About Conference

ME conferences extends warm welcome to 4th International Conference on Epigenetic and human disease on November 26th,2021.An initiative to treat human disease arise by epigenetic modification using epigenetic therapy. Participating at Epigenetic and human disease conference will provide excellent opportunity to interact with world class epigenetics specialist and geneticist experts in the field making a coordinated efforts and partnerships.

Epigenetic covers modification of DNA, DNA binding proteins and histones which causes changes in chromatin structure without changing nucleotide sequence of a DNA. It has been shown to be correlated with many human diseases like cancer, auto immune disorders (Rheumatid arthritis, SARDs, SLE), neurological disorders(Fragile X syndrome, Hungington, Alzheimer and parkinson diseases).Methylation also lead to complicated disease influenced by some secondary sex factors such as sex differences and age. Current advances in treating epigenetic therapy providing maximum benefits and reducing risk. This conference has taken the start to congregrate world class specialists both from academic and industry.

Human Diseases 2021

Target Audience

- Basic Clinical Research Scientists & Students
- Physicians
- Industry Professionals
- Integrated Health Professionals
- Epigenetics, Genetics and Oncology Researchers
- Genetic Counsellors
- Bioinformatician
- Human Genetics/ Epigenetics/Cancer Associations and Society
- Molecular Biologists
- Business delegates
- Directors, Board Members, Presidents, Vice Presidents
- Cell Biologists
- CEO's and R&D Heads from Industries
- Business Entrepreneurs and Industrialists
- Human Genetics Researchers
- Pharmacists
- Drug Manufacturing Companies and Industries
- Laboratory Technicians and Diagnostic Company

Conference Sessions

- Epigenetic and environment
- Genetics of Obesity
- Balanced Diet and Chronic Diseases
- Epigenetics in biological processes
- Nutritional Imbalance and Role of Metabolism in Obesity
- Role of Steroids and Hormones in Obesity
- Pediatric Nutrition
- Childhood Obesity
- Epigenetics influencing human diseases
- Nutrition and Brain Health
- Prevention and Management of Obesity
- Traditional Chinese Medicine and Acupuncture
- Exercise, Yoga and Physical Therapy for Healthy Weight Loss

REMINISCENCE OF 2019
