Vision & Plan

International Market Approach

The market analysis of vaccines is expected to grow from USD 36.45 billion in 2018 to USD 50.42 billion by 2023, at a CAGR of 6.7% from 2018 to 2023. Market growth have been developing due to the high prevalence of infectious diseases, growing support for vaccine R&D, investments to vaccine development and high focus on immunization. Government organizations and health care organizations have increased funding for accelerating the development of advanced infrastructure for vaccine production. The key factor for increasing market growth is a high availability of funding for vaccine R&D because it will ensure the introduction of new, advanced and effective products in the coming years.

European Vaccine Market Size and Growth (2019-2024)

Vaccines market in Europe is estimated at $9.99 Billion in 2019 and is assured to reach $17.83 billion by 2024 with an annual growth rate of 12.28%. Due to more number of Cancer and HIV cases the market rate of vaccine has been increased. World Health Organization(WHO) estimate that the vaccine market value will increase up to almost 17.83 billion in 2023, due to arrival of new therapeutic preventive and adult vaccines.
