About Barceolona

Barcelona is one of the world's leading green cities and has revolutionized the ways in which the government, businesses and residents work together to promote and enhance sustainable lifestyles throughout the city. Barcelona especially practices energy conservation and has been extremely successful. It is the benchmark city for any other municipality looking to better the environment and work towards a more energy efficient community. Barcelona's efforts influence the rest of Europe and have convinced other countries and the EU to make bigger efforts in the area of sustainability and solar energy. Through several agencies and a well planned strategy for widespread energy conservation, Barcelona activists have been able to reach the corporate and residential world and create a solar powered city that the rest of the world should admire. Barcelona's location and the nature of the city affect the city's success when it comes to solar energy and overall sustainability. Barcelona has always found a way to close the gap between the rich and poor so that everyone can be included in the city's efforts to become more sustainable.
