About the conference

The 34th International Conference on Nanomedicine & Drug Delivery (Nanomedicine-2026) is a premier global platform bringing together leading scientists, researchers, clinicians, pharmaceutical professionals, nanotechnology experts, and industry innovators.

This two-day international forum will showcase cutting-edge research, emerging technologies, and translational advancements in nanomedicine and advanced drug delivery systems. Nanomedicine-2026 aims to bridge academia and industry to accelerate the transformation of nanoscale innovations into real-world therapeutic solutions.

Theme: "Advancing Precision Nanotherapeutics & Smart Drug Delivery Systems"

Why to attend the conference

The usage of alternative medicine is prevalent as it is being used effectively as an integrated treatment with a fewer side effects than western medicine and is a potential alternative to pain medications or steroid treatments. This sole conference will offer a stand for Eastern medicine to meet with Western medicine and will bring together researchers, practitioners, educators and other healthcare professionals, business delegates, students and young researchers all across the world and shall serve as an opportunity to present and confer current advances in acupuncture research that have the potential to strengthen the base for its amalgamation in health care to reform the art of Nanomedicine.
