Urology 2019 - Market Analysis

SUMMARY OF UROLOGY AND NEPHROLOGICAL DISORDERS

Urology and Nephrology Conference aims to provide a unique scientific and technical platform to share the research experiences among the best-available experts and professionals from all over the world engaged in different fields of Urology and Nephrology. It has so far been an important event and has attracted many scientists, engineers and researchers from academia and industry internationally. The important features of this conference are an opening session, topical sessions with keynote addresses and oral contributions, well organized workshops, symposium, poster presentations and world class exhibits, panel discussions & interactive sessions, collaborative research opportunities. Urologic disease is any congenital or acquired dysfunction of the urinary system. Kidney diseases are normally investigated and treated by nephrologists, while the specialty of urology deals with problems in the other organs. Gynecologists may deal with problems of incontinence in women. Diseases of other bodily systems also have a direct effect on urogenital function. For instance, it has been shown that protein released by the kidneys in diabetes mellitus sensitizes the kidney to the damaging effects of hypertension. Diabetes also can have a direct effect on urination due to peripheral neuropathies, which occur in some individuals with poorly controlled diabetics. The field of nephrology is a subspecialty of internal medicine, and its main focus is diagnosing and managing diseases that affect the way kidneys function. There are many kinds of these diseases, several of which relate to hypertension, or high blood pressure. There are certain conditions that can be treated by both a urologist and a nephrologist, but there are many specific to urology. Urologists focus on treating anatomical or structural problems of the urinary tract and its related organs.

WHY INDONESIA?

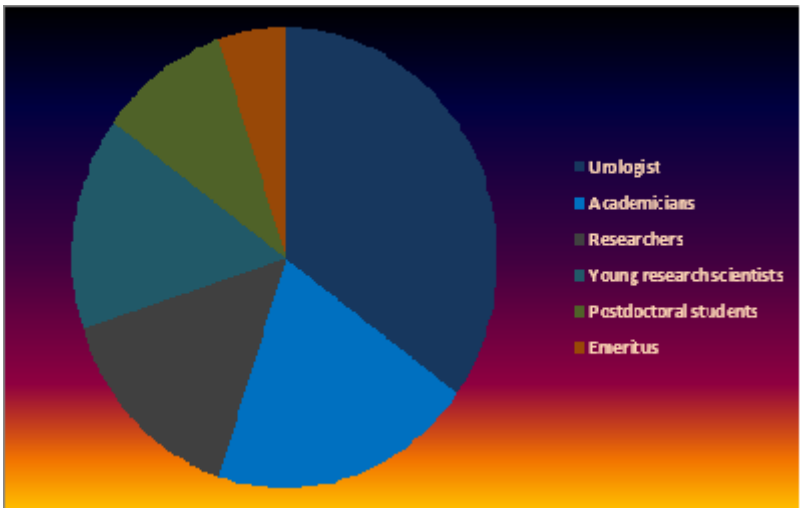

The Indonesian national motto “Unity in Diversity” points to one of the greatest attractions of your host country, Indonesia. There are some 300 ethnic groups, a result of both the country's unique geography and history. Many Indonesians may see themselves first by their ethnic and cultural group and secondly as Indonesians. Indonesia is officially the Republic of Indonesia. It is a unitary sovereign state and transcontinental country located mainly in Southeast Asia with some territories in Oceania, situated between the Indian and Pacific oceans, it is the world’s largest island country, with more than seventeen thousand islands. At 1,904,569 square kilometers (735,358 square miles) Indonesia is a 14th- largest country in terms of combines sea and land area. It has an estimated population of over 260 million people and is the world’s most populous country, the most populous Austronesian nation, as well as the most populous island, Java, contains more than half of the country’s population. Indonesia’s republican form of government includes an elected legislature and president. Indonesia has 34 provinces, of which five have Special Administrative status. Its capital and country's most populous city is Jakarta, which is also the most populous city in Southeast Asia.

CONFERENCE HIGHLIGHTS:

- Nephrology Medicine
- Pediatric Nephrology
- Clinical Nephrology
- Kidney Transplantation
- Surgery for Renal Diseases
- Chronic Kidney Disease
- Nephrology Nursing
- Cardio Renal Failure
- Renal Nutrition & Metabolism
- Urinary Tract Infection
- Diabetic Nephropathy & Hypertension
- Dialysis
- Renal Cancers and Diseases
- Mineral and Bone Disorders
- Urology
- Kidney and Bladder Stones
- Nursing and Health Care
- Kidney Cancer
- Nephrology & Therapeutics
- Diagnosis of Kidney Disease

MEMBERS ASSOCIATED IN UROLOGY & NEPHROLOGY

- Urologist
- Researchers
- Postdoctoral students
- Academicians
- Emeritus
- Young research scientists

TOP UNIVERSITIES IN INDONESIA

- Andalas University
- Gajah Mada University
- Sebelas Maret University
- Udayana University
- University of Diponegoro
- University of Hasanuddin
- University of Indonesia
- University of Lampung University
- University of Padjajaran
- University of Sriwijaya

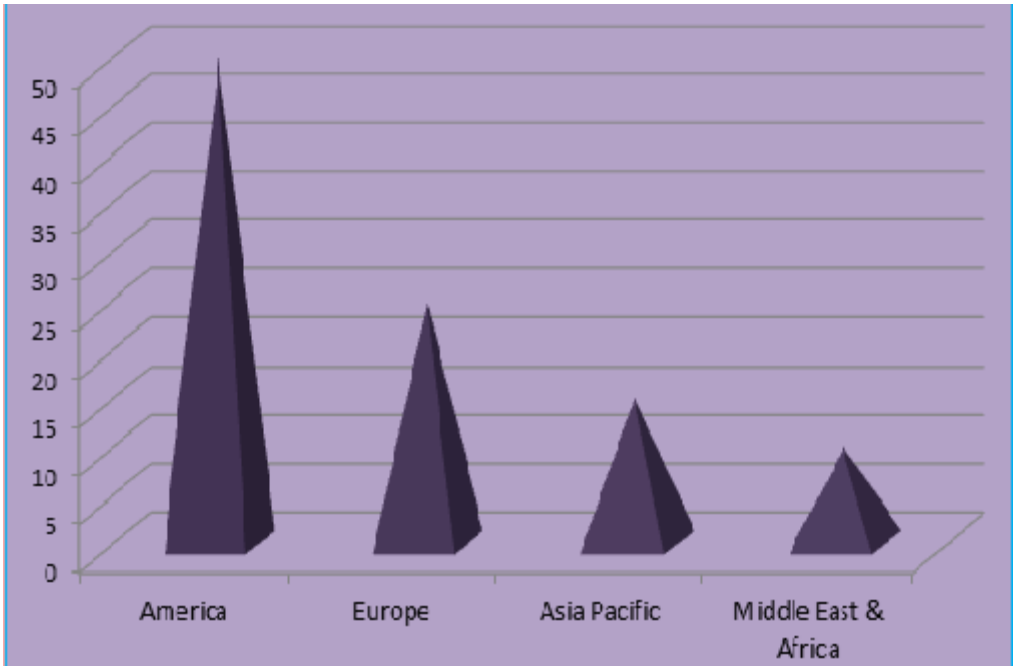

TOP HOSPITALS IN INDONESIA

- Dr. Cipto Mangunkusumo National General Hospital, Jakarta
- Santosa Hospital, Bandung
- Bali International Medical Center, Bali
- Dr. Sardjito General Hospital, Yogyakarta
- Eka Hospital, Tangerang

MARKET GROWTH OF UROLOGY RESEARCH

A urological device market includes devices used in the treatment of the male reproductive tract and the male and female urinary tracts. While segment-specific market dynamics will differ in the urological device market, overall demand for minimally invasive treatments—combined with ongoing product innovation and the aging population will continue to produce a demand for urological devices globally.

Urinary tract is the one of the vital system of the body. A urological disease includes kidney diseases, prostate problems, urinary tract infections, bladder control problems, and others. Different types of urological devices are present in the market and continuous development is being carried out to develop innovative and better instruments for the treatments. The global urology devices market is driven by rapid development in the medical devices, launch of new devices, and rising prevalence of urological diseases. Furthermore, increasing occurrence of diabetes, cardiovascular diseases & obesity, rising geriatric population, and high healthcare expenditure have fueled the market growth. However, poor reimbursement policies, is the major obstacle in the growth of market.

FUNDING OPPORTUNITIES

All our work is funded by charitable donations. Donors include institutions, organizations and individuals. All who donate towards a specific project receive reports on the progress of that project. Indonesia is the fourth largest country in the world is home to more than 195 million people. Indigenous tribes still exist in Borneo to Iran Jaya in Eastern Indonesia. The presence of their pagan a vestry can still be seen, heard and felt by those who dare to breach the tourist frontiers. While much of Indonesia's allure lies in its rich cultural tapestry and untamed wilderness, its cities and resorts are also famed for world-class visitor facilities. Divers are a fast growing breed of special visitors to Indonesia's many shores. We acknowledge below our key donors and/or sponsors whose contributions – whether in cash or kind – have been most significant in furthering the goals of East Bali Poverty Project. We also have many expert volunteers (Indonesian and foreign) in every aspect of the project, who are too numerous to mention here.
