About Tokyo

Japan is a world apart – a cultural Galápagos where a unique civilization blossomed, and today thrives in contrasts of traditional and modern. It is the seat of the Emperor of Japan and the Japanese government. Tokyo has numerous outlying islands, which extend as far as 1,850 km (1,150 mi) from central Tokyo. The islands in order from closest to Tokyo are Izu Ōshima, Toshima, Nii-jima, Shikine-jima, Kōzu-shima, Miyake-jima, Mikurajima, Hachijō-jima, and Aogashima. The Japanese spirit is strong, warm and incredibly welcoming. Japan is a leading nation in scientific research, particularly technology, machinery and biomedical research. Tokyo is a major international finance center, houses the headquarters of several of the world's largest investment banks and insurance companies, and serves as a hub for Japan's transportation, publishing, electronics and broadcasting industries. Tourism in Tokyo is also a contributor to the economy. In 2006, 4.81 million foreigners and 420 million Japanese visits to Tokyo were made; the economic value of these visits totaled 9.4 trillion yen according to the government of Tokyo

Japan drives the world in apply autonomy generation and utilize. Tokyo was assessed in Research and Development as it were. Tokyo is developing its immunizations pipeline, including R&D Projects for dengue and chikungunya. Tokyo performs above average in Research and Development and has clear access arrangements for its late-organize antibody applicant.
