Market Analysis

The overall global analytical chemistry market was valued at US $ 4.68 Billion in the year 2016 and is expected to grow at a growth rate of 6.6% to reach US $ 6.85 Billion by the year 2022. The extension of overall molecular spectroscopy market can be attributed to the growing concerns of food safety, growth of the pharmaceutical and biotechnology industry, use of molecular spectroscopic technique in environmental screening. In the coming years, North America is expected to account for the largest share of the global molecular spectroscopy market. However, the elevated cost of equipment is likely to restrain the growth of the market during the forecast period. The base year taken for the survey report is 2016 and the forecast period includes 2017–2022.

The market analysis for electrophoresis is going to reach USD 2.80 Billion by 2022 from USD 2.15 Billion in 2017, at a CAGR of 5.4%. The growth of this market is majorly driven by the increasing research activities in the fields of proteomics and genomics, changing regulatory requirements in the pharmaceutical sector, and the growing need to curtail healthcare costs.
