about one-sixth of jobholders are employed in health, cultural, and social services. One more important part of the city's economy, tourism, accounts for about one-tenth of all jobs. However, regardless of this prosperous service sector, at the turn of the 21st century the city had several job seekers who be tiny in marketable abilities, and about one-eighth of the workforce was made redundant. A little of Amsterdam's important citizens throughout history include: painters Rembrandt and Van Gogh, the diarist Anne Frank, and philosopher Baruch Spinoza.
