PHARMA MIDDLE EAST 2018

Market Analysis

18th Annual Pharma Middle East Congress cordially invites presenters, exhibitors, students and Honourable guests and delegates around the globe to Abu Dhabi, United Arab Emirates during November 05-07, 2018. The organizing committee took the opportunity to conduct the most useful and informative professionals meeting with major categories of Pharmaceutical Sciences as highlights, keynote presentations by expertise speakers, poster presentations, Workshops, exhibition centres and also included the young researchers forum category for scholars and post-graduates.

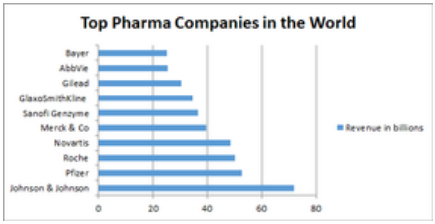

Role of Pharma in World:

Pharma companies have always interacted with consumers. They have marketed directly to users, especially in the U.S., and they involve patients in clinical trials. They thus have some limited experience with consumer-facing business models. In this new era, pharma companies will have to become more proactive with large communities of patients and go beyond lip service in meeting the needs of a wide swath of consumers.
