3rd Annual Congress on

Rare Diseases and Orphan Drugs

ORDI
Organization for Rare Diseases India

Collaboration

San Antonio, USA

October 30-November 1, 2017

rarediseases@infectiousconferences.com , rarediseases2016@gmail.com

Invitation

San Antonio, USA

Conference Series LLC welcomes you to attend the 3rd Annual Congress on Rare Diseases and Orphan Drugs during October 30-November 1, 2017 in San Antonio, USA. We cordially invite all the participants to share their knowledge and research in the field of Rare Diseases and Orphan Drugs. Rare Diseases 2017 anticipates more than 200 participants around the globe with thought provoking Keynote lectures, Oral presentations, Symposiums, Workshops and Poster presentations. The attending delegates include Editorial Board Members of related International Journals. This is an excellent opportunity for the delegates from universities and institutes to interact with the world class scientists and eminent personalities. The intending participants can confirm their participation by registering for the conference along with your colleagues. The main theme of the conference is " Platform to share new treatments and research for Rare Diseases".

Regards,

Rare Diseases 2017

Operating Committee

Market Analysis

Ataxia telangiectasia (A-T) is a rare, autosomal recessive disorder that progressively damages the brain and causes motor skill development problems. Between 1 out of 40,000 and 1 out of 100,000 people worldwide are identified with Ataxia telangiectasia each year, according to the National Cancer Institute. An estimated one percent of the U.S. population, (about 2.5 million people), may be carriers of the ATM (ataxia telangiectasia mutated) gene, which causes the disease. Hemophilia is a rare genetic bleeding disorder estimated to have affected about 400,000 people globally as of 2013. On the report of World Federation of Hemophilia (WFH), the disorder is more prevalent in males and about 1 in 5,000 neonates suffer from type A. The federation also mentions that about 75.0% of these individuals are either undiagnosed or receive inappropriate medical care. With the genetic evolution, increasing incidences of bleeding disorders and rising severity have been noticed, leading to industry expansion over the forecast period. For instance, according to the National Hemophilia Foundation (NHF), as of 2015, about 1.0% of the U.S. population is anticipated to affect from von Willebrand disease, thereby increasing the need for medical treatment/drugs. Rare diseases are an important public-health issue and a challenge for the medical community. They are called ‘health orphans’, because rare diseases have been neglected for many years, mainly due to the research and development (R&D) challenges.

Market Analysis

There are approximately 7,000 different types of rare diseases and disorders, with more being discovered every day. The United States and Europe each have approximately 30 million people living with rare diseases; it is estimated that 350 million people worldwide suffer from rare diseases. In the US, rare diseases are those that impact less than 200,000 people. The European Union defines it as less than 250,000 and for Japan the number stands at less than 50,000. The very fact that the drugs belong in the rare category means they can be started at a higher price point. In the US, the Food and Drug Administration (FDA) provides for 7 years of marketing exclusivity starting from the time of approval, while in the European Union the orphan drugs are given 10 year market exclusivity. About 7,000 rare medical conditions will find 470 drugs for treatment by 2020, the market research firm forecasts. The overall global spending on orphan drugs is expected to be in the range of 1-2%, it will make up for about 10% of the total spending in developed markets like the US. The global sales for orphan drugs are estimated at $178 billion, growing by 11.7% per year, over the five year period between 2015 and 2020, nearly double the yearly growth of the overall prescription drug market. Huntington disease is a rare, progressive brain disorder that causes uncontrolled movements, emotional problems, and loss of thinking ability. The Huntington's disease market will rise from around $252.6 million in 2014 to over $2.6 billion in 2024, representing a huge Compound Annual Growth Rate (CAGR) of 25.6%. The main driver of this extensive growth, which will occur across the seven major markets (7MM) of the US, France, Germany, Italy, Spain, the UK, and Japan, will be the launch of efficacious disease-modifying drugs, Raptor's RP103 and Prana Biotechnology's PBT2.

About Us

Open Access Journals

- 900 Open Access Journals
- 21 Day rapid review process
- 30000 Editorial team, 35000 Reviewers team
- 3.5 Million readers and high visibility
- More than 100000 facebook fans
- Publication immediately after acceptance
- Quality and quick editorial, review processing

Key features

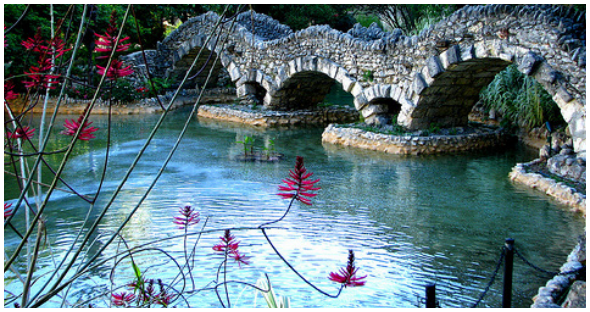

- User friendly/feasible website translation of your paper to 50 world's leading languages
- Enhanced feature: Audio version of published paper
- Digital articles to share and explore
- Sharing option: Social networking enabled
- Authors, reviewers and editors are provided with scientific credits

Conference Series LLC Conferences

- 300 Conferences all over the World every year
- Well organized scientific program
- Renowned speakers and scientists across the globe
- Poster presentations and world class exhibits
- Panel discussions and interactive sessions
- B2B meetings
- Perfect platform for Global Networking

Key features

- Presentation by renowned speakers from all over the world
- Poster presentations and world class exhibits
- Interactive Sessions
- Platform for global networking
- Connecting scientific community

Special Issues : All accepted abstracts will be published inrespective Conference Series LLC Journals

Each abstract will be provided with digital Object Identifier by crossref

Rare Diseases 2017
Salient Features

San Antonio, USA

- Rare Diseases 2017 Conference website is attracting 25000+ online visitors ranging from Researchers, Academicians and Business professionals, who are working in this field. This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

How we stand different from other Conferences:

- 3000+ Conferences across the globe in 30+ countries all through the year
- Over 25 Million+ Visitors and 20000+ Unique Visitors per conference
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Meet with new vendors and suppliers

Speakers Representation from Top 25+ Countries

USA & AMERICAS

USA | Brazil | Canada | Mexico

ASIA-PACIFIC

Australia | China | India | Hong Kong | Indonesia | Japan | Malaysia | Thailand
New Zealand | Philippines | Singapore | Taiwan | South Korea

EUROPE & MIDDLE EAST

Austria | Denmark | Finland | France | Germany | Italy | Netherlands | Norway
Poland | South Africa | Spain | Switzerland | Turkey | UAE | UK | Ukraine

Target Audience

- Directors
- Scientists
- Researchers
- Doctors
- Immunologists
- Pathologist
- Medical Sciences
- Students
- Associations and Societies
- Business Entrepreneurs
- Training Institutions
- Manufacture Medical Device Companies

About Conference

The importance of Rare Diseases and Orphan Drugs is growing rapidly, influencing the industrial sector and scientific community. The significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various zones.

Rare Diseases 2017

- Opportunity to attend the presentations delivered by Eminent Scientists from all over the world
- **Selected contributions will be published in following International Journals**
    - Journal of Clinical Trials
    - Journal of Genetic Syndromes & Gene Therapy
    - Journal of Neurological Disorders
    - Journal of Developing Drugs
    - International Journal of Drug Development and Research
- Participation in sessions on specific topics on which the conference is expected to achieve progress
- Global networking: In transferring and exchanging ideas
- Conference brings together Scientific Researchers, Business Entrepreneurs an, Industry Developers
- Conference brings together Researchers, Business Entrepreneurs and Industry Developers

Conference Highlights

- Different types of Rare Diseases
- Clinical Research and Public Awareness
- Mystery Diagnosis of Rare Diseases
- Challenges in Rare Diseases Treatment
- Rare Infectious Diseases and Immune Deficiencies
- Rare Diseases in Cancer
- Rare Diseases in Aging
- Orphan Drugs, Development trends and strategies
- Clinical Research on Orphan Drugs
- Orphan Drugs and Ethical Issues
- Future Hereditary and Rare Diseases e-Prospects of Rare Diseases

About San Antonio

San Antonio has a diversified economy with about a $96.8 billion metropolitan Gross Domestic Product. This ranks the city 4th among Texas metropolitan areas and 38th in the United States. San Antonio's economy is focused primarily within military, health care, government civil service, financial services, oil and gas and tourism sectors. With a population of 1,144,646, San Antonio is the 8th largest city in the United States. San Antonio is geographically large as well, with 368.6 square miles. The city is in South Central Texas, 140 miles northwest of the Gulf of Mexico, and 150 miles northeast of Laredo, which is on the Mexican border. San Antonio has been ranked by Conde Nast Traveler as the #2 U.S. travel destination, and the #9 worldwide destination. It has been called "every Texan's favorite city," and Will Rogers dubbed San Antonio as "one of four unique cities in America." San Antonio's roots were largely military, and the city continues to have a large military presence today. Fort Sam Houston acts as the headquarters for the U.S. Army Medical Command as well as the home of the Fifth Army. Air Force Bases include Lackland, Randolph and Brooks. There are about 85,000 military personnel in San Antonio. The City of San Antonio is home to fine art museums, historic Spanish missions, amusement parks, great dining and a vibrant culture. Fiesta Week, a yearly celebration in San Antonio, is all about parades, Tejano food and festive drink in the downtown area and along the River Walk.
