About the conference

The Infectious Diseases 2025 conference invites participants from around the globe to attend the prestigious “6th Annual Meeting on Infectious Diseases, Microbiology & Beneficial Microbes,” taking place May 21-22, 2025, in Paris, France. This event will feature keynote presentations, oral talks, poster sessions, and various discussions. Researchers and educators worldwide will showcase their work, highlighting ways in which men, women, and children from all backgrounds can be treated for various infectious diseases.

Infectious diseases are caused by microorganisms such as bacteria, viruses, fungi, and parasites, while microbiology is the study of these microscopic organisms. Many microbes live in and on our bodies, but under certain conditions, some can cause infections that are transmitted from person to person. Microbiology encompasses fundamental research in several fields, including cell biology, physiology, biochemistry, evolution, and clinical microbiology, focusing on how hosts respond to infections.

Theme: **“Innovations in Controlling Infectious Diseases, Microbiology, and Beneficial Microbes”**.
