20th International Conference on

Pediatrics & Primary Care

September 03-04, 2018
Zurich, Switzerland

SCIENTIFIC PROGRAM

Keynote Forum

Congenital Muscular Torticollis: Implementation of Clinical Practice Guideline and Reliability of the Severity Classification System
Magda M. Oledzka, Hospital for Special Surgery, USA

Dexmedetomidine a novel sedative for the pediatric population
Lisgelia Santana, Nemours Research, USA

Neonatal Arterial Hypertension: What to do about it?
Amelie Stritzke, University of Calgary, Canada

The Challenges to the pediatrician as a Public Health Advocate: Reviewing the National Academies of Science, Engineering and Medicine Report "preventing bullying through Science, Policy and Practice."
Matthew G Masiello, University of Massachusetts Memorial Children's Medical Center, USA

Red Flags – Small wounds and catastrophical consequences
Stefan Holland-Cunz, University Hospital of Basel, Switzerland

The developing lung: Morphological and functional features in the context of gas exchange, immune function, metabolic properties and exogenous noxae
Geertje Lewin, Lewin Tox Consulting, Germany

Keynote/Speaker slots available

Featured Speakers

Mild traumatic brain injury affects sleep macrostructure in children: a polysomnographic study
Marco Carotenuto, University of Campania Luigi Vanvitelli, Italy

Patient Engagement: Teenagers Involvement
Lucia Celesti, Bambino Gesù Children's Hospital, Italy

Prevalence of neurodevelopmental, behavioral and learning disorders in Pediatric Primary Care
Marta Carballal Mariño, AGAPap, Spain

Procedural Sedation for paediatric patients. Where are we now? Our Experience
Mazen Alexan SHASHA, Rotorua Public Hospital, New Zealand

Ethical issues in Regenerative approaches in Neonatology
Hernan Villalon-Urrutia, Universidad Catolica del Norte. La Serena. Chile

Sleep: "Why should I go early to bed?"
Jessica Deborah Arditi, University of Athens, Greeece

Laparoscopic cholecystectomy in children: One centre experience
Paweł Nachulewicz, Medical University of Lublin, Poland

Integrating host genetic variants in clinical prediction rule for hearing loss after childhood bacterial meningitis: a model renewing study
O El Tahir, VU University Medical Center, The Netherlands

Keynote/Speaker slots available

Infant oral health related to frequency in a public early preventive dental care
Rise Rank, UNIRG University Center, Brazil

Acral-accentuated exanthem in an infant with Parechovirus meningitis

Lee Meijuan Dawn, KK Women's and Children's Hospital, Singapore

Intra-abdominal Kikuchi Disease Mimicking Malignant Lymphoma in an Adolescent: A Case Report
In seok Lim & Kyu seok Shim, Chung-Ang University Hospital, South Korea

A study of associations among attachment patterns, maltreatment, and behavior problems in institutionalized children in Japan
Emiko Katsurada, Kwansei Gakuin University, Japan

Urinary excretion of SMPDL3b in pediatric glomerular diseases
Shojiro Watanabe, Hirosaki University, Japan

Featured Speakers

Effect of the use of pacifier in the anterior open bite at 2 years of age
Hernan Villalon-Urrutia, Universidad Catolica del Norte. La Serena.,Chile

Motivational reasons behind the use of pacifier/dummy in mothers of 24 months of age infants
Javiera Rosenberg-Pacareu, Universidad Catolica del Norte. La Serena,Chile

Contribution of Influenza A towards severe respiratory infections: A need for flu vaccination, evidence from Odisha, India
B. Dwibedi, ICMR-RMRC, India

Clinical approach to treatable congenital metabolic disorders
Angel Rios, Albany Medical Center, USA

Systematic approach to diagnosis and treatment of pediatric dystonia
Giovanna Zorzi, Neurological Institute Carlo Besta, Italy

Normal sweat chloride test does not rule out cystic fibrosis
Abdurrahman Erdem Başaran, Akdeniz University, Turkey

Knowledge and attitudes of pediatric nurses regarding pain management in Palestinian Bank hospitals in west
Ahmad Bajjali, Al Quds University School of Nursing, Israel

Foreign body punctured the spleen: An incidental diagnosis
Gizem Inal-Aslan, Baskent University, Turkey

Speaker & Keynote Slots Available

Pediatric palliative care in negro-cultural society: Ethnanalysis of child Diseases
Léopold Molel Belika, University of Yaounde, Cameroon

Today´s medical self and the other: Challenges and evolving solutions for enhanced humanization and quality of care
Nelly F. Altamirano-Bustamante, Instituto Nacional de Pediatría, Mexico

The role of streptococcus in the formation of clinical pictures of infectious mononucleosis in children
Guz E.V. , Kharkov National Medical University, Ukraine

Socio-demographic factors and the prevalence of burns in children: an overview of the literature
Khalid Alnababtah, Cardiff university, UK

Speech Outcomes in Australian Children with Cleft Palate
Antonia Margarita Chacon, The University of Sydney, Australia

Hypertension Evaluation and Management in Children
Ahmad Wattad, East Tennessee State University, USA

Acute pneumonia:a new look at the old problem
Igor Klepikov, USA

Featured Speakers

Telencephalic Flexure and Malformations of the Lateral Cerebral (Sylvian) Fissure
Harvey B. Sarnat, University of Calgary, Canada

Outbreak of Bordetella pertussis and holmesii in Mexicali, Baja California, México.
Franco Esquivel Teresa, Institute of Public Health Services, Mexico

Why is Paediatrics facing a crisis in recruitment: reflections on teaching and recruiting junior doctors in the UK
Erin Butterworth, Queens Hospital, UK

Best Practices and Practical Strategies for Assessment and Diagnosis of Autism
Bee Hong Lo, Children's Hospital Westmead , Australia

Aortopulmonary window in An Infant with Type I Osteogenesis Imperfecta: Case Report
Vaneesa Arnet, Brazil

Hyperacusis in Children: A clinical classification
Veronica Kennedy, Royal Bolton Hospital, UK

Iatrogenic diaphragmatic hernia in infants: Potentially catastrophic when overlooked
Edmund Kessler, Weill Cornell Medical Center, USA

Speaker & Keynote Slots Available

Current strategies in the management of heart failure in children
Ching Kit Chen, MD, National University of Singapore

Epidemiological, clinical and evolutionary profile of hyaline membrane disease in full term new born
Ben Salem H, NICU Military Hospital of Tunis, Tunisia

Rotavirus is the leading cause of hospitalizations for severe acute gastroenteritis among Afghan children <5 years old
Palwasha Anwari, Afghanistan National Immunization Technical Advisory Group, Afghanistan

Virtual Reality (VR) Technology in the Absence of General Anaesthesia during Radiotherapy Procedure for Paediatric Oncology Patients
Faisal Ashour, King Saud bin Abdulaziz University for Health Sciences, KSA

The frequency of inherited metabolic and endocrine disorders in the eastern and north-western Jawf provinces of Saudi Arabia: Four years data from the newborn screening department, Ministry of Health, Dammam
Randa Alratrout, Regional Laboratory and Blood Bank, KSA

Association of breastfeeding practices and selected clinical outcomes of patients aged 3 months to 2 years old diagnosed with PCAP C in a tertiary Government Hospital in Manila from January 2013-January 2016
Charisse B. Pulmano, Ospital ng Maynila Medical Center, Philippines

Suffering among mothers with low birth weight infant at sick newborn care unit
Natchanan Chivanon, Burapha University, Thailand

A pilot study on the effectiveness of basic emergency obstetric and newborn care (BEmONC) training done at a tertiary hospital in Philippines from January 2015 to December 2016
Azenith L. Tammang, Tertiary Hospital, Philippines

Poster Presentations

Effect of neonatal position during phototherapy in reducing bilirubin serum: An evidence-based case

report
Muhamad Shafiq Advani, University of Indonesia, Indonesia

Attitudes and behaviours of pediatric residents towards care for underserved children in a tertiary government hospital
Paul Lawrence C. Filomeno, University of the Philippines Diliman, Philippines

Paediatric surgical care in Ghana: The case of oesophageal atresia
Samuel Osei-Nketiah, University Of Ghana School Of Medicine and Dentistry, Ghana

Maternal risk factors associated with retinopathy of Prematurity among patients in east avenue medical center from
2010 to 2015
Ida Fidelis Denosta, East Avenue Medical Center, Quezon City, Philippines

Knowledge and attitudes of pediatric nurses regarding pain management in Palestinian hospitals in West Bank
Ahmad Bajjali, Al Quds University School of Nursing, Jerusalem, Palestine

Prevalence of pediatric metabolic syndrome and associated risk factors among school age children of 10-16 years living at high altitude region of Himachal Pradesh, India
Aakriti Gupta, All India Institute of Medical Sciences New Delhi, India

Pediatric palliative care in negro-cultural society: Ethnanalysis of child Diseases
Léopold Molel Belika, South Africa

Poster presentations available

Maternal Sickness and Neural Tube Defects: A Study in the North Indian Population
Roumi Deb, Amity University Uttar Pradesh, India

Blood Lead Level in Children of Kolkata
Kakali Roy, All India Institute of Medical Sciences, India

The Effect of the Family-Centered Empowerment Model (FCEM) on Perceived Life Situation of the Parents of Children with Cancer
Mahnaz Shoghi, University of medical Sciences, faculty of nursing and midwifery, Iran

Particularities of the acute respiratory distress syndrome at pediatric ages
Valentín Santiago Rodríguez Moya, INHEM, Cuba

Risk factors for SIDS
Salman Elgharbawy, Egypt

YRF slots available

Note: **Please note that this is a Preliminary Version of the Scientific Program for the Pediatrics & Primary Care 2018 designed with the projected speakers names and titles. The final program may still subject to change.

Pediatrics & Primary Care

SEPTEMBER 03-04, 2018 ZURICH, SWITZERLAND

AGENDA

Title: Congenital Muscular Torticollis: Implementation of Clinical Practice Guideline and Reliability of the Severity Classification System

Magda M. Oledzka, Hospital for Special Surgery, USA

Magda Oledzka, PT, DPT, MBA, PCS, c/NDT is the Director of the Pediatric Rehabilitation at Hospital for Special Surgery in New York City. Magda graduated from the physical therapy program at Hunter College in 1998 and received an MBA in healthcare administration at Baruch College in 2008; currently she is a doctoral candidate at Rocky Mountain University of Health Professions with her primary research focus on Congenital Muscular Torticollis. Magda is board certified by the American Physical Therapy Association as a Pediatric Clinical Specialist and is trained in Neuro-Developmental Treatment (NDT) in the management and care of children with cerebral palsy and other neuromotor disorders. She often lectures on topics related to infants and cerebral palsy.

Title: Dexmedetomidine a novel sedative for the pediatric population

Lisgelia Santana, Nemours Research, USA

Dr. Lisgelia Santana is a specialist in pediatric anesthesia and pain management. She trained in Boston Children's Hospital. She is currently Director of Acute and Chronic pain management at Nemours Children's Hospital in Florida, USA and is the Director of Medical Student Anesthesia Rotation and Research from the University of Central Florida, College of Medicine. She is passioned about teaching new generation of students interested in Pediatrics. Her research model of dexmedetomidine as a new medication, can improve sedation not only in the operating room but also in the Urgent cares, radiology room, intensive care units and Emergency Room, and others.

Title : Percutaneous technique versus surgical techniques for tracheostomy

Amelie Stritzke, University of Calgary, Canada

Amelie Stritzke is an assistant professor, clinical neonatologist and lecturer with the Cummings School of Medicine at the University of Calgary, Alberta, in Canada. She graduated from Frankfurt/M, Germany, and spent her pediatric residency in Switzerland (Aarau and Berne). After fellowship and additional pediatric cardiology training in neonatal echocardiography, her primary educational and research interest is in cardiovascular neonatology and perfusion. She is currently involved with investigating perfusion patterns of intestinal blood flow after red blood cell transfusion and impact of maternal biologics on neonatal outcomes, as well as with teaching point of care ultrasound skills to neonatal practitioners. Renal consequences of preterm birth and their implications is another interest which she recently published a review paper on.

SPEAKER SLOTS AVAILABLE

Title: The Challenges to the pediatrician as a Public Health Advocate: Reviewing the National Academies of Science, Engineering and Medicine Report "preventing bullying through Science, Policy and Practice."

Matthew G Masiello, University of Massachusetts Memorial Children's Medical Center, USA

Dr. Masiello is a Clinical Professor of Pediatrics at the University of Massachusetts Medical Center, Worcester, Massachusetts. He serves on the Executive Board of the Massachusetts Chapter of the American Academy of Pediatrics. His MPH is from George Washington University School of Public Health and Health Services. Dr Masiello served as editor of The Public Health Approach to Bullying Prevention, published by The American Public Health Association. Dr. Masiello has served on a National Academies of Science committee to address the biological and psychological effects of peer victimization. The report, Preventing Bullying: Through Science, Policy and Practice,

Title: Red Flags – Small wounds and catastrophical consequences.

Stefan Holland-Cunz, University Hospital of Basel, Switzerland

Stefan Holland-Cunz is the head of the department Pediatric Surgery, University Hospital of both Basel. He is experted in Visceral and neonatal Surgery as well as in Pediatric Trauma care. New wound therapy concepts are often evaluated and new approaches are developed at the unit and emergency unit at the University Hospital of both Basel.

Title: The developing lung: Morphological and functional features in the context of gas exchange, immune function, metabolic properties and exogenous noxae

Geertje Lewin, Lewin Tox Consulting, Germany

Born at the lovely Southern coast of the Baltic Sea, Geertje Lewin studied biology in the US and Germany with an ongoing passion for physiology and toxicology. After working as an eco-toxicologist for several years, she went back into academia to achieve her PhD at the toxicology department of an university hospital. Later, at the Fraunhofer Institute for Toxicology and Experimental Medicine, Geertje entered the world of reproductive toxicology as a study director and risk assessor. This field where toxicology, teratology, drug development and health care overlap, has fascinated her ever since. Starting in 2014,

SPEAKER SLOTS AVAILABLE

Title: Mild traumatic brain injury affects sleep macrostructure in children: a polysomnographic study

Marco Carotenuto, University of Campania Luigi Vanvitelli, Italy

Marco Carotenuto was born on 16 February 1974. Degree in Medicine and Surgery in 2000 and Specialist degree in Child Adolescent Neuropsychiatry in 2005. In 2008 finished the Doctorate in Behavioural and Learning disorders Sciences. From 2008 to 2011 Junior Researcher and from 2011 to 2017 Senior Researcher in Child and Adolescent Neuropsychiatry at University della Campania "Luigi Vanvitelli". In December 2017 became Associate Professor. The main fields of interest and research are the following: child neurology, pediatric sleep disorders, polysomnography, pediatric primary headaches, and pediatric rehabilitation.

Title: Patient Engagement: Teenagers Involvement

Lucia Celesti, Bambino Gesù Children's Hospital, Italy

Lucia Celesti, of Swiss and Italian nationality, has completed her studies of Medecine in Rome, in 'La Sapienza University'in 1983, at the age of 24 and is a Specialist in Pediatrics and Hygiene. She is the director of Family Services in Bambino Gesù Children's Hospital in Rome, Italy. She has published more than 25 papers in reputed journals and three books on Children's rights and relational and social issues in Pediatrics.

Title: Prevalence of neurodevelopmental, behavioral and learning disorders in Pediatric Primary Care

Marta Carballal Mariño, AGAPap, Spain

Marta Carballal Mariño has her expertise in primary care pediatrics and passion in improving the health and wellbeing. Psiquiatric Workshop of the Primary Care Peadiatrics Galician Association (AGAPap) in Spain, has the aim to improve knolegwe about these disorders and to give primary care pediatricians skills in diagnosis and treatment of these conditions. In this group participate two psiquiatrics and nine primary care pediatricians. This work shows how often these conditions are found in our enviroment, from the pont of view of the primary care pediatrician. There are few studies in this field, although it´s a frecuent demand, growing as infectious diseases decline with improving vaccination programs. They should be our future preventive aim.

SPEAKER SLOTS AVAILABLE

Title: Procedural Sedation for paediatric patients. Where are we now? Our Experience

Mazen Alexan SHASHA, Rotorua Public Hospital, New Zealand

Mazen has been working as an Emergency Physician for the past for the past 18 years. Been the Head of the Emergency Department in Rotorua for about 10 years. He supervise the medical student through their ED Run. Love his ED Gadgets and procedures

Title: Ethical issues in Regenerative approaches in Neonatology

Hernan Villalon-Urrutia, Universidad Catolica del Norte. La Serena. Chile

Hernan Villalon-Urrutia working as a Physician. NICU. Clinica Las Condes. Santiago de Chile and Prof. of Paediatrics. Universidad de Chile.

Title: Sleep: "Why should I go early to bed?"

Jessica Deborah Arditi, University of Athens, Greeece

Jessica Arditi is a pediatric endocrinologist who currently works in her private practice in Athens, Greece. She grew up in Switzerland where she obtained her MD, medical thesis, pediatric subspecialty and passed her diploma in pediatric endocrinology.In Athens she has worked more than 10 years in the Division of Endocrinology, Metabolism and Diabetes, of the 1st Dept of Pediatrics, University of Athens, Aghia Sophia Children's Hospital directed by Professor G. Chrousos. She continues to work as a scientific associate of the Division.

SPEAKER SLOTS AVAILABLE

Title: Laparoscopic cholecystectomy in children: One centre experience

Paweł Nachulewicz
Medical University of Lublin, Poland

Professor Paweł Nachulewicz- pediatric surgeon, transplant surgeon, general surgeon. Since 2010 the Chief of Pediatric Surgical Clinic, Medical University of Lublin, Poland. From 1998 focused in laparoscopic and thoracoscopic surgery in children. The author or co-author of more than 190 publications, congress reports, and books chapters.

Title: Integrating host genetic variants in clinical prediction rule for hearing loss after childhood bacterial meningitis s: a model renewing study

O El Tahir, VU University Medical Center, The Netherlands

Omaima El Tahir graduated from a Bachelor in Biomedical Sciences and a master in Medicine. She has her expertise in the role of host genetic variants in susceptibility, severity and outcome of childhood bacterial meningitis, aiming to create prediction tools for complications of bacterial meningitis integrating both clinical and genetic biomarkers. Because is still a life-threatening infectious disease she also aims to provide more insight into the possible very long-term sequelae which could have a significant impact on subsequent health state of childhood BM survivors during young adult life.

SPEAKER SLOTS AVAILABLE

Title: Infant oral health related to frequency in a public early preventive dental care

Rise Rank, UNIRG University Center, Brazil

Rise Rank has developed and implemented the Baby's Mouth Program (Programa Boquinha do Bebê), since 2010. Rise has experience in researches regarding infant behavior and early oral health promotion. More than a dentist that works both in particular clinic and public schools, she is also a college professor that focus her lectures on health promotion and develop her classes by forming student teams to work with various activities in an interdisciplinary way. Aways seeking for models of innovation to promote health, such as new devices to assist and improve children's dental treatment

Title: Acral-accentuated exanthem in an infant with Parechovirus meningitis

Lee Meijuan Dawn, KK Women's and Children's Hospital, Singapore

Dr Dawn Lee has completed her PhD at the age of 23 years from National University of Singapore, School of medicine. She has spent her post-graduate years rotating through various specialities in tertiary hospitals in Singapore and has obtained pediatric specialist accreditation in year 2015. She is a general paediatrician at KK Women's and Children's Hospital in Singapore, and participates actively in research publications as well as teaching activities of medical

Title: Intra-abdominal Kikuchi Disease Mimicking Malignant Lymphoma in an Adolescent: A Case Report

In seok Lim & Kyu seok Shim, Chung-Ang University Hospital, South Korea

In seok Lim & Kyu seok Shim working as a professor in the department of pediatrics at University Hospital, South Korea

SPEAKER SLOTS AVAILABLE

Title: A study of associations among attachment patterns, maltreatment, and behaviour problems in institutionalized children in Japan

Emiko Katsurada, Kwansei Gakuin University, Japan

Emiko Katsurada is an expert in child development with an emphasis in attachment and gender. She conducts research on the relationship between a child's attachment and social development. Her recent studies on attachment focus on institutionalized children, many of who have maltreatment history. In the field of research on gender, she and her co-researcher developed the Japanese Gender Role Index (JGRI), an assessment masculine and feminine personality traits of Japanese people.

Title: Urinary excretion of SMPDL3b in pediatric glomerular diseases

Shojiro Watanabe, Hirosaki University, Japan

Shojiro Watanabe(MD, PhD) is a Pediatric Nephrologist working at Hirosaki University Hospital. He is interested in building up new, noninvasive biomarker to distinguish drug sensitivity of nephrotic syndrome. He has started research on SMPDL3b from 2015 and presented preliminary first data in 2017.

Title: Effect of the use of pacifier in the anterior open bite at 2 years of age

Hernan Villalon-Urrutia, Universidad Catolica del Norte. La Serena, Chile

Hernan Villalon-Urrutia working as a Physician. NICU. Clinica Las Condes. Santiago de Chile and Prof. of Paediatrics. Universidad de Chile.

SPEAKER SLOTS AVAILABLE

Title: Motivational reasons behind the use of pacifier/dummy in mothers of 24 months of age infants

Javiera Rosenberg-Pacareu, Universidad Catolica del Norte. La Serena, Chile

Javiera Rosenberg- Pacareu has completed with maximum distinction her undergraduate studies on Psychology at the Pontifical Catholic University of Chile on 2017. She recently finished a Multivariate Analysis postgraduate Diploma at Universidad de Chile and is currently researching at the Medical School of Catholic University and at Clínica Las Condes. Chief of Preterm Infants Follow-up Program in Clinica Las Condes, Santiago de Chile. Along with that, she is the Chief Project Manager of Foundation Crece Sano, a non-profit organization aimed to improve the children's development and wellbeing through training opportunities for health professionals and educators working at remote locations of the country

Title: Contribution of Influenza A towards severe respiratory infections: A need for flu vaccination, evidence from Odisha, India

B. Dwibedi, ICMR-RMRC, India

Dr. B. Dwibedi, MD, Pediatrics working as a Medical Scientist at ICMR-RMRC, Bhubaneswar, having 15 years of research experience in the area of Clinical, Molecular Virology and Clinical trials in tropical diseases. Also, he is the Nodal Officer of Model Rural Health Research Unit and Viral Research and Diagnostic Laboratory, Department of Health Research, MoH&FW, India. He received national award from ICMR and nominated as a Member of National Academy of Medical Science for excellency in tropical disease research. He demonstrated alternate regimen for elimination of lymphatic filariasis and has given the first evidence of sub-clinical lymphatic pathology in children with W.bancrofti infection and its reversal with MDA drugs.

Title: Clinical approach to treatable congenital metabolic disorders

Angel Rios, Albany Medical Center, USA

Angel Rios completed his neonatal-perinatal fellowship at the Albert Einstein College of Medicine-Montefiore Medical Center in 1992. He stayed as faculty and served as associate director of neonatology. In 1999 he moved to the Bernard and Millie Duker Children's Hospital at the Albany Medical Center in Albany New York. Dr. Rios is Professor of Pediatrics and Director of Neonatology. He is also on the executive committee of the American Academy of Pediatrics the Section on Neonatal-Perinatal Medicine. He has authored chapters in Neonatology for Primary Care and American Academy of Pediatrics Textbook of Pediatric Care.

SPEAKER SLOTS AVAILABLE

Title: Systematic approach to diagnosis and treatment of pediatric dystonia

Giovanna Zorzi, Neurological Institute Carlo Besta, Italy

Giovanna Zorzi is a full time medical doctor at the Neurological Institute Carlo Besta of Milano. She has worked since more than 20 years in the field of pediatric movement disorder. She has great experience in the diagnosis and treatment of genetic and metabolic dystonias of pediatric onset; with particular interest in neurodegenerative conditions and innovative experimental trials

Title: Normal sweat chloride test does not rule out cystic fibrosis

Abdurrahman Erdem Başaran, Akdeniz University, Turkey

Abdurrahman Erdem Başaran graduated from Hacettepe University Faculty of Medicine at the age of 25. He received pediatric expertise from Akdeniz University in 2014. He is working at Akdeniz University pediatric pulmonology department now. He is specialized in follow-up and treatment of cystic fibrosis.

Title: Knowledge and attitudes of pediatric nurses regarding pain management in Palestinian Bank hospitals in west

Ahmad Bajjali, Al Quds University School of Nursing, Israel

Mr. Bajjali recently has completed his MSc in pediatric nursing at the age of 25 years from Al Quds University School of nursing. He had 3 years' experience in pediatric field, currently he works as registered nurse at pediatric cardiac surgery ICU at Al Makassed Hospital in Jerusalem. He is interested in research field and this is first study that will be published

SPEAKER SLOTS AVAILABLE

Title: Foreign body punctured the spleen: An incidental diagnosis

Gizem Inal-Aslan, Baskent University, Turkey

I am a pediatric surgeon in Turkey. I have completed my pediatric surgery fellowship in Ankara Baskent University School of Medicine 3 years ago. I have been working as a pediatric surgery specialist for 3 years. I have visited Cincinnati Children's Hospital Alberto Pena Colorectal Center for 3 months as an observer surgeon. I have "Basic Endoscopic Surgery", "Neonatal Surgery" and "Animal Practice and Ethics Course" certifications. My publications are; The effect of intraperitoneal n-acetylcysteine on postoperative adhesions in rat models (Original Article) Aslan GI, Otgun I, Acer T, Tepeoglu M, Hicsonmez A. Ann Ital Chir. 2017;88:258-262, Foreign Body Punctured the Spleen:

Title: Pediatric palliative care in negro-cultural society: Ethnanalysis of child Diseases

Léopold Molel Belika, University of Yaounde, Cameroon

Leopold is working as a assistant professor in Department d'Anthropologie at Université de Yaoundé, Cameroon

Title: Today´s medical self and the other: Challenges and evolving solutions for enhanced humanization and quality of care

Nelly F. Altamirano-Bustamante, Instituto Nacional de Pediatric, Mexico

Nelly F. Altamirano-Bustamante is Pediatric endocrinologist with PhD studies in Bioethics. She has published more than 20 papers in reputed journals and 4 books of Bioethics

SPEAKER SLOTS AVAILABLE

Title: The role of streptococcus in the formation of clinical pictures of infectious mononucleosis in children

Guz E.V. , Kharkov National Medical University, Ukraine

Guz Olena PhD student of the Department of Children's Infectious Diseases of Kharkov national medical university, Kharkov, Ukraine. I have clinical practice in the inflectional hospital for children during four years. I study the problem of children's infection mononucleosis. It is the topic of my scientific work.

Title: Socio-demographic factors and the prevalence of burns in children: an overview of the literature

Khalid Alnababtah, Cardiff University, UK

I am an academic lecturer at Cardiff University, Biomedical collage, Healthcare School. I have a responsibility in teaching subjects such as Anatomy and physiology, Paediatrics and research Skills. My research field is in Paediatrics burns and public health. I have a passion in improving the health and wellbeing. I have built my understanding of burns in children after years of experience in evaluation, research, and teaching both in hospital and education institutions. I was working as a Theatre Manager in a burns operating theatre in one of the specialised Children's Hospital. I noticed that lots of children suffered accidental burn injuries and the reason for that was not fully recognised by the medical team or the health care policy advisors. I have carried out lots of research about the subject to find out what has been published and whether there was a gap in the research that requires more investigation.

Title: Speech Outcomes in Australian Children with Cleft Palate

Antonia Margarita Chacon, the University of Sydney, Australia

Antonia completed her undergraduate honours degree in Speech Pathology at The University of Sydney in 2016. She achieved Class 1 Honours and The University of Sydney Medal for her honours project, entitled '*Australian Children with Cleft Palate achieve age-appropriate speech by 5 years of age*'. She is currently working as a Speech Pathologist in Sydney, Australia.

SPEAKER SLOTS AVAILABLE

Title: Hypertension Evaluation and Management in Children

Ahmad Wattad, East Tennessee State University, USA

Dr. Ahmad Wattad is a pediatric nephrologist in Johnson City, Tennessee. He received his medical degree from University of Padua College of Medicine and has been in practice for more than 20 years.

Title: Acute pneumonia:a new look at the old problem

Igor Klepikov, USA

Igor Klepikov worked as Pediatric surgeon in Russian State Institute for Post-graduate Medical Studies Novokuznetsk (Russia) and in Tel-Aviv Medical University. He is now working as professor

Title: Telencephalic Flexure and Malformations of the Lateral Cerebral (Sylvian) Fissure

Harvey B. Sarnat, University of Calgary, Canada

Harvey B. Sarnat is Professor of Paediatrics, Pathology (Neuropathology) and Clinical Neurosciences at the University of Calgary and Alberta Children's Hospital in Calgary, Canada since 1981, except for a decade in which he returned to the U.S. to serve on faculty at the University of Washington (Seattle) and later UCLA (Los Angeles). He began his career at the University of Illinois, earning a B.S. degree in zoology before entering the U. of I. College of Medicine, Chicago, in a dual programme, earning an M.S. degree in neuroanatomy a year before his M.D. degree in 1966.

SPEAKER SLOTS AVAILABLE

Title: Outbreak of Bordetella pertussis and holmesii in Mexicali, Baja California, México.

Franco Esquivel Teresa, Institute of Public Health Services, Mexico

Franco Esquivel Teresa is working as a faculty member in Institute of Public Health Services, Mexico

Title: Why is Paediatrics facing a crisis in recruitment: reflections on teaching and

Erin Butterworth, Queens Hospital, UK

Erin Butterworth is a junior paediatric trainee in London, England. She is passionate about teaching and has set up several national teaching projects to engage junior doctors with pediatrics and recruit them into the specialty. She is interested especially in the use of simulation training in helping prepare students for high stress situations, and also in interview preparation. She studied medicine at Barts and the London in East London, and previously did a degree in Biology at Oxford University, specializing in infectious disease and cell and developmental biology. Her current research interests are therefore split between education and infectious disease

Title: Best Practices and Practical Strategies for Assessment and Diagnosis of Autism

Bee Hong Lo, Children's Hospital Westmead, Australia

Dr Bee Hong Lo is a developmental paediatrician and currently a VMO at Parramatta Early Childhood Assessment Team (PECAT) of Children's Hospital Westmead (CHW). She is also a co-supervisor for the advance trainees of RACP in their Community Child Health placement at PECAT and honorary lecturer for the DCH/IPPC (Diploma Child Health, International Postgraduate Paediatric) of SCHN (Sydney Children Hospital Network)

SPEAKER SLOTS AVAILABLE

Title: Hyperacusis in Children: A clinical classification

Veronica Kennedy, Royal Bolton Hospital, UK

Dr Veronica Kennedy is a Consultant Audiovestibular Physician working within a paediatric audiology setting. She was a key figure in the development of first published Good Practice Guidance on the management of tinnitus in children and the development of a series of resources to support a child with tinnitus. She is keen to develop similar guidance for children with hyperacusis and is currently part of a national steering group looking at identifying research priorities in hyperacusis.

Title: Aortopulmonary window in An Infant with Type I Osteogenesis Imperfecta: Case Report

Vaneesa Arnet, Brazil

Vanessa Arnet working in Perinatal Maternity, department at Barra Da Tijuca, Rio De Janeiro, RJ, Brazil

Title: Iatrogenic diaphragmatic hernia in infants: Potentially catastrophic when overlooked

Edmund Kessler, Weill Cornell Medical Center, USA

Dr. Edmund Kessler is a Attending Pediatric Surgeon at a number of New York City hospitals and is Associate Clinical practice is limited to the surgery of infants, children and adolescents.

Dr. Kessler received his M.B.B.Ch., General and Pediatric Surgery training from the University of the Witwatersrand in Johannesburg, South Africa. Dr. Kessler was Visiting Fellow at the Hospital for Sick Children in London. He was Lecturer in Anatomy, and was a Consulting Surgeon and Senior Lecturer in Surgery at the University of the Witwatersrand.

SPEAKER SLOTS AVAILABLE

Title: Current strategies in the management of heart failure in children

Ching Kit Chen, National University of Singapore

Chen Ching Kit is currently an Assistant Professor of Pediatrics at the National University of Singapore, and a Senior Consultant at the Division of Cardiology, Department of Pediatrics of National University Hospital in Singapore. Dr Chen, specializing in pediatric cardiology, completed a fellowship in pediatric heart failure and heart transplantation at the Hospital for Sick Children in Toronto, Canada.

Title: Epidemiological, clinical and evolutionary profile of hyaline membrane disease in full term new born

Ben Salem H, NICU Military Hospital of Tunis, Tunisia

Ben Salem H is working in Military Hospital of Tunis, Tunisia

Title: Rotavirus is the leading cause of hospitalizations for severe acute gastroenteritis among Afghan children <5 years old

Palwasha Anwari, Afghanistan National Immunization Technical Advisory Group, Afghanistan

Palwasha Anwari is working in Afghanistan National Immunization Technical Advisory Group, Afghanistan

SPEAKER SLOTS AVAILABLE

conferenceseries.com

Biography

Title: The frequency of inherited metabolic and endocrine disorders in the eastern and north-western Jawf

Randa Alratrout,
Regional Laboratory and Blood Bank, KSA

Dr. Randa Ratrout, Consultant Chemical Pathologist, MBBS, King Saud University Fellow. I was working in Riyadh Regional Lab & Blood Bank as an assistance head of Biochemistry department (2007-2012). I am the head of Dammam newborn screening Lab (2012-2018).

Title: Association of breastfeeding practices and selected clinical outcomes of patients aged 3 months to 2 years old diagnosed with PCAP C in a tertiary Government Hospital in Manila from January 2013- January 2016

Charisse B. Pulmano,
Ospital ng Maynila Medical Center, Philippines

Charisse B. Pulmano is working as a general paediatrician in Ospital ng Maynila Medical Center, Philippines

Title: Suffering among mothers with low birth weight infant at sick newborn care unit

Natchanan Chivanon,
Burapha University, Thailand

Natchanan Chivanon is an Assistant Professor of Faculty of Nursing, Burapha University and completed Ph.D in Nursing since 2011. She is a lecturer of Division of Pediatric who teaches both bachelor degree and some master degree nursing students.
