30th World Nursing Care Congress

October 28-29, 2021 | Webinar

35 Ruddlesway, Windsor, Berkshire, SL4 5SF, UK Tel : +44 20 393 63178
Toll Free No: UK : 0-808-101-7605, USA : 1-800-985-2178

Scientific Program

Nursing Care Summit 2021

Day 1 October 28, 2021

09:30 - 10:00 : Registrations

Meeting Hall - Salon 2+3

10:00 -10:10 **Opening Ceremony**

Keynote Forum

07:05-07:30
Title: Effective Management of the nurse administrators of Geriatric Care Facility to creating an environment for collaborative practice
Chiharu Miyata, Mie University Graduate School of Medicine, Japan

07:45-08:15
Title: Experiences of primary caregivers who rear children with SMID (severe motor and intellectual disabilities) and of siblings during the transition from hospital care to home care
Satoe Iki, University of Tsukuba, Japan

08:15-08:45
Title: The Level of Risk Exposure of COVID-19 among the Working Individuals of Cagayan de Oro City
Lew C. Tacandong, Xavier University Ateneo de Cagayan, Philippines

Keynote Forum

08:45-9:30
Title: Affecting factors of nurses' mental health status: a comparative cross-sectional survey
Yoshiko Yamaguchi, Kwassui Women's University, Japan

09:30-10:15
Title : Medical Emergency principles in Dental care settings
Caroline Bilen, The compass Health Consultancy, UAE

SCIENTIFIC SESSIONS

10:30-11:00
Title: Government and family support for older adults in the Philippines
Eva Belingon Felipe-Dimog, Kaohsiung Medical University, Taiwan

11:00-11:30
Title: Branding of the nursing profession in Saudi Arabia: current state and future steps
Roaa Gassas, King Saud University, Saudi Arabia

11:30-12:00
Title : Laparoscopic Surgery: Hypothermia and Nursing Care
Zehra AYDIN, Corum Hittite University, Turkey

Keynote Forum

16:10 - 16:45
Title: Contribution of Psychological factors of COVID-19 vaccinations
Kalliopi Megari, Aristotle University of Thessaloniki, Greece

16:45 - 17:20
Title : Social support tin the postpartum period: you are not alone
Zeynep BAL, nönü University, Turkey

SCIENTIFIC SESSIONS

16:10 - 16:45	**Title: The Unseen Abuse: Obstetric Violence** **Esra GÜNEY,** nönü University, Turkey
16:45 - 17:20	**Title : Obesity in Pregnancy: Contribution to Adverse Pregnancy Outcomes** **Esra Karataş Okyay, İnÖnü Universıty, Turkey**
16:10 - 16:45	**Title: Haptotherapy on Fear of Chidbirth** **Sümeyye BARUT,** Fırat University, Turkey
16:45 - 17:20	**Title : Application of Heated Disposable Blanket in Preventing Neonatal Hypothermia During Transportation** **Wing Yi Kaness,** Ching St. Paul's Hospital, Hong Kong
Keynote Forum	
16:45 - 17:20	**Title : Blemished by association: negotiating courtesy stigma within Black African heterosexual relationships with one partner living with HIV (LWH** **Mohamed Kemoh Rogers,** University of East Anglia, UK
16:45 - 17:20	**Title : An Effective Educational Intervention on Antimicrobial Stewardship to Licensed Nurses in a Skilled Nursing Facility** **Gloria Escalona,** Nightingale Senior Care, LLC, San Francisco, USA
End of Day 1	
Keynote Forum	
16:45 - 17:20	**Title : Cultural Humility in Healthcare by Finding Cultural Humility in Ourselves** **Kumi Oya,** California Institute of Integral Studies, USA
SCIENTIFIC SESSIONS	
08:15-08:45	**Title : Path analysis of ethical sensitivity and empathy in critical care nurses** **Amir Masoud Sharifnia,** Khomein University of Medical Sciences, Iran
9:30-10:00	**Title : Meta-analysis of the correlation between spiritual intelligence and professional outcomes in nursing practice** **Amir Masoud Sharifnia,** Khomein University of Medical Sciences, Iran
10:00-10:30	**Title : Chakras' Energy Deficiency as One of The Causes of Diabetes Type I** **Huang Wei Ling, Medical** Acupuncture and Pain Management Clinic, Brazil
10:30-11:00	**Title : Is It Really True That Impotence in Diabetic Patients Is Actually Caused by Diabetes** **Huang Wei Ling, Medical** Acupuncture and Pain Management Clinic, Brazil

List of Open Access Journals

Agri, Food & Aqua

Advances in Crop Science and Technology	2329-8863
Advances in Dairy Research	2329-888X
Agrotechnology	2168-9881
Aquaculture Research & Development	2155-9546
Arabidopsis C. Elegans and Zebrafish	-
Biofertilizers & Biopesticides	2155-6202
Crop Research	2454-1761
Experimental Food Chemistry	-
Fisheries & Livestock Production	2332-2608
Fisheries and Aquaculture Journal	2150-3508
Fisheriessciences	1307-234X
Food & Industrial Microbiology	-
Food & Nutritional Disorders	2324-9323
Food Processing & Technology	2157-7110
Food: Microbiology, Safety & Hygiene	-
Forest Research	2168-9776
Horticulture	2376-0354
International Biodiversity, Bioprospecting and Development	2376-0214
Marine Science: Research & Development	2155-9910
Medicinal & Aromatic Plants	2167-0412
Nutrition & Food Sciences	2155-9600
Plant Pathology & Microbiology	2157-7471
Poultry, Fisheries & Wildlife Sciences	2375-446X
Probiotics & Health	2329-8901
Research & Reviews: Journal of Agriculture and Allied Sciences	2347-226X
Research & Reviews: Journal of Food and Dairy Technology	2321-6204
Rice Research	2375-4338
Traditional Medicine and Clinical Naturopathy (Homeopathy & Ayurvedic Medicine-2167-1206)	-

Business & Management

Accounting & Marketing	2168-9601
Arabian Journal of Business and Management Review	2223-5833
Business & Financial Affairs	2167-0234
Business & Hotel Management	2324-9129
Business and Economics Journal	2151-6219
Defense Studies & Resource Management	2324-9314
Entrepreneurship & Organization Management	2169-026X
Global Economics	2375-4389
Hotel & Business Management	2169-0286
International Journal of Accounting Research	-
International Journal of Economics and Management Science	2162-6359
Internet Banking & Commerce	1204-5357
Review of Public Administration and Management	2315-7844
Stock & Forex Trading	2168-9458
Tourism & Hospitality	2167-0269

Chemical Engineering

Advanced Chemical Engineering	2090-4568
Bioprocessing & Biotechniques	2155-9821
Chemical Engineering & Process Technology	2157-7048
Thermodynamics & Catalysis	2157-7544

Chemistry

Analytical & Bioanalytical Techniques	2155-9872
Analytical & Electrochemical Insights	-
Bioenergetics: Open Access	2167-7662
Chemical Informatics	-
Chemical Sciences Journal	2150-3494
Chromatography & Separation Techniques	2157-7064
Clinical & Medical Biochemistry: Open Access	-
Clinical Chemistry: Open Access	-
Environmental & Analytical Toxicology	2161-0525
Environmental Analytical Chemistry	-
Glycobiology	2168-958X
Herbal Medicine: Open Access	-
Immuno Chemistry: Open Access	-
Industrial Chemistry: Open Access	-
International Journal of Applied Biology and Pharmaceutical Technology	0976-4550
International Journal of Drug Development & Research	0975-9344
Mass Spectrometry: Open Access	-
Medicinal Chemistry	2161-0444
Modern Chemistry & Applications	2329-6798
Natural Products Chemistry & Research Journal	2329-6836
Neuro Chemistry: Open Access	-
Organic & Inorganic Chemistry	-
Organic Chemistry: Current Research	2161-0401
Pharmaceutical Analytical Chemistry: Open Access	-
Physical Chemistry & Biophysics	2161-0398
RROIJ: Medicinal Chemistry	-
Structural Chemsitry & Crystallography Communication	-
Trends in Green Chemistry	-
Vitamins & Minerals	2376-1318

Clinical

Ageing Science	2329-8847
Ancient Diseases & Preventive Remedies	2329-8731
Anesthesia & Clinical Research	2155-6148
Annals of Clinical and Laboratory Research	2386-5180
Arrhythmia: Open Access	-
Atherosclerosis: Open Access	-
Cell Biology: Research & Therapy	2324-9293
Cellular & Molecular Pathology	-
Clinical & Experimental Cardiology	2155-9880
Clinical & Experimental Dermatology Research	2155-9554
Clinical & Experimental Nephrology	-
Clinical & Experimental Oncology	2324-9110
Clinical & Experimental Ophthalmology	2155-9570
Clinical & Experimental Orthopaedics	-
Clinical & Experimental Pathology	2161-0681
Clinical & Molecular Endocrinology	-
Clinical and Experimental Psychology	-
Clinical and Experimental Transplantation	-
Clinical Case Reports	2165-7920
Clinical Depression	-
Clinical Dermatology Research Journal	-
Clinical Diabetes & Practice	-
Clinical Nutrition & Dietetics	-
Clinical Oncology and Practice	-
Clinical Pediatrics	-
Clinical Pediatrics & Dermatology	-
Clinical Psychiatry	-
Clinical Research & Bioethics	2155-9627
Clinical Research On Foot & Ankle	2329-910X
Clinical Respiratory: Open Access	-
Clinical Toxicology	2161-0495
Clinical Trials	2167-0870
Clinics in Mother and Child Health	2090-7214
Cosmetology & Orofacial Surgery	-
Cosmetology & Trichology	-
Dermatitis	-
Diabetes Case Reports	-
Dialysis and Clinical Practice	-
Drug Intoxication & Detoxification : Novel Approaches	2327-4557
Dual Diagnosis: Open Access	-
Eye & Cataract Refractive Surgery	-
Forensic Toxicology & Pharmacology	2325-9841
Glaucoma: Open Access	-
HIV & Retro Virus	-
Immunooncology	-
Insights in Pediatric Cardiology	-

Intensive and Critical Care	-
International Journal of Anesthesiology & Pain Medicine	-
International Journal of Cardiovascular Research	2324-8602
International Journal of Digestive Diseases	-
International Journal of Ophthalmic Pathology	2324-8599
Interventional Cardiology: Open Access	-
JBR Journal of Clinical Diagnosis and Research	2376-0311
Optometry: Open Access	-
Phonetics & Audiology	-
Speech Pathology & Therapy	-
Stem Cell Research & Therapy	2157-7633
Toxicology: Open Access	-
Vasculitis	-

Earth & Environmental Sciences

Advances in Recycling	-
Astrobiology & Outreach	2332-2519
Biodiversity & Endangered Species	2332-2543
Biodiversity Management & Forestry	2327-4417
Bioremediation & Biodegradation	2155-6199
Biosafety	2167-0331
Climatology & Weather Forecasting	2332-2594
Coastal Zone Management	-
Earth Science & Climatic Change	2157-7617
Ecosystem & Ecography	2157-7625
Entomology, Ornithology & Herpetology	2161-0983
Expert Opinion On Environmental Biology	2325-9655
Fundamentals of Renewable Energy and Applications	2090-4541
Geography & Natural Disasters	2167-0587
Geoinformatics & Geostatistics: An Overview	2327-4581
Geology & Geosciences	2329-6577
Geophysics & Remote Sensing	2169-0049
Hydrogeology & Hydrologic Engineering	2325-9647
Hydrology: Current Research	2157-7587
Industrial Pollution Control	-
Innovative Energy Policies	2090-5009
International Journal of Evolution	2324-8548
International Journal of Waste Resources	2252-5211
Marine Biology & Oceanography	2324-8661
Oceanography: Open Access	2332-2632
Oil & Gas: Open Access	-
Petroleum & Environmental Engineering	2157-7463
Plant Physiology & Pathology	2329-955X
Pollution Effects & Control	2375-4397
Research & Reviews: Journal of Ecology and Environmental Sciences	-

EEE

Electrical & Electronic Systems	2332-0796
Electrical Engineering & Electronic Technology	2325-9833

Engineering

Advances in Automobile Engineering	2167-7670
Advances in Robotics & Automation	2168-9695
Aeronautics & Aerospace Engineering	2168-9792
Applied Bioinformatics & Computational Biology	2329-9533
Applied Mechanical Engineering	2168-9873
Architectural Engineering Technology	2168-9717
Automatic Control of Physiological State and Function	2090-5092
Biochips & Tissue Chips	2153-0777
Bioengineering & Biomedical Science	2155-9538
Biomusical Engineering	2090-2719
Biosensors & Bioelectronics	2155-6210
Biosensors Journal	2090-4967
Civil & Environmental Engineering	2165-784X
Computer Engineering & Information Technology	2324-9307
Computer Engineering and Information Technology	2324-9307
Defense Management	2167-0374
Fashion Technology & Textile Engineering	2329-9568
Global Journal of Technology and Optimization	2229-8711
Global Research in Computer Science	2229-371X
Industrial Engineering & Management	2169-0316
Information Technology & Software Engineering	2165-7866
International Journal of Advanced Research in Electrical, Electronics and Instrumentation Engineering	2278-8875
International Journal of Advancements in Technology	0976-4860
International Journal of Biomedical Data Mining	2090-4924
International Journal of Innovative Research in Computer and Communication Engineering	2278-1021
International Journal of Innovative Research in Science, Engineering and Technology	2319-8753
International Journal of Sensor Networks and Data Communications	2090-4886
International Journal of Swarm Intelligence and Evolutionary Computation	2090-4908
Irrigation & Drainage Systems Engineering	2168-9768
Lasers, Optics & Photonics	-
Lovotics	2090-9888
Membrane Science & Technology	2155-9589
Molecular Imaging & Dynamics	2155-9937
Nuclear Energy Science & Power Generation Technology	2325-9809
Research & Reviews: Journal of Engineering and Technology	2319-9873
Steel Structures & Construction	-
Telecommunications System & Management	2167-0919
Textile Science & Engineering	2165-8064

General Science

Computer Science & Systems Biology Journal	0974-7230
Ergonomics	2165-7556
Research and Development	-
International Journal of Advance Innovations, Thoughts & Ideas	2277-1891
Metrology	-
Research & Reviews: Journal of Botanical Sciences	2320-0189
Research & Reviews: Journal of Chemistry	2319-9849
Tomography	-

Genetics & Molecular Biology

Advanced Techniques in Biology & Medicine	2379-1764
Advancements in Genetic Engineering	2169-0111
Advances in Molecular Diagnostics	-
Biochemistry & Analytical Biochemistry	2161-1009
Biochemistry & Molecular Biology Journal	-
Biochemistry & Physiology	2329-9029
Biological Systems	2329-6577
Biotechnology & Biomaterials	2155-952X
Bipolar Disorder: Open Access	-
Cell & Developmental Biology	2168-9296
Cell Science & Therapy	2157-7013
Cell Signaling	-
Cellular & Molecular Medicine: Open Access	-
Chemical Biology & Therapeutics	-
Clinical Epigenetics	-
Cloning & Transgenesis	2168-9849
Current Synthetic and Systems Biology	2332-0737
Cytology & Histology	2157-7099
Down Syndrome & Chromosome Abnormalities	-
Electronic Journal of Biology	-
Enzyme Engineering	2329-6674
Fertilization: in Vitro	2375-4508
Fungal Genomics & Biology	2165-8056
Gene Technology	2329-6682
Genetic Syndromes & Gene Therapy	2157-7412
Hereditary Genetics: Current Research	2161-1041
Human Genetics & Embryology	2161-0436
Insights in Cell Science	-
Insights in Stem Cells	-
International Journal of Genomic Medicine	2332-0672
Metabolomics: Open Access	2153-0769
Metabonomics & Metabolites	2325-9736
Microbial & Biochemical Technology	1948-5948
Microbial Methods & Assays Open Access	-
Molecular and Genetic Medicine	1747-0862
Molecular Biology	2168-9547
Molecular Biomarkers & Diagnosis	2155-9929
Molecular Cloning & Genetic Recombination	2325-9787
Nanomedicine & Biotherapeutic Discovery	2155-983X
Next Generation: Sequencing & Applications	-
Phylogenetics & Evolutionary Biology	2329-9002

Physiobiochemical Metabolism	2324-8793
Plant Biochemistry & Physiology	2329-9029
Proteomics & Enzymology	-
Single Cell Biology	2168-9431
Tissue Science & Engineering	2157-7552
Transcriptomics: Open Access	2329-8936
Translational Biomedicine	2172-0479

Health Care

Diversity and Equality and Health and Care	2049-5471
Health Care: Current Reviews	2375-4273
Health Science Journal	1791-809X
Pregnancy & Child Health	2376-127X
Primary Health Care	2167-1079
Quality in Primary Care	1479-1072
Tropical Diseases & Public Health	2329-891X
Women'S Health, Issues & Care	2325-9795

Immunology

Advances in Antibiotics & Antibodies	-
Allergy & Therapy	2155-6121
Autoimmune Diseases: Open Access	-
Clinical & Cellular Immunology	2155-9899
Cytokine Biology	-
Immunobiology	-
Immunogenetics: Open Access	-
Immunome Research	1745-7580
Immunotherapy: Open Access	-
Infectious Diseases & Immunological Techniques	2325-9752
Inflammatory Bowel Diseases & Disorders	-

Impact Factor Calculation:

Impact Factor was established by dividing the number of articles published in 2012 and 2013 with the number of times they are cited in 2014 based on Google search and the Scholar Citation Index database. If 'X' is the total number of articles published in 2012 and 2013, and 'Y' is the number of times these articles were cited in indexed journals during 2014 than, impact factor = Y/X

30th World Nursing Care Congress

October 28-29, 2021 | Webinar

Health Care : Current Reviews

Journal of Nursing & Patient Care

30th World Nursing Care Congress

October 28-29, 2021 | Webinar

UPCOMING CONFERENCES

Agri, Food & Aqua

International Conference on

Plant Science

February 10-11, 2020 | Amsterdam, Netherlands
E: plantscience@europemeet.net
W: plantscience@europemeet.com

International Conference on

Plant Tissue Culture and Plant Biotechnology

August 01-02, 2019 | Amsterdam, Netherlands
E: catherineshaw@europemeet.com
W: planttissueculture.conferenceseries.com

European Fish Pathology and Immunology congress

August 14-15, 2019 | Amsterdam, Netherlands
E: catherineshaw@europemeet.com
W: fishpathology.conferenceseries.com

International Conference on

Plant Physiology, Pathology and Biotechnology

September 16-17, 2019 | Amsterdam, Netherlands
E: plantbiotech@europemeet.com
W: plantscience.conferenceseries.com

European Food technology and Processing congress

November 03-04, 2019 | Paris, France
E: catherineshaw@europemeet.com
W: foodtechnologycongress.conferenceseries.com

11th International Conference on

Geriatrics Nursing and Palliative Care

October 21-22, 2019 |Amsterdam, Netherlands
E: geriatricsnursing@europemeet.com
W: [illegible]

Allied Healthcare

Antibiotics

2nd International Conference on

Vaccine Research

October 14-15, 2019 | Paris, France
E: vaccineresearch@europemeet.com
W: vaccinesresearch.vaccineconferences.com

Annual Congress on

Antibiotics & Antimicrobial Resistance

October 14-15, 2019 | Paris, France
E: antibiotics@europemeet.com
W: antibiotics.global-summit.com

Aquaculture

European Conference on

Aquaculture and Fisheries

June 27-28, 2019 | Amsterdam, Netherlands
E: euroaqua@europemeet.com
W: aquaculture.conferenceseries.com

Cardiology

6th World Congress on
Hypertension and Public Health
September 26-28, 2019 | Lisbon, Portugal
E: eurohypertension@europemeet.com
W: hypertensioncongress.cardiologymeeting.com

World Cardiology and Cardiologist Meeting
September 26-27 2019 | Lisbon, Portugals
E: contact@europemeet.com
W: worldcardiology.cardiologymeeting.com

European Heart Congress
October 23-24, 2019 | Prague, Czech Republic
E: cardiologyworld@europemeet.com
W: cardiologycongress.cardiologymeeting.com

17th International Conference on
Pediatrics and Pediatric Cardiology
March 09-10, 2020 | Prague, Czech Republic
W: heartdiseases.conferenceseries.com

3rd International Conference on
Cardiovascular Diseases and Therapeutics
April 01-02, 2020 | Paris, France
E: cardiovascular@europemeet.com
W: cardiovasculardiseases.cardiologymeeting.com

2nd European Cardiology Congress
April 20-21, 2020 | Florence, Italy
E: eurocardiology@europemeet.com
W: https://eurocardiology.cardiologymeeting.com/

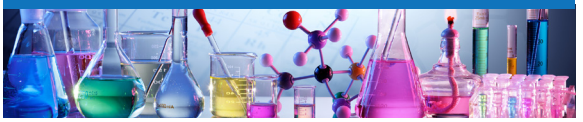

8th World Heart Congress
May 11-12, 2020 | Frankfurt, Germany
E: heartcongress@europemeet.com
W: https://heartcongress.cardiologymeeting.com/

Chemical Engineering

7th World Congress on
Chemical Engineering and Catalysis
April 21-22, 2020 | Florence, Italy
E: chemicalengineering@europemeet.com
W: chemicalengineering.annualcongress.com

Chemistry

11th World Congress on
Chemistry
October 10-11, 2019| Dubrovnik, Croatia
E: chemistrymeet@europemeet.com
W: chemistry.chemistryconferences.org

15th World Congress on
Medicinal Chemistry & CADD
October 10-11, 2019| Dubrovnik, Croatia
E: medchem@europemeet.net
W: medchem.pharmaceuticalconferences.com

9th World Congress on
Spectroscopy & Analytical Techniques
October 24-25, 2019 Prague | Czech Republic
E: spectroscopy@europemeet.com
W: analyticaltechniques.annualcongress.com

11th International Conference on
Medicinal Chemistry and Pharmaceutical Technology
February 12-13, 2020 | Paris, France
E: medicinalchemistry@europemeet.com
W: medicinalchemistrymeetings.pharmaceuticalconferences.com

6th International Conference on
Physical and Theoretical Chemistry
March 18-19, 2020 | Amsterdam, Netherlands
E: Physicalchemistry@europemeet.com
W: https://physicalchemistry.annualcongress.com/

6th Edition International Conference on
Polymer Science and Technology
April 02-03, 2020 | Paris, France
E: polymerscience@europemeet.com
W: polymerscience.annualcongress.com

10th World Congress on
Chromatography
April 08-09, 2020 | Zagreb, Croatia
E: chromatography@europemeet.com
W: chromatography.conferenceseries.com

11th International Conference on
Chemistry
April 22-23, 2020 | Florence, Italy
E: chemistryworld@europemeet.com
W: https://chemistrymeetings.conferenceseries.com/

2nd European Food Chemistry Congress
April 22-23, 2020 | Florence, Italy
W: foodchemistrycongress.conferenceseries.com

7th International Conference on
Organic and Inorganic Chemistry
June 08-09, 2020 | Geneva, Switzerland
E: organicchemistry@europemeet.com
W: organic-chemistry.chemistryconferences.org

11th World Congress on
Green Chemistry and Technology
July 09-10, 2020 | Geneva, Switzerland
E: greenchemistry@europemeet.com
W: greenchemistry.chemistryconferences.org

Dental Conferences

28th Euro Dentistry Congress
April 16-17, 2020 | Amsterdam, Netherlands
E: dentistry@europemeet.com
W: eurodentistrydentalcongress.com

25th International Conference on
Dental Education
April 22-23, 2020 | Florence, Italy
E: dentaleducation@europemeet.com
W: https://dentaleducation.dentalcongress.com/

24th Annual World Dental Summit
May 11-12, 2020 | Zagreb, Croatia
E: dentalworld@europemeet.com
W: https://worlddental.conferenceseries.com/

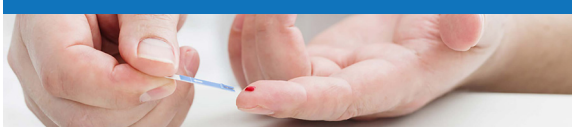

Dermatology

16th World Conference on
Cosmetic Dermatology & Skin Diseases
May 25-26, 2020 | Paris, France
E: cosmetology@europemeet.com

KEYNOTE FORUM

Yoshiko Yamaguchi

Fucalty of Nursing, Kwassui Women's University, Japann

Affecting factors of nurses' mental health status: A comparative cross-sectional survey

Nurses' mental health status is affected by both job stress and family-related stress. Home healthcare and nursing home nurses tend to be older than hospital nurses, and therefore, nurses' family-related stress may vary between nurses' workplaces. This study aimed to clarify the difference in the magnitude of impacts of job stress and family-related stress on nurses' mental health status, and to identify the differences of factors affecting mental health between nurses working in hospitals, home healthcare, and nursing homes. This cross-sectional study involved nurses from hospitals, home healthcare facilities, and nursing homes in Japan. Participants responded to a questionnaire survey that measured their job- and family-related stress, as well as mental health status. Job- and family-related stress showed similar impacts for all nurses; the factor with the most effect was job demand, followed by job control. Interestingly, family-related stress showed greater impacts on mental health status among home healthcare nurses. Interventions for reducing family-related stress may be effective in improving nurses' mental health; such interventions may be especially effective for home healthcare nurses.

Biography

Dr. Yoshiko Yamaguchi has received her PhD in. Kyushu University during the period of 2013-2016. Currently, she is working as research associate in Home Care Nursing, Faculty of Nursing, Kwassui Women's University, Japan. She has successfully completed her responsibilities as a reviewer of seventy-seven research articles of twenty-four Journal from 2016-present. And she has been serving as an editorial board member of two Journal; LIFE: International Journal of Health and Life-Sciences and Journal of Practical and Professional Nursing, and has been delegated vice president of Healthcare and Biological Sciences Research Association (HBSRA).

Medical Emergency principles in Dental care settings"

Medical emergencies in dental care could be life-threatening and can occur at any time in the dental clinic. It can happen to anyone, from the anxious patient in the reception area to the elderly diabetic who was advised to skip meals before coming to his or her appointment.

Dental care teams should be fully aware of medical emergencies plan in order to manage patient safety in dental care settings.This include :

1. Be familiar with the various types of emergencies that may occur in dental care settings.
2. Should be able to recognize symptoms using clinical judgment and skills.
3. Implement properly the medical emergency plan in the dentist clinic.
4. Use of emergency medication and equipment properly.

Conclusion:

In dental settings, patient safety is critical and medical emergencies can be prevented.

The dental care team has to be regularly trained to manage an effective emergency medical plan in dentat settings.

Biography

Caroline Bilen

Founder- CEO of The Compass Health Consultancy Healthcare Consultant & Trainer

Caroline is recognized as a leader, consultant, and trainer in the healthcare industry. She has a BSN in nursing with a solid medical background with more than 29 years of experience in health care management and accreditation and 15 years of experience in the international health care industry and medical solutions.

Caroline is a trainer for Infection Control, Surgical safety, and patient safety programs. She held the position of Operating Room Nursing Manager, Director of Homecare Lebanon, and Scientific Affairs and Education Manager in CEEMEA regions.

Since 2019, Caroline is managing a healthcare consultancy firm to assist healthcare facilities to reach their key performs indicators via executing tailor-made solutions and education programs.

Caroline is passionate about patient safety and is regularly engaged as a keynote speaker and moderator at international and national symposia. She is a published author, and her work has been broadly published and quoted in the media. She is a member of many local and international scientific organizations as well as a member of the Worldwide Association of Female Professionals

An Effective Educational Intervention on Antimicrobial Stewardship to Licensed Nurses in a Skilled Nursing Facility

Gloria Escalona, D.N.P., R.N., P.H.N
Nightingale Senior Care, LLC, San Francisco, CA 94132, USA

This study examines the impact of an educational intervention on antimicrobial stewardship (AS) to licensed SNF nurses and is among the very first, if not the first, to examine the contribution of the different types of SNF licensed nurses. A 366-bed urban SNF served as the study site. Three methodologies were used: 1) an Educational Intervention to licensed nurses on the definition and need for AS, the use of the McGeer-Stone Criteria, and a new infection decision algorithm, 2) a post-educational intervention Nurse Survey, and 3) a retrospective pre- and post-educational intervention medical records audit measured antimicrobial use and adherence to the McGeer-Stone Criteria. Comparisons were made between units staffed largely by RNs and units staffed largely by LVNs, and between units where NPs were allowed to order medications and those where NPs were not allowed to write orders. This study received approval by the IRB Committee of the California State University at Fresno.

Prior to the educational intervention participating nurses were not aware of their role in AS. After the education intervention, all understood the importance of their role and antibiotic orders decreased. Stewardship efforts in SNFs: should involve all licensed nurses, enforce the McGeer-Stone Infection Criteria, be applied at the point of care, and the AS program managed by the facility nursing department. The various categories of nurses in long term care facilities should be differentiated in both research and practice.

Biography

Dr. Escalona has been an RN for over 40 years and has spent the past 20 years as an infection control consultant and staff educator for SNFs. For the past 6 years she has also been in private practice as a consultant, and mobile foot and wound care nurse serving the elderly in their home or facility, and teaching foot care nursing. She also volunteers at local homeless shelters providing foot and wound care to low income and unhoused populations.

Dr. Kalliopi Megari, PhD

Aristotle University of Thessaloniki, Greece

Contribution of Psychological factors of COVID-19 vaccinations

Psychology has a critical role in fighting the hesitancy of people to get vaccinated. Psychological factors for vaccination intention, highlight the variables related to positive and negative attitudes toward COVID-19 vaccination. Studies show that people's interpretations of the origin of the virus were important with the people who believe that the virus was created in the lab to be powerless and more concerned about the possible side-effects of the vaccines something negatively associated with their vaccination intention. The source of vaccine recommendation was relevant to vaccination intention with people's vaccination intention to be highest if the vaccines were recommended by health professionals, and secondly by friends and the government, and the media (Lo et al., 2021). There must be insights into developing communication strategies to effectively promote vaccination intentions. There are psychological, social, and situational factors on intent to commit with a COVID-19 vaccine (Butter et al., 2021).

Biography

Dr. Kalliopi Megari is an experienced psychologist working in the hospital & health care industry. She is a lecturer at University of Western Macedonia in Greece. Skilled in Clinical Neuropsychology, Clinical Research and Learning Disabilities. Graduated from Aristotle University of Thessaloniki and attended further education from University of Macedonia, in people with special needs and disabilities. She holds undergraduate degrees in Nursing and Psychology, as well as a Master's and a PhD in Neuropsychology from Aristotle University of Thessaloniki. She has many years of experience working with chronic disease patients as well with people with disabilities. Her work has earned her many prestigious international awards. She has given lectures at Aristotle University of Thessaloniki and University of Warsaw. She is postdoctoral researcher and has published more than 10 research articles in journals. She is the Global Engagement Representative of International Neuropsychological Society, secretary general and member of the Ethics Committee of Hellenic Neuropsychological Society.

University of East Anglia, Norwich, UK

Blemished by association: negotiating courtesy stigma within Black African heterosexual relationships with one partner living with HIV (LWH)

Stigma by association (courtesy stigma) with people living with HIV (PLWH) has been minimally explored in the HIV literature and, within Black African heterosexual relationships with one person LWH (serodiscordant relationships). Therefore, this oral presentation suggests that, since it remains a significant domain for HIV, understanding how stigma by association is negotiated is an important consideration in the successful care and management of Black African couples in serodiscordant relationships. I also propose that stigma within these relationships should be explored from the perspectives of both partners because PLWH and their sexual partners without HIV share the burden of HIV infection.

Multi-centre ethical approval was obtained prior to conducting this research in three Genito-urinary Medicine (GUM) clinics located within the National Health Service (NHS) Hospitals in North East London. 19 Black Africans formed most of the participants recruited into the wider study. The emphasis in this presentation is on deeper understanding of how participants negotiate courtesy stigma. Interpretive phenomenological perspective is a particularly appropriate research approach to guide data analysis and interpretations.

One of the main findings explicates how couples negotiate the complex tasks of disclosing their relationships to outsiders; family and friends to evade the stigmatisation and blemish of the relationships or individuals within the relationships.

Understanding how couples in relationships with a partner LWH negotiate stigma by association has implications for providing support for Black African heterosexual couples, and inform research into understanding stigma of HIV as an infectious disease.

Biography

Kemoh Rogers completed his PhD from City University of London in 2016. He is Associate Professor in Nursing Sciences, School of Health Sciences in the Faculty of Medicine and Health Sciences, University of East Anglia, Norwich, UK. He leads and teaches modules at undergraduate and postgraduate levels. He was previously Senior Lecturer in Public Health with Anglia Ruskin University in Cambridge and Chelmsford, UK. His research interests include lived experiences of living with chronic infectious conditions using Interpretive Phenomenology and Strausian Grounded Theory with Symbolic Interactionism as theoretical framework. He has made several presentations at national and international conferences. His publications are mainly on aspects of Relationships with one partner living with HIV.

Social support in the postpartum period: you are not alone

The postpartum period is one of the most important periods in which physiological, psychological and social changes are experienced. A woman needs social support during this period when she experiences many differences in her life. Providing social support in the postpartum period for the continuation of the health of the mother, baby and family is very important for a healthy postpartum period. The postpartum period is a stressful situation for women and can experience negative experiences because of being alone. In the postpartum period, the support given to the woman by her social networks such as family, relatives and friends is important. Social support is very important for the care of the newborn, as well as helping to consolidate the role of motherhood. It has been found that social support is effective on the emergence, course and duration of many physical and mental illnesses, is a coping resource and protective against diseases, reduces the risk of postpartum depression, and facilitates adaptation to the role of motherhood.

In the postpartum period, the support given by health professionals to women is important as well as social support. Especially midwives should be guided to ensure the psychosocial adaptation of parents, mother and newborn emergencies, and to provide physical care such as skin contact, breastfeeding, body hygiene practices, skin care and umbilical cord related to the care of the mother and newborn during postpartum checks and home visits. Midwives need to ensure standardization in postpartum care practices, and to provide practices for determining risks to maternal and newborn health. In this process, midwives giving these care, which is determined as standard, to mothers, fathers and people who will support care will ensure that mothers spend the postpartum period in a healthier way.

The postpartum period is one of the most important processes in a woman's life. Proper execution of this process is very important for the health of both mother and baby. In this process, with the cooperation of partners, social support and midwives, the most effective care should be given to the basic needs of the puerperant with an individual and holistic approach.

Biography

Cultural Humility in Healthcare: Finding Cultural Humility in Ourselves

Kumi Oya, PhD
Tacoma, WA 98444, USA

As we globally continue to face diversity in race, ethnicity, culture, and religion, as healthcare professionals, we also continue to be challenged by our own unchecked biases and stereotypes when working with diverse populations of clients and colleagues. It is critical for healthcare professionals to understand and practice 'cultural humility' in order to better serve our ever-growing diverse populations of clients and also our professional peers. In this workshop, the concept of 'cultural humility' is introduced in comparison to and in contrast with 'cultural competence'. Participants will also be invited to practice and embody this humility by utilizing interactive exercises and group dialogues. These processes are designed to provide both a tool and practice ground for participants to connect theories/ideas with behaviors/actions. This workshop will be both interactive and informative.

Biography

Kumi Oya, PhD. is a consultant, researcher, educator, occupational therapist, and creative arts therapist. Kumi's area of focus and expertise is person-centered and culturally humble care for people living with dementia. Attention to a cultural humility framework/practice is a core value of hers, linked to her work. She has worked in hospitals and dementia care facilities both in Japan and the United States for many years. She has provided socio-emotional support and rehabilitation to those living with mental/cognitive challenges due to dementia, stroke, traumatic brain injury, and so on, through therapeutic and creative modalities. Kumi is an adjunct faculty in the Transformative Studies doctoral program at California Institute of Integral Studies, in San Francisco, CA.

Chakras' Energy Deficiency as One of The Causes of Diabetes Type I

Huang Wei Ling

Medical Acupuncture and Pain Management Clinic. Franca, São Paulo, Brazil

Introduction: Type 1 diabetes mellitus is considered an autoimmune disease according to Western medicine that is characterized by the destruction of beta ceels of the pacnreas responsible for the production of insulin. According to traditional Chinese medicine (TCM), diabetes is considered an energy imbalance produced by Yin deficiency and Heat retention. Purpose; to demonstrate that patients with type 1 insulin has chakars' energy centers deficient in energy leading to deficiency of Yin and Heat retention. Methods; throught two cases reports of patients with type 1 diabetes that was using insulin to control glucose with no control of the glycemia. Both were submitted to Chinese dietary counseling, auricular acupuncture and apex ear bloodlleting and measurement of the chakras' energy centers with radienthesia procedure . Results; both patients had chakras' energy centers completely deficient in energy, rated in one out of eight, with exception of the seven chakra, that was in normal level, rated in eight. The treatment consisted in maitaing the Chinese dietary cousneling and auricular acupuncture sessions with apex ear bloodlleting and associate the hoemopathy medications to replesinish the energy of the chakras' energy centers according to the theory Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine and crystal based medications for a period of one year or more. With the use of all these tools to balance the internal energy and replenish the chakras' energy centers, it was possible to reduce the use of insulin by these two patients (from the first the glycemia that was about 250 mg/dl, it became to 150mg/dl even redcing the insulin and the second patient that was about 600mg/dl, it became to 150mg/dl even reducing the insulin intake by both patients. Conclusion: the conclusion of this study is that patients with type 1 diabetes mellitus has chakras' energy deficient in energy and the treatment of this condition, replenishing the energy of the chakras' energy centers with highly dilluted medications are important to treat the patient in the root level and not just treating the manifectation of the disease that is the high glycemia.

Biography

Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, a General Practitioner and Parenteral and Enteral Medical Nutrition Therapist. Once in charge of the Hospital Infection Control Service of the City of Franca's General Hospital, she was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all chronic diseases in a holistic way, with treatment guided through the teachings of Traditional Chinese Medicine and Hippocrates. Researcher in the University of São Paulo, in the Ophthalmology department from 2012 to 2013.Author of the theory Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine. Author of more than 60 publications about treatment of variety of diseases rebalancing the internal energy using Hippocrates thoughts.

The Philippines has an increasingly aging population thereby increasing the demand for healthcare and support from families and the government. Studies showed that the family is the main caregiver of elderly parents/adults as dictated by the Filipino culture of filial piety and respectful behavior towards older people. However, this caring culture is now slowly declining due to deteriorating family values and societal influences brought about by modernization. To assist Filipino older adults on their socioeconomic needs of Filipino older adults, laws and policies were enacted and being implemented by the government. Unfortunately, benefits from these government programs are not fully enjoyed by Filipino older adults due to implementation issues on the local government unit level. Hence, the government needs to revisits its policies and programs to cater to the needs and promote the rights and privileges of these vulnerable population group especially when families are incapable of providing care to their elderly. Family and the government can partner in giving care and support to Filipino older adults. The unique filial piety culture and respectful behavior towards older people must also be maintained. This article provides an overview of caring behavior of Filipino families to their elderly and the various government policies concerning socioeconomic assistance and privileges given to its senior citizens.

Biography

Eva Belingon Felipe-Dimog has completed her Master's degree at the age of 29 years from the University of the Philippine Manila. She is now 34 years of age and currently taking her PhD in Public Health from Kaohsiung Medical University, Kaohsiung City, Taiwan. She is also a faculty member of the Department of Nursing in Mountain Province State Polytechnic College, Bontoc, Mountain Province, Philippines. She has one published perspective article and another accepted paper to be published on the third week of Septemeber, 2021.

The Risk of Exposure of COVID-19 among the Residents of Cagayan de Oro City

Tacandong
Xavier University Ateneo de Cagayan, Philippines

Co-Authors
Lew Carynn, Elissa Jane M., Pacana, Audrey Brina, Padilla, Raphael John C., Pagtalunan, Reshell Myrene, Puertas, Kent Joven, Sajulla, Gabrielle Angela M., Salcedo, Triya Kisha S., Sandig, Lynette B., Sumundong, Patriz Anne, Tolinero, Will Peter A., Vitor, Louise Coleen T., Yasay, Korinne Andrea, Zurita, Ladeane Oneal K
Xavier University Ateneo de Cagayan, Philippines

SARS-CoV-2 or COVID-19 was first detected in December 2019 in Wuhan, China. As of 5 May 2021, there are 1,062,225 confirmed cases and 17,525 deaths in the Philippines (DOH, 2021). With this, the study aimed to assess the level of risk exposure to COVID-19 of the working individuals in Cagayan de Oro City according to age, nature of work, destination, mode of transportation, and application of self-protective measures. A total of seventy-eight (78) respondents were selected through convenience sampling. Findings show that most of the respondents are aged 21 to 35 years old (62.82%), work as office workers (53.85%), go to high risk areas such as neighborhoods, places of worship, and social gatherings (53.85%); ride low risk modes of transportation such as habal-habal, taxi, and private transportation (62.82%), and used four self-protective measures like face masks, face shields, alcohol-based sanitizer/rubbing alcohol, and clean gloves when going out (70.51%).

Those belonging to the age group of 21 to 35 years old had higher levels of risk exposure to COVID-19. There was a significant difference in the level of risk exposure when grouped according to age, destination, mode of transportation, and the application of self-protective measures. On the other hand, there was no significant difference in the level of risk exposure to COVID-19 among the working individuals when grouped according to the nature of work. Overall, there was a low level of risk exposure to COVID-19 among the working individuals of Cagayan de Oro City.

Biography

Lew Carynn Tacandong is a 4th year student in the College of Nursing at Xavier University Ateneo de Cagayan, Philippines. She is also part of the Xavier University Glee Club, the university chorale and is currently the president of the organizaation.

Effective Management of the nurse administrators of Geriatric Care Facility to creating an environment for collaborative practice

Chiharu Miyata
Mie University Graduate School of Medicine, Mie, JAPAN

Currently, there are more than 10 million people over the age of 60 in 33 countries. The world population over the age of 60 is projected to grow to nearly 2 billion in the first half of the 21st century.In Japan, more than 26% of the population is 65 years or over, the needs of geriatric nursing have been increasing, the requirements in geriatric facilities are also changing. The geriatric care facilities (GCFs) should provide provision of care focused on the life of the users, and care is provided through multidisciplinary collaboration. Thus, it is expected that nurse administrators of GCFs should have specific roles and attitudinal attributes suited for the above characteristics different from those of medical facilities. However, very little research has focused on nurse administrators of GCFs in Japan. Therefore, we conducted a qualitative exploratory descriptive research to clarify effective manegement style of the nurse administrators of GCFs. Participants expressed their management style and describe the characteristics or attributes of it. Four descriptive themes: show a vision for promoting home nursing, divide work with respect for specialty, pursue care with respect for the elderly, create an ethical work environment, were categolised. Also they offered difference between that of GCFs and that of medical facilities, pointed out the issues that may hinder quality of care improvement in the geriatric care environment. The effective management of nurse administrators in GCFs has been clarified, in which included a viewpoint of the management different from that of the medical facilities.

Biography

Chiharu Miyata, RN, Master of Nursing Science, completed her Dr. of Human Health Science from Kyoto University School of Medicine, Japan.

She is the associate professor of Mie University of Nursing Sciences in Japan. She has published several books and papers in reputed journals and has been serving as an editorial board member of repute.

The Unseen Abuse: Obstetric Violence

Obstetric violence (OV), is a specific type of violation of women's rights in medical practice during health care related to the child birth processes. Women who give birth may be exposed to different forms of OV during labor, in the delivery room, and in the early postpartum period. Being exposed to such maltreatment and abuse creates a psychological distance between expectant mothers and care providers, and as a result, women who are afraid of being exposed to abuse and violence avoid applying to health systems. Avoidance of applying to the hospital and thus getting away from the health system is becoming a more important obstacle than geographical or financial barriers among the barriers encountered in providing maternal health care.

The inability of expectant mothers to receive service from health institutions is one of the important factors that play a role in the increase in maternal mortality rates. According to WHO's 2030 Sustainable Development Goals (SDG), countries should set new targets for reducing maternal mortality rates and develop effective policies to achieve this. SDG 3 includes an ambitious target: "reducing the global MMR to less than 70 per 100 000 births, with no country having a maternal mortality rate of more than twice the global average". Although Turkey has a good 16.0% maternal mortality rate (WHO,2018), it has been determined that the rate of home births is on the rise in some studies.

Respectful care during childbirth has been described as "a universal human right that encompasses the principles of ethics and respect for women's feelings, dignity, choices and preferences". Accounts of women, health workers and families reveal a range of disrespectful and abusive treatment. These include physical abuse (beating, slapping and pinching), lack of consent for care (e.g. for Caesarean section or tubal ligation), non-confidential care (e.g. lack of physical privacy or sharing of confidential information), undignified care (e.g. shouting, scolding and demeaning comments), abandonment (e.g. being left alone during delivery), discrimination on the basis of ethnicity, age, or wealth, or detention in facilities for failure to pay user fees.

Obesity in Pregnancy: Contribution to Adverse Pregnancy Outcomes

In recent years, the global prevalence of overweight and obesity has increased rapidly, contributing significantly to the incidence of chronic disease. This increase in the prevalence of overweight and obesity also affected women of reproductive age. 50% of women of childbearing age are overweight or obese. 18% are obese at the beginning of pregnancy. In the United States and Europe, 20-40% of women gain more weight than recommended during pregnancy. Although the exact mechanism of the negative effects of maternal obesity on the mother and fetus is not known, there are various interactions between genetics, environmental factors, mother and fetus. Obesity is associated with an increased risk of almost all pregnancy complications, and complications such as gestational hypertension, preeclampsia, and gestational diabetes mellitus are more common in women with a normal body mass index. Obese women are also at higher risk of metabolic syndrome in the future, as they are at higher risk of excess weight gain during the gestational period. Risks such as prematurity, stillbirth, spontaneous abortion, macrosomic baby (>4000 g) and large for gestational age baby are increased in an obese pregnant. In addition, obesity can cause spontaneous pregnancy loss and congenital anomalies such as cleft lip, diaphragmatic hernia, cardiac and gastrointestinal anomalies during early pregnancy. In the postpartum period, obese women have an increased risk of venous thromboembolism, depression and breastfeeding problems. Weight gain in the postpartum period increases future cardiometabolic risks and preconceptional obesity in subsequent pregnancies. In conclusion, being overweight during pregnancy increases the burden of health care and contributes to significant obstetric complications. It is recommended to plan effective interventions to reduce the prevalence of overweight and obesity in pregnant women.

Biography

She completed her undergraduate and graduate studies at İnönü University. She worked as a midwife for a while, then she started to work as a Research Assistant at the Faculty of Health Sciences of İnönü University. Esra Karataş Okyay, who continues her doctoral education has articles on pregnancy, childbirth and women's health and presentations in congresses. She has attended various courses related to her field. She has memberships in professional organizations related to its field.

Laparoscopic Surgery: Hypothermia and Nursing Care

Today, technology is developing rapidly and directs our lives to a great extent. These technological developments, which affect many areas of our lives, enable applications that are considered as turning points in healthcare to come to the fore. In the field of health, it is seen that surgical techniques are more affected by technological developments. Laparoscopic surgery is one of the most preferred surgical techniques.

The main purpose of surgical interventions is to minimize the complications that may occur and to increase the quality of life of the individual. In this context, with laparoscopic surgery, such postoperative negativities were minimized as infection, pain, delay in the healing process, prolongation of hospital stay, etc., but hypothermia was found to be more common.

Studies have determined that this is caused by the dry and cold CO2 gas used. In addition, complications caused by hypothermia were found to be more common. Studies have shown that minimizing hypothermia and the complications caused by hypothermia is only possible with different heating techniques such as peripheral, active and passive heating, and appropriate care.

At this point, nurses, who come to the forefront with their professional care service, have great duties and responsibilities. Studies show that nurses can minimize the complications caused by hypothermia and hypothermia in a short time, and increase the quality of life of the individual, with appropriate interventions and quality nursing care.

Biography

Zehra Aydin is doctor (PhD) in the Department of Surgical Diseases Nursing. She has been working in Department of Surgical Diseases Nursing, Faculty of Health Sciences, Hitit University, Corum, Turkey since 2013.

Application of Heated Disposable Blanket in Preventing Neonatal Hypothermia During Transportation

Wing Yi Kaness Ching
St. Paul's Hospital, Hong Kong, Hong Kong

Co-Authors
Kam Tak Camille Ho, Shun Kiu Margaret Cheung, & Hoi Yi Wong
St. Paul's Hospital, Hong Kong, Hong Kong

Neonatal hypothermia is associated with increased morbidity and mortality. Despite routine interventions, a temperature drop was noted between time of birth and admission, and the risk increased with longer transport duration. This project aimed to examine the application of instant heated disposable blanket in preventing hypothermia during transport in a maternity unit. Following a six-month pilot, a post-test which included 747 neonates was carried out from September 2019 to February 2020. Temperature was taken rectally upon admission and maternal satisfaction was surveyed the day after. Results showed that 81% neonates attained 36.5oC, representing 24% increase from the pre-test. Proportion of mild hypothermia decreased from 28% to 17%, while moderate hypothermia decreased from 15% to 2%. The mean temperature rose from 36.1oC to 36.7oC and proportion of mothers who rated 'satisfactory' increased from 76% to 92%. There were no cases of hyperthermia or dermal irritation. The blanket helped wean neonates from incubator care and promoted maternal bonding. It is preferred to other devices for several reasons: fully mobile, does not disrupt infection control, does not require power supply, long shelf life, compact packaging, minimal operating cost. It could be a cost-effective thermal solution not only in hospitals but also during inter-hospital transfer for critically ill neonates. It would be beneficial to explore products with longer heat duration for premature neonates who have difficulty in reserving heat during incubator care, maternal bonding, or breastfeeding. Limitations identified were related to its non-reusable nature and responsible product disposition process was written in the procedure.

Biography

Wing Yi Kaness Ching has been working as a registered nurse and midwife for over ten years. She earned her degree of Master of Nursing (Public Health) in 2015 from the University of Hong Kong and degree of Juris Doctor from the Chinese University of Hong Kong in 2019. She is the Deputy In-Charge of the maternity ward in St. Paul's Hospital. She has participated in several international nursing research congresses and has been conducting quality improvement projects in maternity care.

Haptotherapy on Fear of Chidbirth

Pregnancy and birth is a period that is considered as a turning point in a woman's life. Although pregnancy and childbirth are accepted as physiological events, they are stressful times for women. While adapting easily to the psychological changes that develop during this period, some women may experience mild or may experience severe fear. For these reasons, it is important to evaluate interventions for fear of childbirth. In this review, our aim is to evaluate the Haptotherapy, which is a psychotherapeutic method to be used for fear of birth.

Recent findings: Haptotherapy is a respectful and safe touch type used during pregnancy to reduce the woman's fear of childbirth, to strengthen maternal-paternal attachment, and to reduce the effect of anxiety on the pregnant woman and child.

Haptotherapy training includes specific exercises to treat fear of childbirth. These exercises have been developed to change the woman's perception of pregnancy and to develop a positive attitude towards pregnancy and childbirth. Haptotherapy involves a combination of skills taught in eight one-hour sessions between weeks 20 and 36 of pregnancy. Haptotherapy has three basic steps. These; 1) Pregnant women have the ability to open and close by reacting to the awareness of the impressions they perceive, 2) To provide maternal attachment by touching the belly of the pregnant (haptotherapist and mother) and to provide paternal attachment by the father's touching the pregnant's belly and the fetus to react, 3) In the third stage of birth, in the pushing stage of abdominal power to use them correctly and to gain skills related to coping effectively with contractions, and to enable women to control their anxiety by making women feel more competent and in control of these learned skills.Studies have shown that haptotherapy is more effective in reducing fear of childbirth than usual care and psycho-education.

Conclusion & Significance: It is important for nurses/midwives to learn and practice haptotherapy skills on pregnant women, to enable pregnant women to cope with their fear of birth, to increase maternal and paternal attachment levels and birth satisfaction, and to reduce birth-related complications and postpartum problems.

Branding of the nursing profession in Saudi Arabia: current state and future steps.

The absence of a proper professional brand had affected the status of nursing nationally. Many of the current issues require reconceptualisation instead of radical solutions. Transforming the roles of nursing management and staff nurses can positively influence career branding. Focusing on active branding will automatically sort out major local issues in addition to promoting global health coverage. This discussion paper presents the current situation of professional branding in Saudi Arabia and offers potential solutions for enhancing the professional brand for nurses. Active marketing of the nursing profession would begin with changes in the paradigm of nursing leadership and the redesign of nurses' work, which will help to accept the role of nurses as independent professionals. Creating and communicating their brand on the national level is essential. Branding strategies require active input from the nurses, local nurse associations and nurse legislators with significant focus on visibility of nurses roles.

Path analysis of ethical sensitivity and empathy in critical care nurses

Introduction: Critical care nurses routinely confront moral issues as they care for extremely ill patients, they need to have an ethical sensitivity to recognize ethical conflicts and make appropriate decisions in ethical situations. According to theories, empathy is associated with ethical sensitivity. Nursing literature also demonstrates the impact of nurses' demographic and work factors on their level of empathy and ethical sensitivity. This study aims to provide a better understanding of the concept of empathy in care ethics by confirming the study conceptual model that links empathy and ethical sensitivity considering their potential predictors among critical care nurses.

Materials and Methods: A sample of 326 critical care nurses from 10 educational hospitals in Iran completed the study survey including Lutzen's Modified Moral Sensitivity Questionnaire (MMSQ), Jefferson Scale of Empathy-health professional version (JSE-HP), and Depression, Anxiety and Stress (DASS-21) scale. Path analysis was used to determine the relationship between study variables and the study reported according to the STROBE checklist.

Results: The hypothesized model adequately fitted with study data. empathy mediated the influence of anxiety on ethical sensitivity. Anxiety was negatively associated with empathy, in turn, empathy and ethical sensitivity had a strong positive association. Among demographic characteristics, age positively predicted ethical sensitivity.

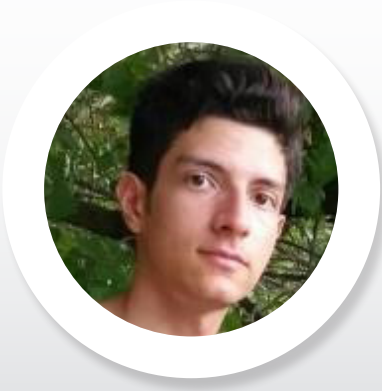

Conclusion: higher ethical sensitivity is associated with higher empathy and less anxiety among older nurses. This study can help to endeavor for ameliorating some modifiable factors like emotional states and empathy to resolve ethical dilemmas through improving nurses' ethical sensitivity.

Introduction: The concept, spiritual intelligence evolved in 1997 based on eastern religious, ancient civilization, and indigenous cultures and was introduced as our ultimate intelligence. since then, SI has been widely considered within different professions and in the past decade has gained traction with the nursing practice. This review was conducted to investigate the association between SI and professional outcomes in nursing practice.

Materials and Methods: The search strategy included 10 electronic databases focusing on articles published in English and Persian language from 2000 to 2020. Published observational studies that examined the relationship between spiritual intelligence and professional outcomes in nursing practice were included.

Results: A total of 95 titles and abstracts were screened resulting in 27 observational studies included in a meta-analysis. Most of the studies indicated a positive relationship between SI and professional outcomes such as competency, care quality, resiliency, and commitment for nurses. The meta-analysis revealed a moderate correlation between SI and nursing professional outcomes(r = 0.34, 95% CI: 0.27-0.40, I 2 = 84.35%)

Conclusion: Spiritual intelligence is associated with better outcomes in the nursing profession. Strategies to improve SI among nurses are warranted.

Is It Really True That Impotence in Diabetic Patients Is Actually Caused by Diabetes

Huang Wei Ling

Medical Acupuncture and Pain Management Clinic. Franca, São Paulo, Brazil

Introduction: Several scientific publications say that the cause of sexual impotence in patients who have diabetes is caused by microangiopathy caused by diabetes. Purpose; to understand in the energy level, what is the real cause of sexual impotence in diabetes patients. Methods; the author did a review of what has in the literature concerning the formation of diabetes and which energy is responsible for sexual functions and reproduction according to traditional Chinese medicine. Results; the results of this study was that, according to energy imabalances that is generating diabetes and sexual disfuction, the author saw that diabetes came from Kidney Yin deficinecy and forrmation of Heat and sexual function in TCM also came from Kidney deficiency. Both has the same root and if we treat hyperglicemia in diabetes patients and do not treat the root, we will not treat the cause of both problems, that are the same. Conclusion: the conclusion of this study is that diabetes and sexual function came from the same energy deficiency and the treatment of this deficiency is important to treat the diabetes and also, the sexual disfunction that patient with diabetes can have in their life.

Experiences of primary caregivers who rear children with SMID (severe motor and intellectual disabilities) and of siblings during the transition from hospital care to home care

Recently, advancements in medical care have made it possible to save the lives of SMID children; therefore, support is required during these children's transition to home care. It is important to support not only parents, but also siblings during the transition, however studies that focus on siblings are rare.

Therefore, this study aims to clarify the experience of primary caregivers of SMID children with siblings during the handicapped children's transition to home care. We conducted an online semi-structured interviews with 19 primary caregivers as subjects, and performed a Krippendorff (2012) content analysis.

As the result, 95 codes, 25 subcategories, and five categories were extracted as the experiences of the primary caregivers during the transition of SMID children with siblings to home care. The five categories were: "Discharge from the hospital while maintaining a balance with childcare for siblings"; "Struggling to balance caring for the SMID child and siblings"; "Observing the relationship between the SMID children and their siblings"; "Concern about the impact of a sibling on the relationship and the burden of caring"; and"Establishing new relationships between a sibling child and oneself".

"Discharge from the hospital while maintaining a balance with childcare for siblings" refers to the experience of the primary caregiver. The primary caregiver had to secure human resources and make adjustments for life at home, while struggling to balance visits to the SMID child and caring for the siblings.

"Struggling to balance caring for the SMID child and siblings" is also the experience of the primary caregiver. After discharge, the primary caregiver was busy providing care for the SMID child. As a result. they may have been unable to care for siblings and to live a life without the help of others.

"Observing the relationship between the SMID children and their siblings" as well as encouraging their interaction is the experience of the caregivers even in situations where it is difficult to establish the sibling relationship.

"Concern about the impact of a sibling on the relationship and the burden of caring" refers to the primary caregiver's concern about the impact of the SMID child on their relationships and the burden of caring imposed by the SMID child.

"Establishing new relationships between a sibling child and oneself" refers to the experience of the primary caregiver who also feels supported by the presence of a sibling child, while trying to build a relationship with both the SMID child and the sibling child.

During the transition to home care, the primary caregiver finds it difficult to balance caring for the SMID child and the siblings but they support that the siblings can adapt to the new environment, and so they rebuild the relationship between themselves and the siblings.

Nurses should support primary caregivers when they are adapting to the transition to home care. Furthermore, they should encourage the development of relationships between the SMID child and their siblings and rebuilding of the relationships between the primary caregiver and the siblings.

Biography

Satoe Iki received her master's degree from the University of Tsukuba at the age of 26.

Currently, she is a PhD student at the University of Tsukuba.

From 2017 to 2019, she worked as a pediatric nurse at the University of Tsukuba Hospital. She is also currently working as a part-time nurse at a rehabilitation facility for children with disabilities.

She has given several presentations at international and Japanese conferences, and is currently preparing to submit her master's thesis.
