29TH INTERNATIONAL CONFERENCE ON
VACCINES AND IMMUNIZATION

March 19-20, 2018 // London, UK

29th International Conference on Vaccines and Immunization

London, UK

March 19-20, 2018

vaccinessummit@conferenceseries.net

Vaccines Summit 2018

Invitation

Dear Attendees,

We are glad to announce the **29th International Conference on Vaccines and Immunization** to be held in **London, UK** from **March 19-20, 2018** organized by **Conference Series** in collaboration with generous support and cooperation from enthusiastic academicians and editorial Board Members.

Vaccines Summit 2018 conference features highly enlightening and interactive sessions to encourage the exchange of ideas across a wide range of disciplines in the field of Vaccination and Therapeutics. The conference includes explicit keynote talks from distinguished scientists, plenary sessions, Poster competition, Young Researcher sessions, Symposiums, Workshop and Exhibitions. The conference highlights the theme **Highlights of latest technologies and innovations in Vaccines and Immunization** covering all important aspects in Vaccines and therapeutics.

As the premier event, we have developed a program with your interests in mind. We have not only increased the number of opportunities for you to network with colleagues from across the world but also introduced more focused sessions that will feature cutting edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

Life is full of give and take. Make it count in your professional life. Attend the Vaccines and Immunization Conference to network with your peers, exchange expertise and experiences, and arm yourself with the latest information to take your department to the next level.

We look forward to personally welcoming you to **London**

Sincerely,
Organizing Committee
Vaccines Summit 2018

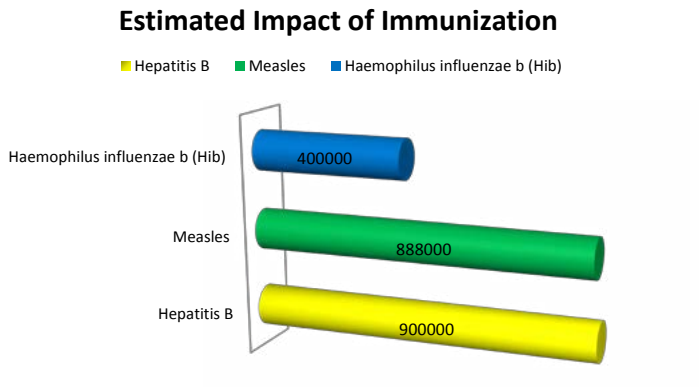

Market Analysis Report

The global vaccines market is expected to be worth $2.85 billion by the end of 2020, with North America being the largest market with more than 36% share, according to a new report from Mordor Intelligence.

The report “Global Therapeutic Vaccines Market – Growth, Trends & Forecasts (2015-2020)”, found that the market is expected to expand at a compound annual growth rate (CAGR) of 44.6% during the period. The market is dominated by five major players: French drug major Sanofi’s (Euronext: SAN) vaccine unit Sanofi Pasteur, UK pharma major GlaxoSmithKline (LSE: GSK), US pharma giants Merck & Co (NYSE: MRK) and Pfizer (NYSE: PFE), and Swiss pharma major Novartis (NOVN: VX).

However, there has been rapid growth over recent years, with the vaccine market quadrupling in value from $87 million in 2011 to almost $312 million in 2014, according to various sources. The World Health Organization’s growth estimations indicate the market may increase in value to almost $3.2 billion 2020, with the arrival of new preventive, therapeutic and adult vaccines.

Market Value and Market Growth on Vaccines Research in the Past and Upcoming 10 Years:

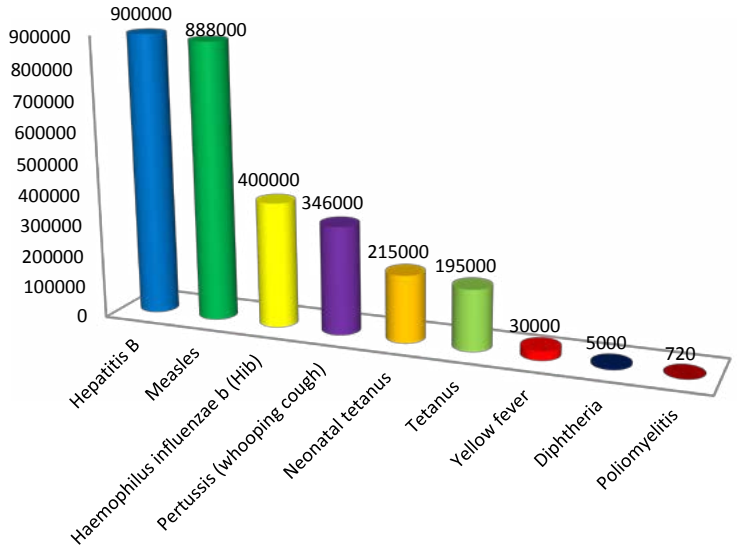

The global vaccine market is one of the fastest growing segments and new predictions estimate the value of the market to reach between $48 billion and more than $70 billion over the next five to eight years.

According to a new report released by Transparency Market Research, the value of the global human vaccines market is expected to grow from a $28.3 billion in 2015 to $72.5 billion in 2024. The projection would represent a compound annual growth rate (CAGR) of 11.2% from 2016 to 2024. Even though the dollar figure is large and growing, vaccines still only account 3% of the market share within the global pharmaceutical industry.

The report broke down expectations by segments. By age group, paediatric vaccines accounted for 57.5% of the share in 2015, but adult vaccines are expected to grow at a 13.2% CAGR during the forecast period.

When the research group analysed the market by product, they found the pneumococcal segment to have the majority share in 2015, but expect hepatitis products to demonstrate strong growth through 2024. By vaccine type, the conjugate vaccines held the majority share in 2015, but the combination vaccines were expected to have the largest CAGR.

Projections

The global market for vaccines has reported an impressive development in its market valuation, thanks to the increasing rate of birth globally. The rising incidence of diseases such as polio, influenza, hepatitis has also fuelled demand from the global vaccines market to a great extent. The vaccines segment dominates the global vaccine products market. The market for live attenuated vaccines has registered the highest growth among all the segments, based on technology. By diseases, the infectious diseases segment has occupied the leading position at present. However, the rising prevalence of cancer, specifically Leukaemia, in kids is projected to register the fastest growth in this market in the coming years. This will further boost the global market for vaccines in the near future. The market for vaccines in Asia Pacific is likely to report the fastest growth during the period from 2012 to 2018 owing to the high birth rate in China and India

About Us

Do proper alignment to whole paget

- **700+ Leading**-edge Peer Reviewed Open Access Journals
- **21 Day** Rapid Review Process
- **50000+** Editorial Board Team, **35000+** Reviewers team
- **30 Million Readers** and High Visibility
- **1000+ Scientific Associations** Collaborations
- **100000+** facebook fans Likes
- **Publication** immediately after acceptance
- **Quality and Quick** editorial, review processing

Salient Features

- **Easy to Submit** and Review Systems
- **High Quality** and Fast Publishing Guaranteed
- **Unbiased, quality-oriented,** and transparent reviews
- **Truly impartial recognition** of the best papers
- **Feedback** on the impact of every article
- **Enhanced feature:** Audio version of published paper
- **Digital articles** to share and explore
- **Sharing option:** Social networking enabled
- Authors, reviewers and editors are provided with **scientific credits**
- User friendly/feasible website articles **translations** across more than **50 world languages**

Our International Scientific Conferences

- More than **3000 Conferences** happening across the globe
- Conferences organized in **Medical, Pharma, Engineering, Science, Technology and Business.**
- **CME/CPD Accredited** Conferences fostering professional and Personal development
- **Continuum of education** through organized scientific program
- **Renowned speakers** and scientists representing from **40 countries**
- **Highly Interactive sessions** and Panel Discussions
- **B2B Meetings** offers perfect platform for Global Networking

Salient Features

- Robust on-line publicity for all the speakers and organizing committee members
- Career Guidance Workshops for students and early career researchers
- Accepted Abstracts will be published in various indexed journals
- Accepted abstracts will be labeled with a Digital Object Identification Number (DOI) provided by Cross Ref
- Creation of speakers and abstracts pages in Google
- Opportunity to publish full Manu Scripts in our Open Access Journals

Special Issues : All accepted abstracts will be published inrespective Conference Series Journals

Each abstract will be provided with digital Object Identifier by Crossref

About Conference

- Vaccines Summit 2018 Conference is attracting **25000+ Vaccinologists** ranging from Researchers, Academicians and Business professionals, who are working in this field. This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

How Conference Series Conferences differs from others?

- 3000+ Conferences across the globe in 30+ countries all through the year
- Over 25 Million+ Visitors and 20000+ Unique Visitors per conference
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

Vaccines Summit 2018 salient features

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Meet with new vendors and suppliers

About Conference

Purpose

29th International Conference on Vaccines and Immunization is an arena for interdisciplinary exchange among professionals in the fields of Vaccines and Therapeutics.

Goals

- The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration. The goals of the conference is to provide a transformative professional development experience through
- Bringing together the world's scientific experts to catalyze and advance scientific knowledge in Vaccines and Immunization. 29th International Conference on Vaccines and Immunization present the most recent research findings, and promote and enhance scientific collaborations around the world
- Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address regional, national and local responses to Elderly Population around the world and overcome barriers that limit access to care and services.

Objectives

After participating in this meeting, attendees should be able to

- Discuss emerging issues in Vaccines and Immunization
- Discuss and apply recent research findings related to Vaccines and Immunization
- Reflect on the place of critical distance in Vaccines and Immunization

About Conference

Who should attend

29th International Conference on Vaccines and Immunization is exclusively designed for Vaccinologists, Immunologists, Public Health Researchers, Vaccine Policy Makers and Scholars, students along with Business entrepreneurs, Organizations and others engaged in endeavors related to Vaccines research and business.

About hosting organization

Conference Series is the world's leading specialist in organizing Academic, Scientific and Business conferences, meetings, symposiums and exhibitions in different verticals and horizontals like Medical, Pharma, Engineering, Science, Technology and Business to promote scientific research. Every year we host more than **3000+ global events** inclusive of **1000+ Conferences 1000+ Symposiums 1000+ Workshops** in **USA, Europe, Middle East and Asia** with the generous support and cooperation from our **30000+ Editorial Board Members, 1000+ Scientific Societies.** All the conference proceedings are published in the special issues of our **700+ Open Access International Journals** with the **DOI** provided by Crossref

Major sessions

- Human Vaccines against Infectious Diseases
- Cancer, Malaria & TB Vaccines
- HIV Vaccines
- Immunizations & Bioterrorism
- Combination & Conjugate Vaccines
- DNA & Synthetic Vaccines
- Travel & Edible Vaccines
- Paediatric Vaccination
- Vaccines for Immune Mediated Diseases
- Veterinary Vaccines
- Fish & Poultry Vaccines
- Vaccines against Drugs
- Vaccines & Autism
- Vaccine Safety & Efficacy
- Geriatric Immunization
- Vaccines for Pregnant Women & Neonates
- Vaccines for Unconventional Diseases
- Animal Models & Clinical Trails
- Animal & Plant Derived Vaccines
- Vectors, Adjuvants & Delivery Systems
- Vaccine Production & Development
- Cellular Immunology & Latest Innovations
- Antibodies: Engineering & Therapeutics
- Current Research & Future Challenges

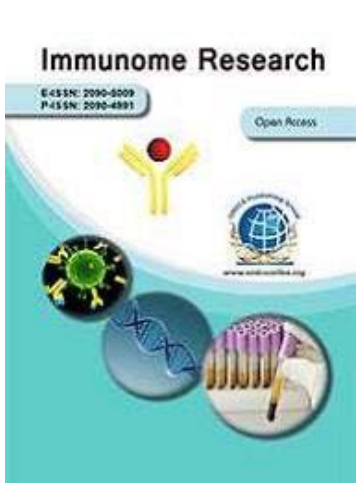

About Conference

Supporting Journals

- Journal of Vaccines & Vaccination
- Journal of Clinical And Cellular Immunology
- Immunome Research

About London

London is the capital and most populous city of England and the United Kingdom. London is a leading global city, in the arts, commerce, education, entertainment, fashion, finance, healthcare, media, professional services, research and development, tourism, and transport. It is one of the world's leading financial centres and has the fifth- or sixth-largest metropolitan area GDP in the world.

This city is the world cultural capital. It is the world's most-visited city as measured by international arrivals and has the world's largest city airport system measured by passenger traffic. London's universities form the largest concentration of higher education institutes in Europe, and a 2014 report placed it first in the world university rankings. According to the report London also ranks first in the world in software, multimedia development and design, and shares first position in technology readiness.

It has the greatest concentration of top class universities in the world and its international student population of around 110,000 is larger than any other city in the world. London is home to five major medical schools – Barts and The London School of Medicine and Dentistry, King's College London School of Medicine (the largest medical school in Europe), Imperial College School of Medicine, UCL Medical School and St George's, University of London – and has a large number of affiliated teaching hospitals. It is also a major centre for biomedical research, and three of the UK's eight academic health science centres are based in the city – Imperial College Healthcare, King's Health Partners and UCL Partners (the largest such centre in Europe).
