B2B Meetings

Dear Attendees,

We are glad to announce the **9th International Conference on Neurological Disorders and Stroke** to be held in **Rome, Italy** during **May 16-17, 2024** organized by Conference Series llc LTD, Europe in the collaboration with generous support and cooperation from enthusiastic academicians and editoirial Board Members. **Stroke Global-2024** is centered with the theme "Neurorehabilitation: Integrating Technology and Therapeutic Interventions".

Stroke Global-2024 is the gathering of this summit is predicted to be the most important and best dais for all the Neurologists, Surgeons, Nurses, Research Scholars, Business Professionals, Students who are working in the branch of Stroke, Neurology. where you can experience a really sumptuous information and knowledge in the field of Neurological Disorders & Stroke As the premier event, we have developed a program with your interests in mind. We have not only increased the number of opportunities for you to network with colleagues from across the world but also introduced more focused sessions that will feature cutting edge presentations, special panel discussions and livelier interaction with industry leaders and experts. Life is full of give and take. Make it count in your professional life.

Attend the **Stroke Global-2024** to network with your peers, exchange expertise and experiences and arm yourself with the latest information to take your field to the next level.

We look forward to personally welcoming you to Rome, Italy this May.

Sincerely
Stroke Global-2024

About Us

About Conference

We welcome all the participants from all over the world to attend '9th International Conference on Neurological Disorders & Stroke is scheduled on May 16-17, 2024 at Rome, Italy. which will be through on stream and participants like keynote, special sessions, poster, oral presentations will deliver their talk on-stream.

Stroke Global-2024 salient features

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Meet with new vendors and suppliers

How Conference Series Conferences differs from others?

- 3000+ Conferences across the globe in 30+ countries all through the year
- Over 25 Million+ Visitors and 20000+ Unique Visitors per conference
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

Special Issues : All accepted abstracts will be published inrespective Conference Series llc LTD Journals
Each abstract will be provided with digital Object Identifier by Crossref

Stroke Global-2024

Goals

- The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration. The goals of the conference are to provide a transformative professional development experience.
- Bringing together the world's scientific experts to catalyze and advance scientific knowledge about Medical Imaging and Clinical Research present the most recent research findings, and promote and enhance scientific collaborations around the world.
- Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address regional, national and local responses to Elderly Population around the world and overcome barriers that limit access to care and services.

Objectives

After participating in this meeting, attendees should be able to

- Discuss emerging issues in Neurological Disorders.
- Discuss and apply recent research findings related to Neurological Disorders.
- Reflect on the place of critical distance in research of Neurological Disorders.

Who Should Attend?

Stroke Global-2024 mainly focuses on the latest diagnostic and therapeutic techniques for Neurology. This clinical Neurology conference discusses the latest research outcomes and technological advancements in the field and brings together leading Neurologists, surgeons, physicians, research scholars, students along with industrial and pharma professionals to exchange share their views on critical aspects of stroke research. This Neurology conference brings together Presidents and Eminent Personalities to explore opportunities on emerging platforms in the field of Neurological Disorders & Stroke.

About Conference

About hosting organization

Neurology is the world's leading specialist in organizing Academic, Scientific and Business conferences, meetings, symposiums and exhibitions in different verticals and horizontals like Medical, Pharma, Engineering, Science, Technology and Business to promote scientific research. Every year we host more than 3000+ global events inclusive of 1000+ Conferences 1000+ Symposiums 1000+ Workshops in USA, Europe, Middle East and Asia with the generous support and cooperation from our 30000+ Editorial Board Members, 1000+ Scientific Societies. All the conference proceedings are published in the special issues of our 700+ Open Access International Journals with the DOI provided by Crossref

Major Sessions

- Neuroinflammation and Neurological Disorders: Mechanisms, Impact, and Therapeutic Strategies
- Precision Medicine in Neurology: Personalized Approaches for Optimal Patient Caret
- Advances in Neuroimaging Technologies: Unraveling the Intricacies of the Brain
- Neurogenetics and Neurological Disorders: From Genes to Clinical Practice
- Emerging Therapies for Neurodegenerative Diseases: Exploring Novel Treatment Approaches
- Neuroplasticity and Brain Rehabilitation: Harnessing the Power of Neural Rewiring
- Stroke Prevention and Rehabilitation: Integrating Evidence-based Strategies
- Neurological Disorders in Pediatric Populations: Diagnosis, Management, and Future Perspectives
- Cognitive Impairment in Neurological Disorders: From Assessment to Intervention
- Innovative Approaches in Neurological Surgery: Advancements and Outcomes
- Neural Stem Cells and Regenerative Medicine: Potential Applications in Neurological Disorders
- Translational Neuroscience: Bridging the Gap between Research and Clinical Practice

About Rome

Italy or the Republic of Italy is a country in Southern and Western Europe. Located in the middle of the Mediterranean Sea, it consists of a peninsula delimited by the Alps and surrounded by several islands. Italy shares land borders with France, Switzerland, Austria, Slovenia and the enclaved microstates of Vatican City and San Marino. It has a territorial exclave in Switzerland (Campione) and an archipelago in the African Plate (Pelagie Islands). Italy covers an area of 301,340 km2 (116,350 sq mi), with a population of nearly 60 million;it is the tenth-largest country by land area in the European continent and the third-most populous member state of the European Union. Its capital and largest city is Rome.

The Italian peninsula was historically the native place and destination of numerous ancient peoples. The Latin city of Rome in central Italy, founded as a Kingdom, became a Republic that conquered the Mediterranean world and ruled it for centuries as an Empire. With the spread of Christianity, Rome became the seat of the Catholic Church and of the Papacy. During the Early Middle Ages, Italy experienced the fall of the Western Roman Empire and inward migration from Germanic tribes. By the 11th century, Italian city-states and maritime republics expanded, bringing renewed prosperity through commerce and laying the groundwork for modern capitalism. The Italian Renaissance flourished in Florence during the 15th and 16th centuries and spread to the rest of Europe. Italian explorers also discovered new routes to the Far East and the New World, helping to usher in the European Age of Discovery. However, centuries of rivalry and infighting between the Italian city-states among other factors left the peninsula divided into numerous states until the late modern period.
