# Market Analysis

The Global Materials Market is expected to reach USD 196,299 million by 2022 from USD 144,613 million in 2015, with a CAGR of 4.2% during the forecast period, 2016-2022. They are useful in various technological applications such as fabrication of microelectronic circuits, sensors, piezoelectric devices, fuel cells, coatings for the passivation of surfaces against corrosion, and as catalysts.

The metal alloys dominated the global lightweight materials market in 2014 and are expected to maintain its lead throughout the forecast period. Increase in penetration of lightweight components and growth in production of aircraft modules to uplift the need for advanced composites is propelling the lightweight materials market growth. The high cost of materials such as metals and metal alloys are restricting its widespread penetration in sectors such as industrial, aerospace and defense, healthcare, automotive, energy, and others. Asia-Pacific is the most attractive market for the new entrants along with industry players on account of the increasing demand for materials the growing number of industries and increased expenditure towards technology research is expected to provide significant opportunities to the industry players. used material in the 3D printing material market.
