Dear Colleagues,

On behalf of Conference Series LLC Ltd, it is my pleasure to welcome all the Physicists, Scientists, Researchers, Principle Investigators, Budding Scientists and Students who are involved in Theoretical, Materials and Condensed Matter Physics and all other related disciplines for the **5th International Conference on Theoretical, Materials and Condensed Matter Physics** scheduled on **November 26-28, 2018** in **Los Angeles, USA**. The conference is themed on ''*Innovative Encounters in the real-world of Theoretical, Materials & Condensed Matter Physics*'' and the program is designed for 3 days with Keynote sessions, Plenary talks, Oral sessions, Panel discussions, YRF sessions and Poster presentations.

Condensed Matter Physics 2018 has started its Series in the year 2015 and was successfully held in Boston, USA. All the annual series were being held in USA at various cities/locations. Our previous conferences witnessed around 100 attendees with more than 40 Oral presentations and participants represented from not less than 20 countries. The Condensed Matter Physics 2018 meeting's goal is to bring together, a multi-disciplinary group of scientists, entrepreneurs and students from all over the world to present and exchange break-through ideas relating to the Theoretical, Materials & Condensed Matter Physics. It seeks to promote top-level research and to globalize quality research in general, thus making discussions, presentations more internationally competitive and focusing attention on the recent outstanding achievements in the field of Theoretical, Materials & Condensed Matter Physics, and future trends & needs.

'Scientists are credited for the numerous advances of our civilized world in the past. It is apparent that the responsibility to support the needs of a fast growing population in the world rests squarely upon the shoulder of the scientists. Scientists are motived by curiosity. They are problem solvers and enjoy working on challenging tasks. In general, they readily communicate and share information with each other with unbiased open mind'. And here, Condensed Matter Physics 2018 will provide excellent opportunity for them to participate, benefit and enjoy the good weather in California.

Welcome to Condensed Matter Physics 2018 Los Angles Meet.

Yours sincerely,

Prof. Chi Yu Hu
California State University, USA
