International Conference on
Reproductive & Gynec Pathology

October 23-24, 2017 Orlando, Florida, USA

Theme: "An Insight into the unexplored areas of Reproductive and Gynecologic Pathology"

Invitation

Dear Colleagues,

Conference Series LLC welcomes you to attend the International Conference on Reproductive & Gynec Pathology to be held on October 23-24, 2017 at the beautiful city of Orlando, Florida with the theme "An Insight into the unexplored areas of reproductive & Gynecologic Pathology". This global meet will see the coming together of keynote speakers, Oral Presentations by renowed speakers and Poster Presentations by students and delegates all around the world. The meet will be an ideal platform for people who wants to share their expertise in the related fields of gynecologic pathology and reproduction. All the delegates coming here will have an oppurtunity to meet and create network with the giants in the field of Reproductive & Gynec-Pathology.

Conference Sessions

- Pre and post partum Care
- Ultrasound
- Genetics
- Medical Complications in Pregnancy
- Gynecologic Infectious Diseases
- Gynecologic Oncology
- Cervical Cancer
- Urogynecology
- Contraception
- Reproductive Endocrinology
- Breast Diseases and Management
- Minimally Invasive Surgery
- Innovations in Gynaecological Pathology
- Assisted Reproductive Technology
- Reproductive Medicine
- Women's Health
- Family Planning
- Male & Female Infertillty
- Psychcological Influence
- Polycystic Disorders
- Fibroids & Treatments

Conference Attendees..

All honorable authors, researchers, scientists and students are encouraged to contribute through submissions of their posters & research abstracts. Also, high quality research contributions describing original and unpublished of conceptual, research oriented, experimental or theoretical work in all areas of are warmly invited for presentations at the conference.

Journal of Fertilization: In Vitro - IVF-Worldwide, Reproductive Medicine, Genetics & Stem Cell Biology

Journal of Genital System & Disorders

Journal of Contraceptive Studies

Youth Forum

Young Researchers can also participate

Eligibility

Young Investigators (e.g. Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty) are the focus of this event.
Participants should be below the age of 33 years.
Opportunity for young researchers to learn about the research areas of their peers to increase their capacity as multidisciplinary researchers

Benefits

The forum will provide an opportunity for collegial interaction with other speakers and established celebrative across the globe.
Young Researcher Award will be given to the best presentation by the organizing committee member.

Speaker's PPT

You may submit your presentation to any of our onsite organizers on the day of your talk. If your presentation is not compatible with our laptops, then you may also use your own laptop.

Program at glance

Day 1 / October 23, 2017

	Time	Session
Morning	08:00 - 09:00	**Registration /Reception**
	09:00 - 09:15	Inaugural Address
	09:15 - 10:45	Keynote/Plenary Talk no: 1
	10:45 - 10:50	Group Photo
	10:50 - 11.00	**Coffee/Tea Break**
	11:00 - 13:00	Sessions
	13:00 - 13:30	**Lunch Break**
Evening	13:30 - 15:30	Sessions
	15:30 - 15:45	**Coffee/Tea Break**
	15:45 - 17:30	Sessions

Day 1 / October 24, 2017

	Time	Session
	Time	**Session**
	09:00 - 10:00	Keynote/P lenary Talk no: 2
	10:00 - 10:15	**Coffee/Tea Break**
	10:15 - 13:00	Sessions
	13:00 - 13:30	**Lunch Break**
	13:30 - 15:30	Sessions
	15:30 - 15:45	**Coffee/Tea Break**
	15:45 - 17:30	Sessions

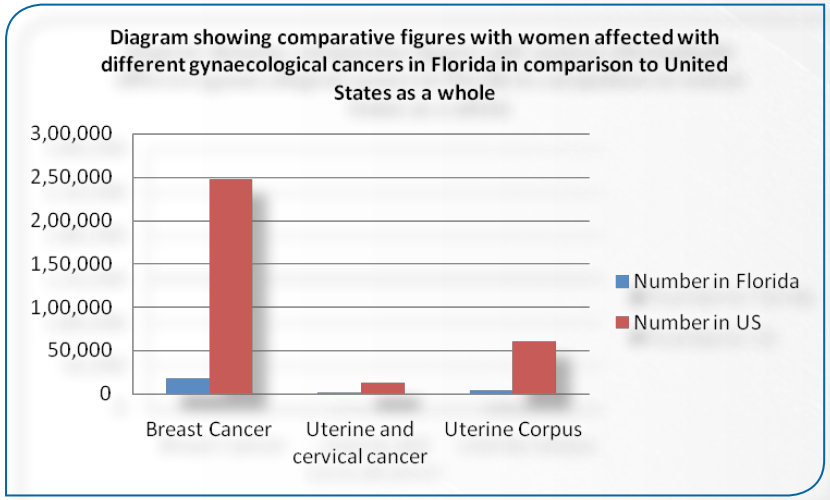

Salient Keypoints of Reproductive & Gynec-Pathology 2017

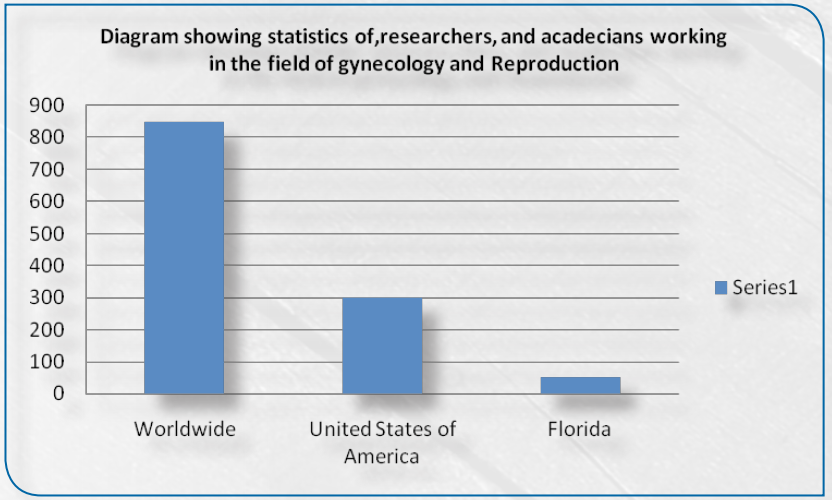

- The Career Guidance Workshops to the Graduates, Doctorates and Post-Doctoral Fellows
- Accepted Abstracts will be published in the respective journals and will be labelled with a Digital Object Identification Number (DOI) provided by Cross Ref (Free abstract publishing).
- Lifetime Speaker and Abstract pages created and indexed in Google on your name, would get worldwide acknowledgment to your profile and Research.
- Group of attendees from the same lab/institute/university (or) anyone who wish to attend the conference will be eligible for discounts.
- For Students Best Poster and Young Researcher Award.

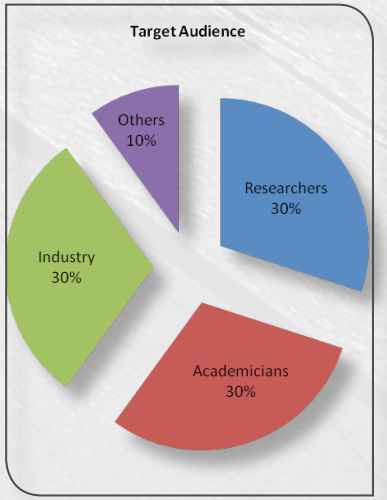

Market Analysis

Reproductive and Gynec Pathology is a very important field in terms of women's health and well being. Worldwide number of researchers, hospitals are increasing in multiple folds as the number of cases related to gynecological disorders are increasing at an alarming rate.

The different types of cancer such as uterine cancer, cervical cancer, breast cancer are increasing among women and reaching the number of lakhs. In the year of 2016, 2,00,000 of breast cancer cases where registered in Usa alone. The number of uterine cancer was nearly 13,000

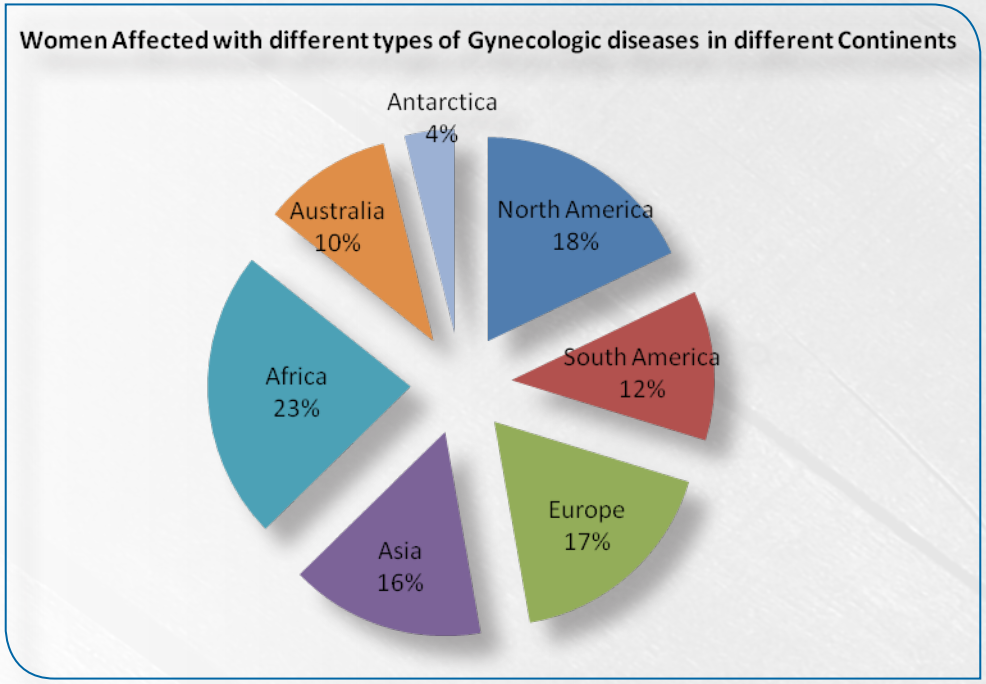

Market analysis

The national demand for women's health care is forecast to grow by 6% by 2020. Most (81%) ob-gyn related services will be for women of reproductive age (18–44 years old). Growth in demand is forecast to be highest in states with the greatest population growth (Texas, Florida), where supply is currently less than adequate (western United States), and among Hispanic women. This increase in demand by 2020 will translate into a need for physicians or non physician clinicians, which is clinically equivalent to 2,090 full-time obstetrics and gynaecologists.

Cervical cancer is the fourth most common cancer in women, and the seventh overall, with an estimated 528,000 new cases in 2012. As with liver cancer, a large majority (around 85%) of the global burden occurs in the less developed regions, where it accounts for almost 12% of all female cancers. High-risk regions, with estimated ASRs over 30 per 100,000, include Eastern Africa (42.7), Melanesia (33.3), Southern (31.5) and Middle (30.6) Africa. Rates are lowest in Australia/New Zealand (5.5) and Western Asia (4.4). Cervical cancer remains the most common cancer in women in Eastern and Middle Africa

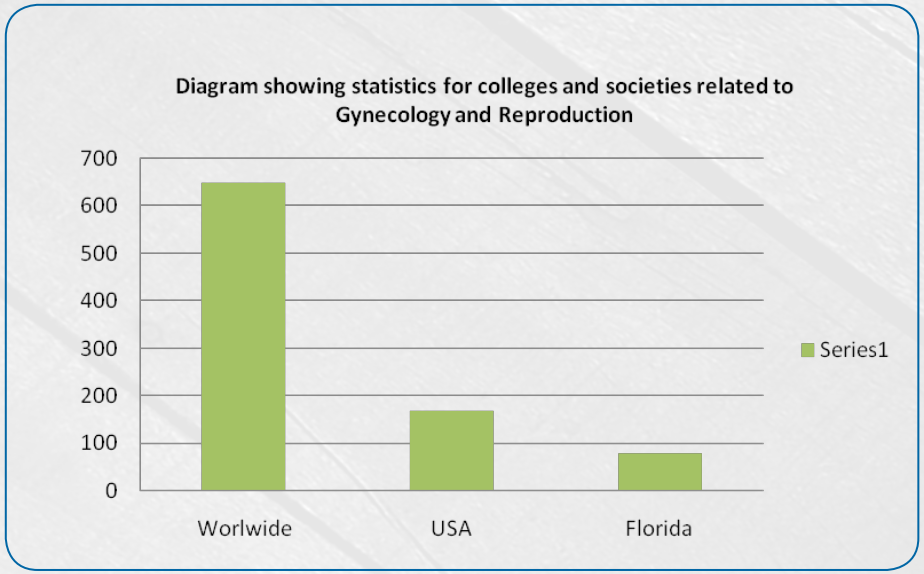

Market Report

There were an estimated 266,000 deaths from cervical cancer worldwide in 2012, accounting for 7.5% of all female cancer deaths. Almost nine out of ten (87%) cervical cancer deaths occur in the less developed regions. Mortality varies 18-fold between the different regions of the world, with rates ranging from less than 2 per 100,000 in Western Asia, Western Europe and Australia/New Zealand to more than 20 per 100,000 in Melanesia (20.6), Middle (22.2) and Eastern (27.6) Africa.

Another fact influencing the breast cancer incidence rate trend is mammography screening. In Canada, Mammography screening started in 1988, and all regions established such programmes by the next decade, and have contributed to the stabilisation of the breast cancer incidence rate in the previous 10 years.

Breast cancer also turns out into the tumour in which the 10 % rule is actually précised .The Canadian treatable patients are about 10 per cent that of the United States for the over past 10 years, and it is possibly remains the same.

It is said that the stable trend can certainly get disturbed by many elements, even including seemingly isolated incidents. The breast cancer risk and incidence rate in women among the Canadian rose through the early 1990s but decreased over the past year 2000s. This increase in breast cancer incidence appears partly because of Breast Cancer imaging and mammography that was used more often, which meant that more cases evolved in breast cancer. Another reason for increased breast cancer incidence was the use of hormone replacement therapy (HRT) Treatment that replaces female sex hormones like oestrogen, progesterone or both when they are no longer produced by the ovaries. The decrease equated with a large fall in the use of HRT among postmenopausal women when its role in breast cancer was announced. The breast cancer death rate has been declining since the mid-1980s. This cutback in death rates likely reflects the impact of screening and advancement in treatment for breast cancer.

Venue and Contact Details

Orlando is a city in the U.S. state of Florida and the county seat of Orange County. Located in Central Florida, it is the center of the Orlando metropolitan area, which had a population of 2,387,138, according to U.S. Census Bureau figures released in March 2016, making it the 24th-largest metropolitan area in the United States, the sixth-largest metropolitan area in the Southern United States, and the third-largest metropolitan area in Florida. As of 2015.The City of Orlando is nicknamed "The City Beautiful," and its symbol is the fountain at Lake Eola. Orlando is also known as "The Theme Park Capital of the World" and in 2014 its tourist attractions and events drew more than 62 million visitors

Venue: Orlando, Florida
