INVITATION

Dear Attendees,

Welcome to the European Congress on Laser, Optics and Photonics (Hybrid Conference) and also join the conference using online platforms during May 23-24, 2022 Amsterdam, Netherlands. LASER OPTICS 2022 is being organized with the association of Journal of Lasers, Optics & Photonics where all the conference abstracts will be published.

Journal of Lasers, Optics & Photonics is a multidisciplinary journal that combines physical sciences with material sciences, engineering and technology. The journal encourages the latest developments and innovations for publication on the open access platform as research articles, reviews, case studies, commentaries, short communication and the letters to the editor.

The theme of the conference highlights “An insight into the Recent Research and cutting-edge Technologies in Lasers, Optics and Photonics”. Scientific Tracks designed for this conference will enable the attendees and participants to learn extremes.

Lasers, Optics, and Photonics have not only aided in the advancement of several sectors of science and technology, but have also made significant contributions to the betterment of human life quality. All of this is possible because to many discoveries and inventions that have led to the creation of various applications. The main goal of the Laser Optics conference is to allow participants to network, communicate, and exchange new ideas in the domains of lasers, optics, and photonics.

Laser Optics 2022 provides a platform for globalizing research by facilitating dialogue between companies and academic institutions, as well as information transmission from research to industry. Laser Optics 2022 intends to disseminate knowledge and new ideas among experts, industrialists, and students working in the fields of lasers, optics, and photonics by allowing them to share their research experiences and participate in interactive discussions and special sessions.
