ABOUT CONFERENCE

As Organic Farming 2023 Organizing Committee, we enjoy extraordinary welcoming all members from around the world to go to the “2nd International Conference on Agroecology and Organic farming” to be held from October 25-26 Montreal, Canada, on the topic “Exploring the Future Advancements in the field of Agricultural Sciences”. The features of this gathering include ongoing research on innovations and methods, reasonable horticulture and coordinated agribusiness, crop improvements, the most recent developments in soil and plant science, horticulture, and organic farming. Introduce people, disperse knowledge, promote organization with present and incoming qualified pros, and stir up a commotion with the most recent advancements and gratitude for participating in this second day opportunity.

Market analysis:

Traditional farming techniques based on naturally occurring biological processes are combined with modern technology and ecological science in productive agriculture and organic farming approaches. Recent advancements in fertilizers’, chemicals, and seeds have made it possible for agricultural producers to keep up with the world’s population’s expanding demand for food.

Venue

Montréal is the largest city in Canada’s Québec province. It’s set on an island in the Saint Lawrence River and named after Mt. Royal, the triple-peaked hill at its heart. Its boroughs, many of which were once independent cities, include neighborhoods ranging from cobblestoned, French colonial Vieux-Montréal – with the Gothic Revival Notre-Dame Basilica at its Centre – to bohemian Plateau. Montreal, French Montréal, city, Quebec province, southeastern Canada. Montreal is the second most-populous city in Canada and the principal metropolis of the province of Quebec.
