15th International Conference on Obesity Medicine

Bangkok, Thailand

October 30-31, 2017

http://obesitymedicine.conferenceseries.com/

Obesity Medicine 2017

Invitation

Conference Series Ltd welcomes you to attend the ***15th International Conference on Obesity Medicine,*** *which is going to be held in* ***Bangkok, Thailand*** *during* ***October 30-31, 2017.***

We cordially invite all the participants who are interested in sharing their knowledge and research in the arena of Obesity and its Current Research.

Obesity Medicine 2017 anticipates more than 200 participants around the globe with thought provoking Keynote lectures, Oral Presentations and Poster Presentations. The attending delegates include Editorial Board Members of related International Journals.

This is an excellent opportunity for the delegates from Universities and Institutes to interact with the world class Scientists.

The intending participants can confirm their participation by registering for the conference along with your colleagues. Avail the delegate early bird offer.

The main theme of the conference is ***"The Current State of Obesity Solutions".***

Regards,
Obesity Medicine 2017
Operating Committee

Obesity Medicine 2017

About Us

International Journals

- *900 Open Access Journals*
- *21 Day rapid review process*
- *30000 Editorial team, 35000 Reviewers team*
- *3.5 Million readers and high visibility*
- *More than 100000* facebook fans
- *Publication immediately after acceptance*
- *Quality and quick editorial, review processing*

Key features

- *User friendly/feasible website translation of your paper to 50 world's leading languages*
- *Enhanced feature: Audio version of published paper*
- *Digital articles to share and explore*
- *Sharing option: Social networking enabled*
- *Authors, reviewers and editors are provided with scientific credits*

Conference Series LLC Conferences

- *1000 Conferences all over the World every year*
- *Well organized scientific program*
- *Renowned speakers and scientists across the globe*
- *Poster presentations and world class exhibits*
- *Panel discussions and interactive sessions*
- *B2B meetings*
- *Perfect platform for Global Networking*

Key features

- *Presentation by renowned speakers from all over the world*
- *Poster presentations and world class exhibits*
- *Interactive Sessions*
- *Platform for global networking*
- *Connecting scientific community*

Special Issues

All accepted abstracts will be published in respective Supporting International Journals

Each abstract will be provided with digital Object Identifier by crossref

Obesity Medicine 2017

Market Analysis

About obesity:

Obesity is characterized as overabundance fat tissue. There are a few distinct strategies for deciding overabundance (fat) tissue; the most well-known being the Body Mass Index (BMI). In that capacity, fat tissue secretes various items, including metabolites, cytokines, lipids, and coagulation elements among others. Essentially, abundance adiposity or heftiness causes expanded levels of circling unsaturated fats and irritation. Effective weight reduction medicines incorporate setting objectives and rolling out way of life improvements, for example, eating less calories and being physically dynamic. Pharmaceuticals and weight reduction surgery additionally are possibilities for a few people if way of life changes aren't sufficient. Thus obesity medicine 2017 bringing all the world to know the current strategies regarding the prevalence of the obesity and research work undertaken by the scientists to attain obesity free globe, through the prestigious "15th International conference on the obesity medicine" Oct 30 – Nov 01 2017 Bangkok, Thailand.

Importance and scope:

Obesity puts people at hazard for more than 30 ceaseless wellbeing conditions. . Hence this event is going to present an outstanding area of research from different countries bringing collective solutions. Obesity medicine conference is meant to anyone concerned with learning, sharing issues and experiences regarding Obesity, its related areas of Medicine & Health Care. This Obesity medicine fetches leading and experienced Metabolic and Bariatric Surgeons, Physicians, Basic and Clinical trail Research Scientists, Health care Professionals, Registered Dieticians and Diabetes Educators, Physical Therapists, Students forum, Industry Professionals, Fitness Professionals and many more.

Obesity associated disorders:

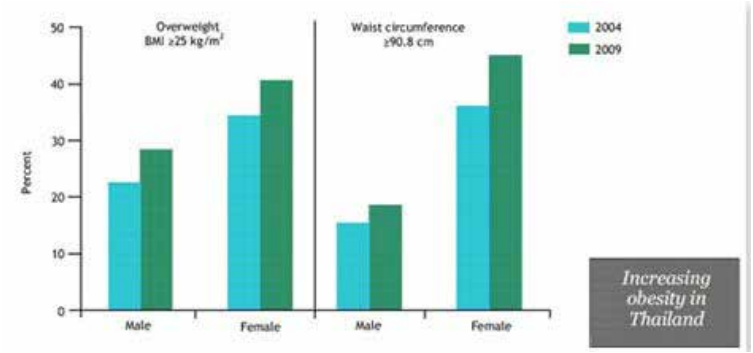

- *Type 2 diabetes*
- *Elevated cholesterol*
- *Hypertension*
- *Gallstones*
- *Coronary heart diseases*
- *Liver dysfunction*

- *Rest apnea*
- *GERD*
- *Osteoarthritis*
- *Premature deliveries*
- *Asthma, respiratory conditions, and various tumors.*

Why Bangkok?

Obesity is a condition where a man has gathered so much muscle to fat quotients that it may negatively affect their wellbeing. In this regard bodyweight is no less than 20% higher than it ought to be, he or she is viewed as corpulent. Body Mass Index (BMI) in the vicinity of 25 and 29.9 are viewed as overweight and the BMI with 30 or over the person is as fat.

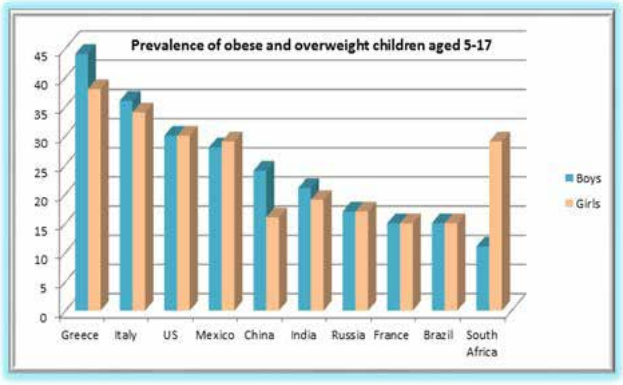

As of late, Thailand has built up a youth weight issue. Measurements from Thailand's Ministry of Public Health uncover critical increments in the rate of weight among youngsters. In the previous five years, the rate of large pre-school kids ascended from 5.8% to 7.9%; in school-age youngsters, the weight rate went from 5.8% up to 6.7% amid a similar period. Among Thailand's young grown-ups (matured in the vicinity of 20 and 29), the weight rate over a similar five-year time span expanded 36% among men, and 47% among ladies.

Obesity has achieved disturbing levels in the Asean Economic Community and particularly in Thailand, where 32 for every penny of the populace are overweight, pushing the nation into second place as far as commonness of stoutness after Malaysia at 44 for every penny and in front of Singapore at 30 for each penny. At this present rate of movement and with no incredible mediation by the general wellbeing powers, it is likely that a large portion of the Thai populace will be overweight in the coming years.

Obesity is characterized as having an overabundance extent of aggregate muscle to fat quotients. To evaluate weight, wellbeing experts usually utilize the Body Mass Index (BMI). BMI is the weight in kilograms partitioned by the square of your tallness. In the western world, the BMI test depends on WHO criteria and extents from typical (20-24.9), overweight (25-29.9) to fat (more than 30). In Asian nations, the file takes after the Regional Office for the Western Pacific (WPRO) standard. Because of the higher danger of creating stoutness related difficulties contrasted with the western populace, its cut-off point for weight status is a BMI of more prominent than or equivalent to 25?kg/m2. Therefore, Asians are overweight when the BMI is in the vicinity of 23 and 25 and corpulent when the BMI is equivalent to or over 25?kg/m2.

Conference Highlights:

- *Obesity & Associated Health Disorders*
- *Genetic Obesity*
- *Obesity and Diabetes*
- *Obesity & Cardiac Issue*
- *Childhood Obesity and Effects*
- *Obesity in women*
- *Endocrinal Obesity*
- *Thyroid and Obesity*
- *Weight-Loss Surgeries*
- *Treatment for obesity*
- *Anti obese drugs*
- *Current Research on Obesity*

Market Value of Obesity in World:

The worldwide market for hostile to Anti obesitydrugs has been growing at a huge pace lately. With the undeniable driving element being the surge in obesity levels far and wide, this market is likewise pushed by the solid pipeline of against antiobese drugs. Propelled restorative research by medication fabricating organizations, medicinal colleges and foundations, and government offices has likewise significantly contributed toward the development of the counter corpulence drugs advertise.

The Asia Pacific market for hostile to anti obesity medications are expected to pick up energy in the coming years on account of the ascent in fat populace, coming about because of expanded spending on handled and bundled sustenance's and the developing utilization of sugar-sweetened refreshments. Enhancing medicinal services framework and mounting social insurance use is additionally anticipated that would drive the market for against weight tranquilizes in APAC. There are many elements behind the quickly developing scourge in Thailand. In basic terms, there is an enormous unevenness between the promoters of sound way of life, who incorporate the Public Health Ministry, related therapeutic affiliations and a couple of excellent partners, and the star weight publicizing strengths driven for the most part by fast food organizations and some powerful media. Future heftiness patterns are exacerbated by nourishment organizations' advertisements, which deliberately focus on all age-bunches including the most persuasive people, youthful youngsters.

As the way of life in Thailand quickly changes, Thais are gone up against with another sort of torment: corpulence. Thailand is among main five Asia-Pacific countries with the most astounding quantities of corpulent individuals, and by 2015 Thailand will have an incredible 21 million individuals from a "fat tummy organize," as per the Ministry of Public Health.

About Conference

The field of Obesity and its Current Research is growing rapidly and its development is making tremendous impacts in nursing. The importance and significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various sectors.

Obesity Medicine 2017

- *Opportunity to attend the presentations delivered by eminent scientists from all over the world*
- *Selected contributions will be published in following Conference Series Ltd Journals*
    - *Journal of Obesity & Weight Loss Therapy*
    - *Journal of Nutritional Disorders & Therapy*
    - *Endocrinology & Metabolic Syndrome*
- *Participation in sessions on specific topics on which the conference is expected to achieve progress*
- *Global networking: In transferring and exchanging Ideas*
- *Share your excitement in promoting your skills in the field of designing*
- *Conference brings together Scientific Researchers, Business Entrepreneurs and Industry Developers*

Obesity Medicine 2017

About Bangkok

Bangkok is Thailand's national capital and the largest city. Bangkok is economic and cultural center and has one of the Southeast Asia's greatest ports and terminals. Most of the trade is done through port of Bangkok. There are more than 400 Buddhist temples which are called as Wats. The temple of emerald Buddha in grand palace is most famous. Bangkok is the most crowded city with temples, Industries and shops. It is the major tourist spot noted for cultural attractions. Over 14 million people (22.2 percent) live within the surrounding Bangkok Metropolitan Region, making Bangkok an extreme primate city, significantly dwarfing Thailand's other urban centres in terms of importance. There are 581 high-rise buildings in the city, ranking number 5 in the world. Bangkok traces its roots to a small trading post during the Ayutthaya Kingdom in the 15th century, which eventually grew in size and became the site of two capital cities: Thonburi in 1768 and Rattanakosin in 1782. Bangkok was at the heart of the modernization of Siam – later renamed Thailand – during the late 19th century, as the country faced pressures from the West.

The city was at the centre of Thailand's political struggles, throughout the 20th century, as the country abolished absolute monarchy, adopted constitutional rule and underwent numerous coups and several uprisings. The city grew rapidly during the 1960s through the 1980s and now exerts a significant impact among Thailand's politics, economy, education, media and modern society. The city is well known for its vibrant street life and cultural landmarks.

The historic Grand Palace and Buddhist temples including WatArun and Wat Pho stand in contrast with other tourist attractions such as the nightlife scenes of Khaosan Road and Patpong. Bangkok is among the world's top tourist destinations. It is named the most visited city in MasterCard's Global Destination Cities Index, and was named "World's Best City" for four consecutive years by Travel + Leisure magazine.
