conferenceseries.com **Tentative Program**

3rd International Conference and Exhibition on

Satellite & Space Missions

Barcelona, Spain May 11-13, 2017

Theme: "Update on Current trends and developments in Global Satellite Technology promising the change in future Space-based services"

For available speaker slots

Contact: satellite@conferenceseries.net

300+ Participation (70 Industry: 30 Academia) includes

- 19+ Interactive Sessions
- 15+ Keynote Lectures
- 75+ Plenary Lectures
- 5+ Workshops
- 20+ Exhibitors
- B2B Meetings

3rd International Conference and Exhibition on

Satellite & Space Missions

Barcelona, Spain May 11-13, 2017

Organizing Committee

Yi Lung Mo
University of Houston
USA

Nicolas H Younan
Mississippi State University
USA

David Olowokere
Texas Southern University
USA

Benjamin K. Malphrus
Morehead State University
USA

Dorian Gorgan
Technical University of Cluj-Napoca
Romania

Shufan Wu
ShanghaiTech University
China

Valentine Yankovsky
St. Petersburg State University
Russia

Gloria Garcia-Cuadrado
Celestia Aerospace
Spain

Ali Cheknane
Amar Telidji University of Laghouat
Algeria

Yavor Shopov
University Centre for Space Research & Technologies Sofia University
Bulgaria

Alexander M Krot
United Institute of Informatics Problems of National Academy of Sciences
Belarus

3rd International Conference and Exhibition on

Satellite & Space Missions

Barcelona, Spain May 11-13, 2017

Day 1

11-05-2017

Registrations
Introduction
Opening ceremony
Group Photo

Keynote Presentations

Title: A New Era of Planetary Exploration with Small Satellite Platforms

Benjamin K. Malphrus, Morehead State University, USA

Title: Space Research at AFOSR

Kent Miller, Air Force Office of Scientific Research, USA

Title: Post-ISS Concept for 2025 and Beyond

O. Romberg, German Aerospace Center DLR, Germany

****2 Keynote Slots Available****

Track 01: Space Missions
Track 03: Space exploration
Track 04: Earth Observation Satellites
Track 07: Satellite Navigation and Communication
Track 13: Earth Science

Title: Lunar IceCube: Pioneering Technologies for Interplanetary Small Satellite Exploration

Benjamin K. Malphrus, Morehead State University, USA

Title: Proposed series of Orbital Debris remediation activities

Darren S. McKnight, Integrity Applications, Inc., USA

Title: Electron photoavalanche diode arrays: a new technology for noiseless high speed near infrared sensors

Gert Finger, European Southern Observatory, Germany

Title: SUCHAI 2 and 3: Scientific grounds and challenges of the new space mission of the University of Chile

Marcos A. Diaz, University of Chile, Chile

Title: Studying hydrological processes in dryland landscapes: Can satellites help in data-poor regions?

Ben Jarihani, University of the Sunshine Coast, Australia

Title: Optimal detection of changes in real-time data: Applications in Satellites

Peter Johnson, University of Manchester, UK

Title: Using Object Based Image Analysis to monitor soil aggregate breakdown under natural conditions

Irena Ymeti, University of Twente, The Netherlands

****3 More Speakers Slots Available****

Title: Nanosatellites, the tool for a new economy of space: Opening space frontiers to a wider audience

Gloria Garcia-Cuadrado, Celestia Aerospace, Spain

Title: ESAT, the educational satellite

Ignacio Barrios, Universidad Politécnica de Madrid, Spain

Title: Necklaces theory applied to Satellite Constellation design

Eva Tresaco, Universidad de Zaragoza, Spain

Title: Alternative fragmentation concepts for possible space mining applications

Philipp Hartlieb, Mining Engineering and Mineral Economics Montanuniversitaet Leoben, Austria

Title: Research methodology in mechanical systems and bionics: from Plato to contemporary science

Simona-Mariana Cretu, University of Craiova, Romania

Title: Space Exploration: A matter for Governments or for private operators?

Giancarlo Genta, Politecnico di Torino, Italy

****3 More Speakers Slots Available****

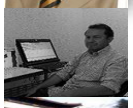

Title: Earth Observation from Large Platform and Moon

Huadong Guo, Chinese Academy of Sciences, China

Title: Evolution of Mission, Design and utilization trends of Small and Miniaturized Satellites in Developing Countries

Mohamed B. Argoun, Cairo University, Egypt

Title: Fuzzy control for stabilization and position of a Nano-satellite

Gustavo Mendoza-Torres, Autonomous University of Puebla, Mexico

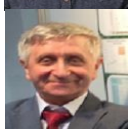

Title: The Flyby anomaly in need of new physics?

Mario J. Pinheiro, Universidade de Lisboa, Portugal

Title: Development of Relative Navigation Test-bed using GPS and Femtosecond Laser

Dae-Eun Kang, Yonsei University, South Korea

Title: Proposals on multi-channel methods for the simultaneous remote sensing of [O(3P)], [O3] and [CO2] altitude profiles in the mesosphere and lower thermosphere in daytime

Valentine A. Yankovsky, St. Petersburg State University, Russia

3 More Speakers Slots Available

Title: Hypothetical discovery of life on Venus

Leonid V. Ksanfomality, Space Research Institute, Russia

Title: Retrospective analysis of GLE events and estimates of radiation risks

L.I. Miroshnichenko, Lomonosov Moscow State University, Russia

Title: Single-satellite global positioning system

Alexander V. Bagrov, Institute of Astronomy of the Russian Academy of Sciences (INASAN), Russia

Title: Characteristics of meteoroid "Chelyabinsk"15.02.2013 according to seismic data and video observations

Victor S Seleznev, GS RAS, Russia

Title: Inorganic carbon production within E. huxleyi blooms in subpolar and polar seas: A satellite time series study (1998-2013)

Dmitry V. Pozdnyakov, Nansen Centre, Russia

3 More Speakers Slots Available

Title: Micro-Satellite Hosted Laser- gated System for Space Debris Tracking, Forest Fires and Plants' Health Monitoring and Underground Facilities' Location

Yavor Shopov, Sofia University, Bulgaria

Title: Impact analysis of satellite rainfall products on flow simulations in the Magdalena River Basin, Colombia

Amr Elgamal, Dar Al-Handasah Shair and Partners, Egypt

Title: N –Body problem: The Theory and Application

Ahmed Hafez Mohammed Ibrahim, Al-Azhar University Faculty of science, Egypt

Title: SPUTNIX Cubesat kit based on Raspberry-Pi

Zaynulla Zhumaev, SPUTNIX OOO, Russia

3 More Speakers Slots Available

Day- 2

12-05-2017

Keynote Presentations

Title: High resolution Satellite precipitation estimation based on cloud classification

Nicolas H. Younan, Mississippi State University, USA

Title: Unified Satellite Image Fusion for Sustainable Urban Environment

Bo Huang, Chinese University of Hong Kong, Hong Kong

Title: Fundamental principles of gyroscope theory

Ryspek Usubamatov, Kyrgyz State Technical University

2 Keynote Slots Available

Track 2: Satellite Remote Sensing and GIS
Track 4: Earthquake Engineering
Track 5: Aerospace Engineering and Technology
Track 09: Asteroid Impact Mission (AIM)
Track 11: Space Weather
Track 14: Orbital Mechanics

Title: Engaging the user community in developing Earth observing remote sensing data products

Vanessa M. Escobar, NASA GSFC/SSAI, USA

Title: Theory about the Universe "And There Was Light"

Jasmin Belle- Isle, Alpha Research, Canada

Title: Could mini-magnetospheres really be used to protect spacecraft from `cosmic rays'?

Ruth Bamford, Rutherford Appleton Laboratory, UK

Title: Application of remote sensing in mapping potential gold mineralization in Muteh gold mining area, Iran

Hooshang Asadi Haroni, The University of Western Australia, Australia

Title: Attitude manoeuvre planning and control of underactuated spacecraft: a kinematic approach

Giulio Avanzini, Università del Salento, Italy

Title: New technologies applied to environmental remote sensing

Emilio Ramírez-Juidías, University of Seville, Spain

3 More Speakers Slots Available

Title: Protection of satellite remote sensing data in the light of open data trend

Catherine Doldirina, International Institute of Space Law, Italy

Title: The panorama of European launchers and their evolution

Jean-Marc Astorg, National Center for Space Studies (CNES), France

Title: Modeling the space environment and its effects on spacecraft and astronauts using SPENVIS

Stijn Calders, Royal Belgian Institute for Space Aeronomy, Belgium

Title: Current status of development of solar coronagraph system

Jihun Kim, Korea Astronomy & Space Science Institute, Korea

Title: Influences of initial launch conditions on flight performance of tethered stratospheric satellite

Junhui Meng, Beihang University, China

Title: China EO system and Virtual Ground Station - A new way to access remote sensing satellite image

Jianbo LIU, Chinese Academy of Sciences, China

3 More Speakers Slots Available

Title: An Online Batch-Based Fusion Filter for Navigation in Mars Final Approach Phase

Zhengshi Yu, Beijing Institute of Technology, China

Title: Forcing of sunspot number oscillations on North Atlantic oscillations

Shahinaz Yousef, Cairo University, Egypt

Title: Using of thermal vision cameras for remote location of caves on Mars for immediate shelters for astronauts and storage chambers

Yavor Shopov, Sofia University, Bulgaria

Title: Satellite gravity measurements for great earthquake rupture zones forecasting and monitoring: insights from satellite GOCE mission

Orlando Alvarez Pontoriero, CONICET-IGSV, Argentina

Title: Space weather monitoring and now casting by ground-based means

Oleg Troshichev, Arctic and Antarctic Research Institute, Russia

3 More Speakers Slots Available

Title: The evolvement of the university orbital constellation of small satellites series

Ivan S. Tkachenko, Samara University, Russia

Title: Food security and flood risk dynamics in Myanmar

Mukesh S. Boori, Samara National Research University, Russia

Title: Flying Vehicles (FV) for air and space medium, which reactive force is generated by acceleration of electrically charged particles in a constant electric field implemented both inside and outside of the FV

Gennady S. Luk'yanchikov, Russian Academy of Sciences, Russia

Title: Mapping bauxite indices using Landsat ETM+ imageries constrained with environmental factors in Foumban area (West Cameroon)

P. Tematio, University of Dschang, Cameroon

Title: Finding New Fishing Grounds Using Sea Surface Temperature Data from Satellite Remote Sensing in case Indonesian Waters

Benhard Sitohang, Bandung Institute of Technology, Indonesia

3 More Speakers Slots Available

Title: Evidence of successive under shielding and overshielding event during a geomagnetic storm and subsequent changes in the electrodynamics of equatorial upper atmosphere

K. G. Simi, University of Kerala, India

Title: Satellite image classification using Genetic Algorithm trained radial basis function neural network, application to the detection of flooded areas

Akansha Singh, The NorthCap University, India

Title: Aerosol load in Morocco in the framework of the ELT prospect

Aziza Bounhir, Cadi Ayyad University, Morocco

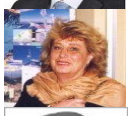

3 More Speakers Slots Available

Poster Presentations

Title: How three dimensional data could improve the concept of urban ecosystem services

Sadroddin Alavipanah, Humboldt University of Berlin, Germany

Title: Liulin-AR spectrometer for radiation environment observation on SABIA-MAR 1 Satellite Biography

Alba Zanini, National Institute of Nuclear Physics, Italy

Title: Hamiltonian model of formation flying Satellites in the critical circular orbits

Shaheera A. Altalhi, King Abdul-Aziz University, Saudi Arabia

Title: Solar 3-D printer for lunar construction

Valentin K. Sysoev, Lavochkin Association, Russia

Title: Synthesis of a control system for relative motion of closely spaced satellites

Alexander V. Nebylov, The State University of Aerospace Instrumentation, Russia

Title: Bistatic P-band SAR for Spacecraft AIST-2 ☆

Oleg V. Goriachkin, VSUTI, Russia

Title: Development of algorithms for controlling the orientation of a large elastic spacecraft

Alexander I. Panferov, The State University of Aerospace Instrumentation, Russia

Title: The combined Kepler 3rd law with universal stellar law: Derivation and application to extrasolar systems investigation

Alexander M. Krot, National Academy of Sciences of Belarus, Belarus

Title: Guidance and control of aerospace vehicle utilizing solar sail technology

Ahmed R. El- Sawi, Mansoura University, Egypt

Title: Non-rocket launch from Mars

Vladislav A. Leonov, INASAN, Russia

Poster Presentation Slots are Available

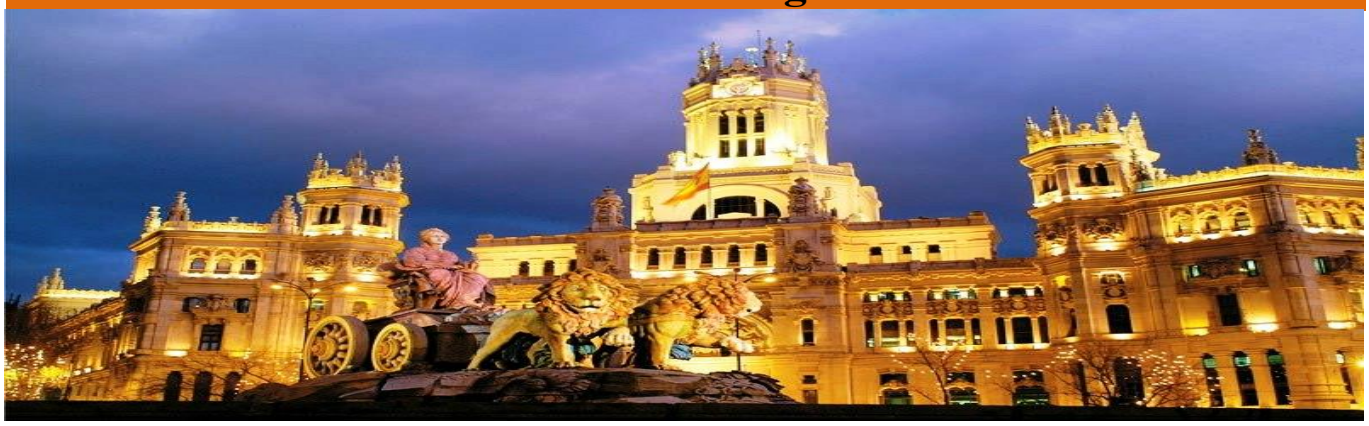

Speaker's Timinings will be Updated soon!!

NOTE: Program Schedule is subject to change with final allotment of the speaker slots

Day-3

23-07-2016

Networking

Glimpses of Satellite 2016

Glimpses of Satellite 2015

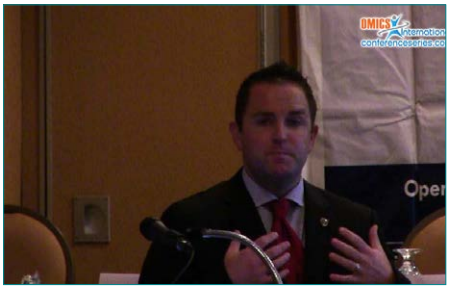

Major Scientific Sessions

- Space Missions
- Satellite Remote Sensing and GIS
- Space exploration
- Earthquake and Structural Dynamics
- Aerospace and Mechanical Engineering
- Climate change and Weather forecasting
- Satellite Navigation and Communication
- Satellite Dish
- Asteroid Impact Mission (AIM)
- Satellite Radiance
- Space Weather
- Materials Science in Space
- Earth Science
- Orbital Mechanics

For detailed sessions, please visit:

http://satellite.conferenceseries.com/call-for-abstracts.php

Submit your abstract online at: http://satellite.conferenceseries.com/abstract-submission.php

Register online: http://satellite.conferenceseries.com/registration.php

Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement

- Apart from the judging time you may also be present at the poster to share your research with interested delegates

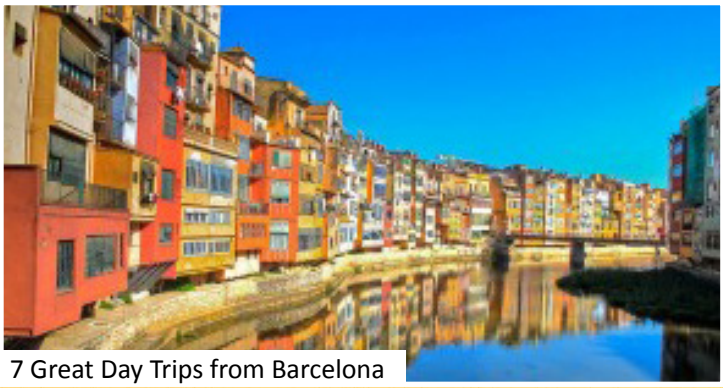

Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

Montjuïc

About Barcelona

Barcelona is one of the best cities to organize an international conference on Satellite. The research work going on in the field is in a good range when compared to the other cities. Barcelona is the fastest growing city in the Spain with an excellent economic growth. Several of the College of Technology degree programs are offered at University of Barcelona and Satellite campuses.

The location is continuously focusing on a Satellite Applications and Technologies. Football Club Barcelona commonly known as Barcelona and familiarly as Barça is a professional football club, based in Barcelona, Catalonia, Spain.

Barcelona is unique in that science as a resource is available to industrial companies in a highly compact manner and offers companies excellent cooperation opportunities. Barcelona is Spain's top tourist city destination. It is a great city to visit, mixing venues of historical interest with exciting recreation and entertainment opportunities.

Alongside its major historical sites, Barcelona offers a diverse range of top attractions – world famous buildings, museums, city parks, cabaret theatres, festivals and of course plenty of shopping opportunities. Satellite-2017 Conference at Barcelona will certainly give a wonderful experience to attendees to explore the beautiful city with gaining knowledge.

Venue Address:

Tryp Barcelona Apolo Hotel
Avinguda del Parallel, 57-59, 08004
Barcelona, Spain.

Opening Ceremony

Keynote Forum

Introduction

Title: Revolution of space technology, new idea how we can speed up time travel to planets by using electromagnetic field in space
Capt. AbdullahAl Zahrani, Alzahrani Space Innovation, Poland

Title: Flexible description of earth observation data processing
Dorian Gorgan, Technical University of Cluj-Napoca, Romania

Title: Human long duration space missions: Space dentistry, medicine and space policy
Balwant Rai, Kepler Space Institute, USA

Networking & Refreshments @ Main Lobby

Group Photo

Sessions:

Space Missions | Space Exploration | Earthquake Engineering | Types of Satellites and Applications | Aerospace Engineering and Technology | Applications of Satellite Technology | Climate change and Weather forecasting

Session Chair: Dorian Gorgan, Technical University of Cluj-Napoca, Romania
Session Co-Chair: Joseph Seckbach, The Hebrew University of Jerusalem, Israel

Session Introduction

Title: Current issues in Space Situational Awareness (SSA) and Space Traffic Management (STM)
Mark A Skinner, The Boeing Company, USA

Title: Space simulated missions and space research: Human health
Balwant Rai, Kepler Space Institute, USA

Title: Geodetic earthquake forecasting and crustal deformation modeling from point position changes using GPS data
Yüksel Altiner, Federal Agency for Cartography and Geodesy in Frankfurt am Main, Germany

Title: Characteristics of hypervelocity impact of micro-particles on multi-foils shield configurations
Sunil C Joshi, Nanyang Technological University, Singapore

Title: Implementation of a micro-satellite program in the infrastructure of the Russian segment of the International Space Station
Stanislav I Klimov, Russian Academy of Sciences (IKI RAS), Russia

Title: Analytical method for space debris propagation under perturbations in the geostationary ring
Daniel Casanova Ortega, University of Zaragoza, Spain

Title: Dealing with the Earth's ionosphere's complexity
Massimo Materassi, Institute for Complex Systems of the National Research Council, Italy

Lunch Break @ Element I+II Restaurant

Title: PC index as a ground-based proxy of the solar wind energy incoming into the magnetoshere: Means for space weather monitoring
Oleg Troshichev, Arctic and Antarctic Research Institute, Russia

Title: Joint viterbi detector/decoder for satellite communications
Chan Kheong Sann, Data Storage Institute (DSI), Singapore

Title: From extremophilic microbes to extraterrestrial possibilities of life
Joseph Seckbach, The Hebrew University of Jerusalem, Israel

Title: How to talk about Einstein's general theory of relativity?
Oyvind G Gron, Oslo and Akershus University, Norway

Title: Analysis of launch opportunity for low-thrust interplanetary missions
Maffione Porzia Federica, Politecnico di Torino, Italy

Networking & Refreshments @ Main Lobby

Title: Electrochemical behavior in acidic medium of Al–2.0 wt. %Fe aerospace alloy treated by laser surface remelting

Moisés Meza Pariona, State University of Ponta Grossa, Brazil

Title: Analysis of (soft) soil parameter uncertainty in planetary rover mobility simulations

Alberto Gallina, AGH University of Science and Technology, Poland

Title: Services for space missions support within the ESA space situational awareness space weather service network

Erwin De Donder, Royal Belgian Institute for Space Aeronomy, Belgium

Title: Monitor and study horizontal and verticals changes at land surface using remote sensing and GIS technology

Mohamed Mhmod, Jilin University, China

Title: Development of the statistical theory of forming cosmogonical bodies to explain a stability of the orbital movements of planets and the forms of planetary orbits

Alexander M Krot, United Institute of Informatics Problems of National Academy of Sciences, Belarus

Networking & Refreshments @ Main Lobby

Title: Geospatial approaches for micro level farm planning - A step to enhance crop productivity

Sathish Ayyappa, University of Agricultural Sciences, India

Title: Space-based solar laser system simulation to transfer power onto the Earth

Yasser A Abdel-Hadi, National Research Institute of Astronomy and Geophysics (NRIAG), Egypt

Title: Design and realization of payload operation and application ground system of China's space

Hongfei Wang, Chinese Academy of Sciences, China

Title: Major crops classification using time series MODIS EVI with adjacent years of ground reference data in the US state of Kansas

Muhammad Shakir, University of Chinese Academy of Sciences, China

Panel Discussion

Day 2 July 22, 2016

Experience I+II

Keynote Forum

Introduction

Title: New perspectives of combined data sets for environmental information
Barbara Koch, Albert-Ludwigs University of Freiburg, Germany

Title: Celebrating the centenary of the Schwarzschild solutions and Einstein's prediction of gravitational waves and their detection by LIGO
Oyvind G Gron, Oslo and Akershus University, Norway

Title: History and modernity of the study of space weather in Russia
Stanislav I Klimov, Institut Kosmicheskih Issledovanyi - RAS, Russia

Networking & Refreshments @ Main Lobby

Sessions:

Orbital Mechanics | Satellite Remote Sensing and GIS | Satellite Subsystems | Satellite Communication | Satellite Navigation and Communication | LTE-based ground network and Satellite networks

Session Chair: Barbara Koch, Albert-Ludwigs University of Freiburg, Germany

Session Co-Chair: Nicolas H Younan, Mississippi State University, USA

Session Introduction

Title: ISEE III reboot project or how to save an interplanetary spacecraft on a shoestring budget

Dennis Wingo, Skycorp Incorporated, USA

Title: Information retrieval from Earth Observation (EO) imagery

Nicolas H Younan, Mississippi State University, USA

Title: Potential of different sensor combination approaches for the estimation of above ground biomass

Barbara Koch, Albert-Ludwigs University of Freiburg, Germany

Title: New methods for remote sensing of altitude profiles of the $O(^3P)$, O_3 and CO_2 in the daytime mesosphere and lower thermosphere

Valentine A Yankovsky, St. Petersburg State University, Russia

Title: Orbital dynamics of a solar sail accelerated by thermal desorption of coatings

Elena Ancona & Roman Ya Kezerashvili, Polytechnic University of Turin, Italy/The City University of New York, USA

Title: Cloud detection in the sun area of total sky images using a conventional and a low-cost sky camera

Joaquín Alonso Montesinos, University of Almería, Spain

Title: From space to Earth: the GPR frontiers

Pier Matteo Barone, The American University of Rome, Italy

Lunch Break @ Element I+II Restaurant

Title: The theory of solar zenith – Proposed new rules for the seasons of year in intertropical locations focusing Salvador Bahia

Luiz Sampaio Athayde Junior, UFBA-Federal University from Bahia, Brazil

Title: Synoptical monitoring of climatic thermic fronts on the surface of the Southern Ocean by means of satellite remote sensing and in situ measurements

Victor V Ionov, St. Petersburg State University, Russia

Title: Using multispectral and hyperspectral satellite imagery in ecological and geographical studies

Mikhail Yu. Puzachenko, Institute of Geography RAS, Russia

Title: Impervious surface detection using very high spatial resolution satellite data

Ebrahim Taherzadeh Mobarakeh, Ground Data Solutions R&D Sdn Bhd, Malaysia

Title: Enhanced chemical vapor sensing by single-stranded DNA-graphene

Seong Chan Jun, Yonsei University, Korea

Networking & Refreshments @ Main Lobby

Poster Presentations

Title: The evaluation of solar farm locations applying geographic information system and multi-criteria decision-making methods: Case study in Southern Morocco

Meryem Tahri, University Hassan II, Morocco

Title: Unveiling the first high resolution satellite mosaic coverage of Botswana's Okavango Delta

Hamisai Hamandawana, University of Fort Hare, South Africa

Title: Changing paradigm in satellite design, development and assembly with 3D printing

Sunil C Joshi, Nanyang Technological University, Singapore

Networking & Refreshments @ Main Lobby

16:40-18:40 **Title: WorDeL Language – Tutorial on flexible description of Earth observation data processing**

Dorian Gorgan, Victor Bacu, Constantin Nandra, Technical University of Cluj-Napoca, Romania

18:40-19:00 **Title: Detecting coastline changes using GIS and remote sensing, a case study from oman**

Lotfy Kamal Azaz, Menofya University, Egypt

Panel Discussion

Award Ceremony

Day 3 July 23, 2016

Extended Networking Session

OMICS International
conferenceseries.com

Registrations

Windsor-II

Opening Ceremony

Keynote Forum

Introduction

Guoquan Wang
University of Houston, USA

Yi Lung Mo
University of Houston, USA

Coffee Break @ Gallery

David Olowokere
Texas Southern University, USA

Group Photo

Track 1: Satellite Engineering & Technology
Track 12: Integral Manoeuvres for the Future
Track 13: Vibration Design and Satellite Remote Sensing

Session Chair: Yi Lung Mo, University of Houston, USA
Session Co-Chair: Hyongki Lee, University of Houston, USA

Session Introduction

Title: Periodic material-based vibration isolation for satellites
Yi Lung Mo, University of Houston, USA
Title: Applications of satellite remote sensing for hydrologic studies
Hyongki Lee, University of Houston, USA
Title: Introduction to GPS geodesy infrastructure in the Houston metropolitan area for urban geological hazards study
Guoquan Wang, University of Houston, USA

Lunch Break @ Windsor-III

Title: Case study of satellite-based AIS system for continuous tracking at sea of global movement of Nigerian liquefied natural gas
David Olowokere, Texas Southern University, USA
Title: Improving BIM as an architectural design tool towards sustainability through applying LEED categories on its database
Wael Ahmed Abonema, Helwan University, Egypt
Title: Thermo-electrochemical testing and simulation of lithium-ion batteries operating in radiation driven space environments
William Walker, National Aeronautics and Space Administration, USA
Title: Satellite launch and in-orbit insurance
Robert P Whearty, Marsh Space Projects, USA

Coffee Break @ Gallery

Title: India's first Moon and Mars missions orbit determination
Narayanasetti Venkata Vighnesam, Visvesvaraya Technological University, India
Title: A time domain along-track SAR interferometry method
Ning Cao, University of Houston, USA
Title: Diffusion modeling of water flow in the Congo floodplains using geodetic and remote sensing measurements
Ting Yuan, University of Houston, USA
Title: Comparison analysis of global horizontal irradiance between Korea Institute of Energy Research and NASA
Shin Young Kim, Korea University, Korea

Panel Discussion

Day 2 August 18, 2015

Keynote Forum

Introduction

Dimitar Ouzounov
Chapman University, USA

Dorian Gorgan
Technical University of Cluj-Napoca, Romania

Coffee Break

Track 2: Satellite Navigational Systems
Track 3: Types of Satellites & Applications
Track 4: Satellite Subsystems
Trcak 5: Space Missions
Track 6: Military and Non-Military Satellite Technology

Session Chair: Dorian Gorgan, Technical University of Cluj-Napoca, Romania
Session Co-Chair: Luiz Sampaio Athayde Junior, Federal University of Bahia, Brazil

Session Introduction

Title: Testing geospace technologies for alerting large earthquakes: An integrated approach of space and ground observations
Dimitar Ouzounov, Chapman University, USA
Title: Geodetic imaging technologies for research and education
Ramesh L Shrestha, University of Houston, USA
Title: Paradoxical variation of the solar day related to Kepler/ Newton system: The Solar Zenith Theory
Luiz Sampaio Athayde Junior, Federal University of Bahia, Brazil
Title: Flexible and adaptive processing of Earth observation data over high performance computation architectures
Dorian Gorgan, Technical University of Cluj-Napoca, Romania

Lunch Break @ Windsor-III

Title: The conceptual project of the geophysical microsatellite
Matviyenko Sergiy Anatoliyovich, State enterprise "Design office" Yuzhnoye "of M.K.Jangel", Ukraine
Title: ARD (Alpha-Ray Detector) on board SELENE : Design, in-orbit performance and scientific outcome
Masayuki Itoh, Kobe University, Japan
Title: A GUI for optimization of low-thrust trajectories for nuclear and solar electric propulsion
Porzia Federica Maffione, Polytechnic of Turin, Italy
Title: Optimized image collection planning for KOMPSAT
Heejin Bae, KARI (Korea Aerospace Research Institute), Korea

Coffee Break @ Gallery

Title: The use of satellites in the border security
Ali Emre Destegul, Turkish Air War College, Turkey
Title: Will high-altitude long-endurance (HALE) UAVS replace satellites?
Lt. Abdullah Kaya, Turkish Air War College, Turkey

Panel Discussion

Day 3 August 19, 2015

Churchill

Track 7: New Satellite Technologies for Cleaner Low Orbits
Track 10: Applications of Satellite Technology
Track 11: Satellite Challenges and Solutions

Session Chair: Ruisong Xu, Chinese Academy of Sciences, China
Session Co-Chair: Antonio G Accettura, OHB System AG, Germany

Session Introduction

Title: Algorithms for optimal scheduling of multiple spacecraft maneuvers
Atri Dutta, Wichita State University, USA
Title: Future telecomsats as a new paradigm for satellite industries and operators
Antonio G Accettura, OHB System AG, Germany

Coffee Break @ Gallery

Title: Protected Antipode Circle (PAC) on the far side of the Moon
Claudio Maccone, International Academy of Astronautics(IAA), Italy
Title: Remote sensing monitoring and driving force analysis of urban expansion in Guangzhou City, China
Ruisong Xu, Chinese Academy of Sciences, China
Title: GNSS positioning availability control under space weather hazards
Vladislav V Demyanov, Irkutsk State Transport University, Russia
Title: Enhancing LEED as a sustainable rating system by applying its regional priority for all environmental regions
Wael Ahmed Abonema, Helwan University, Egypt

Lunch Break @ Windsor-III

Title: Reliability and cost effectiveness of spacecraft attitude and orbit monitoring
Tamer Mekky Ahmed Habib, National Authority for Remote Sensing and Space Sciences, Egypt
Title: Mitigating the effects of rain-induced fading in Ka-band satellite video broadcast system using time diversity in concert with maximal ratio combining
Leshan Uggalla, University of South Wales, UK
Title: Estimating total suspended sediment (TSS) budget of a freshwater lake using remote sensing
Essayas Kaba Ayana, Columbia University, Columbia
Title: Conceptual design of manned space transportation vehicle using laser thruster in combination with H-II rocket
Yoshinari Minami, Advanced Science-Technology Research Organization, Japan
Title: Electrodynamics of new submillimeter transmission lines based on flat waveguide splitters
Alexander G. Yushchenko, National Technical University, Ukraine

Panel Discussion
