- ☞ Abstracts have to be submitted through online or by email. Shortlisted abstracts for the competition will be intimated through email and those will be displayed on the website as well.

ABOUT VENUE

As the capital city of the United Arab Emirates, the city of Abu Dhabi is the location of the United Arab Emirates Government, and home to the legendary Al Nahyan family. The city of Arabian nights has a desert climate and its economy is based mainly on its oil deposits. Urbanisation and oil discovery has resulted in the conversion of a traditional Arabic city into a buzzing international hub in which major architectural wonders have been created, and which are of great interest to the tourists and travellers from all over the globe. Abu Dhabi is the place where you can enjoy the ultimate luxury along with the sun and sand. The city occupies most of a small triangular island of the same name, just off the Persian Gulf coast and connected to the mainland by a short bridge. Abu Dhabi was formerly an undeveloped town of only local importance, but the emirate's oil revenues enabled it to evolve into a modern city with a fully developed infrastructure.

A city once known for its exhaustive coverage of conventions and exhibitions has gained importance for entertainment and shopping as well. Various areas and islands in Abu Dhabi are developed to promote tourism that includes the Corniche, the Yas Island and the Saadiyat Island, which allow visitors to explore the stunning Arabian Gulf views and wildlife reserves. Abu Dhabi like its sister city Amsterdam, has an interesting collection of some really fun nightclubs, entertaining bars and live music venues. They also have multi-cuisine restaurants that serve everything from Indian, European, continental varieties in beautiful settings. To provide in-depth information on the various things to-do in Abu Dhabi, take a look at our exclusive list of attractions, shopping, activities and nightlife. Abu Dhabi is known in the region for its greenery; the former desert strip today includes numerous parks and gardens. The design of the inner city roads and main roads are quite organized. Starting from the Corniche, all horizontal streets are oddly numbered, while all vertical streets are evenly numbered. Today, the city's population far surpasses the original estimated maximum population when it was designed. This causes traffic congestion, a shortage of car parking spaces, and overcrowding.
