Tentative Program

3rd International Conference and Business Expo on

Wireless & Telecommunication

July 20-21, 2017 Munich, Germany

Theme: "Connecting People to Connecting Global"

For Available Speaker Slots

wirelesscommunication@conferenceseries.net

19+ Interactive Sessions

15+ Keynote Lectures

75+ Plenary Lectures

5+ Workshops

Conference Secretariat

2360 Corporate Circle, Suite 400 Henderson, NV 89074-7722, USA

Tel: +1-702-508-5200 Ext: 8047, Fax: +1-650-618-1417, Ph: +1-650-268-9744, Toll free: +1-800-216-6499

Email: wirelesscommunication@conferenceseries.net

Program at A Glance

Day 1

Morning Sessions	Reception/Registration	08.00-09.00	
		Time	General Session
	Least of 3 Keynote/Plenary Talks	09.00-09.15	Inaugural Address
		09.15-09.45	Keynote/Plenary Talk 1
		09.45-10.15	Keynote/Plenary Talk 2
		10.15-10.45	Keynote/Plenary Talk 3
	Panel Discussions/Group Photo		
	Coffee/Tea Break 10.45-11.00 (Networking)		
Evening Sessions	11.00-12.40	5G and Beyond (5 slots available with 20 mins each)	
	Lunch Break 12.40-13.30		
	13.30-15.30	Telecommunication & Wireless Communication	
	Coffee/Tea Break 15.30-15.45 (Networking)		
	15.45-17.25	Wireless Communication & Workshop slot available	

Day 2

	Time	Session 1	Session 2
Morning Sessions	09.00-10.40	Young Research Forum	Internet of Things (IoT)
	Coffee/Tea Break 10.40-10.55 (Networking)		
	10.55-12.35	Cloud Computing	Big Data
	Lunch Break 12.35-13.25		
Evening Sessions	13.25-17.05	4G & 3G	Technology for Wireless
	Ad Hoc and Sensor Networks & Mobile and Wireless Networks		
	Awards & Closing Ceremony		

NOTE: Program Shedule is subject to change with final allotment of the speaker slots

Glimpses of Wireless Conferences

Glimpses of Wireless Conferences

Major Scientific Sessions

- 5G and Beyond
- Telecommunication
- Wireless Communication
- Internet of Things (IoT)
- Cloud Computing
- Big Data
- 3G & 4G
- Technology for Wireless
- Ad Hoc and Sensors Networks
- Mobile and Wireless Network

Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement
- Apart from the judging time you may also be present at the poster to share your research with interested delegates

Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

About Munich

Munich is one of the best cities to organize the 3rd Wireless & Telecommunication Conference. The name of the city is gotten from the Old/Middle High German term Munichen, signifying “by the friars”. It gets from the ministers of the Benedictine request who ran a cloister at the spot that was later to end up the Old Town of Munich; thus the friar portrayed on the city’s jacket of arms. Munich was initially specified in 1158. From 1255 the city was seat of the Bavarian Dukes. Dark furthermore, gold—the shades of the Holy Roman Empire—have been the city’s legitimate hues since the time of Ludwig the Bavarian, when it was a royal habitation. Taking after a last reunification of the Wittelsbachian Duchy of Bavaria, already partitioned and sub-isolated for over 200 years, the town turned into the nation’s sole capital in 1506. Catholic Munich was a social fortress of the Counter-Reformation and a political purpose of difference amid the subsequent Thirty Years’ War, however remained physically untouched regardless of an occupation by the Protestant Swedes; as the townsfolk would rather open the doors of their town than danger attack and practically inescapable obliteration. Like wide parts of the Holy Roman Empire, the zone recouped gradually monetarily.

379th OMICS International Conference

International conference and Business expo on

Wireless Communication

September 21-23, 2015 Baltimore , USA

Scientific Program

Day 1 September 21, 2015

Registrations

Benjamin Banneker

conferenceseries.com

Opening Ceremony

Keynote Forum

Introduction

Title: Location technologies in wireless networks
Norman Shaw, IEEE Standards Association, USA

Coffee Break @ Foyer

Title: Cyber - Physical systems: Reality, dreams, and fantasy
Magdy A Bayoumi, University of Louisiana, USA

Title: Health risks of wireless communication: What do we know, what can we do now, and what should we find out?
Devra Davis, Environmental Health Trust, USA

Lunch Break @ Eden's Landing Restaurant

Track 1: Emerging wireless technologies and application
Track 2: Wireless network
Track 5: Mobile communication & global wireless services
Track 6: Cloud computing & its applications in wireless technology
Track 7: Wireless security
Track 8: Wireless device

Chair: Elizabeth Chang, The Universality of New South Wales, Australia
Co-chair: Bo Ai, Beijing Jiaotong Unviersity, China

Session Introduction

Title: Advances in internet of things and cyber physical systems and its application to smart ship
Elizabeth Chang, The Universality of New South Wales, Australia
Title: Quality-of-service routing protocol for wireless sensor
János Levendovszky, Budapest University of Technology and Economics, Hungary
Title: A Wireless cognitive radio network with a synchronized cooperative relaying
Zaid A Shafeeq, Al-Ahliyya Amman University, Jordan

Coffee Break @ Foyer

Title: Device-To-Device (D2D) communication in 5G cellular networks
Trung-Dinh Han, Samsung Electronics, Vietnam
Title: Efficient power allocations for multicarrier systems
Waleed E Al-Hanafy, Menoufia University, Egypt
Title: Microelectronic sensor for DNA analysis
Abu Asaduzzaman, Wichita State University, USA

Panel Discussion

Day 2 September 22, 2015

Benjamin Banneker

Keynote Forum

Title: Dependable Wireless Communications for High-speed Railway
Bo Ai, Beijing Jiaotong Unviersity, China

Title: Challenges for Cloud Computing to Enable Internet of Things
Ali Kashif Bashir, Osaka University, Japan

Coffee Break @ Foyer

Title: Green computing and wireless communications engineering sustainability
Ezendu Ariwa, University of Bedfordshire, UK

Track 3: Wireless sensors
Track 4: Wireless telecommunication
Track 9: Wireless personal area networks architecture & protocols for multimedia application
Track 10: Wireless green communications
Track 11: Wireless management
Track 12: Wireless energy transfer

Chair: Mehdi Shadaram, The University of Texas, USA
Co-chair: Ali Kashif Bashir, Osaka University, Japan

Session Introduction

Title: Photonic generation of millimeter wave signals for wireless applications
Mehdi Shadaram, The University of Texas, USA

Lunch Break @ Eden's Landing Restaurant

Title: MIMO systems and applications
Mario Marques da Silva, Autonomous University of Lisbon, Portugal
Title: Location technologies in wireless networks
Norman Shaw, IEEE Standards Association, USA
Title: Probabilistic approach to scheduling divisible load on wireless network of processors
Sameer Bataineh, Jordan Univesity of Science and Technology, Jordan

Coffee Break @ Foyer

Title: : Nanomaterials and additive manufacturing for RF, MW and THz devices
Jing Wang, University of South Florida, USA
Title: Sustainability models for private or community wireless networks in remote rural areas of developing countries
Juan A Paco Fernandez, Catholic University of Peru, Peru
Title: Applications of homomorphic cryptography to the internet of things
Mohamed M Hamdi, School of Communication Engineering, Tunisia

Panel Discussion

Day 3 September 23, 2015

Benjamin Banneker

Chair: Ezendu Ariwa, University of Bedfordshire, UK

Special Session on **Green Technology and Social Enterprise Innovation in Wireless Communication professionalism** by **Ezendu Ariwa,** University of Bedfordshire, UK

Coffee Break @ Foyer

Title: Reliable broadcasting in heterogeneous wireless networks
Vamsi Krishna Paruchuri, University of Central Arkansas, USA
Title: Security threats & counter-measures in cloud computing
Falalu Abdulrauf, Zaria Local Government Area, Nigeria

Lunch Break @ Eden's Landing Restaurant

Panel Discussion

Closing Ceremony

Day 1 April 21, 2016

Registrations

conferenceseries.com

Opening Ceremony

Introduction

Title: Network function virtualization deployment in production – models and solution architecture

Dharma Rajan, VMware Inc., USA

Title: Developing a user-based model of quality of experience for the internet of things

Donghee Shin & Min Ho Ju, Sungkyunkwan University, South Korea

Coffee Break

Title: Intelligent situational awareness powered by internet of things and human-centred recommender systems

Elizabeth Chang, Australian Defense, AUS

Title: How to capture, analyse and react on IoT generated sensor data in real time

Romeo Kienzler, IBM Watson IoT, Switzerland

Group Photo

5G and Beyond | Telecommunication | Wireless Communication | Wireless Models and Simulations | Mobile Networks Protocols and Applications | Green Wireless services | Mobile Computing and IoT | Technology for Wireless | Cloud Computing and Big Data | Multimedia Computing & Communications | Internet Services and Applications | Wireless Networks

Session Chairs: Elizabeth Chang, University of New South Wales, Australia
Session Co-chair: Vijayan K Asari, University of Dayton, USA

Session Introduction

Title: Substrate Integration Waveguide (SIW) antenna and passive front-end design considerations for the 5G transceiver

Konstantinos N. Voudouris, Higher Colleges of Technology, UAE

Title: Dynamic power adjustment for reducing identification time in RFID systems

Tsang-Ling Sheu, National Sun Yat-Sen University, Taiwan

Lunch Break

Title: Hybrid fusion receiving system to improve spectrum monitoring efficiency

Mahesh Nair, Higher Colleges of Technology, Abu Dhabi, UAE

Title: Wireless sensor networks for monitoring coastal erosion

Carlene Campbell, University of Wales Trinity Saint David, UK

Title: MIMO techniques for 5G wireless networks

Huan X. Nguyen, Middlesex University, UK

Title: Internet-of-Things, cyber-physical systems demarcation and contribution to the big data realm

Adel Ben Mnaouer, Canadian University Dubai, UAE

Title: Wireless sensor networks and its applications in surveillance

Khelifa Benahmed, University of Tahri Mohammed, Bechar-Algeria

Coffee Break

Title: Intelligent situational awareness powered by internet of things and human-centred recommender systems

Daniel Prior, UNSW Canberra, AUS

Title: Mechanism for securing IEEE 802.11s routing protocols

Yesica Imelda Saavedra Benitez, The National Institute of Technology, Mexico

Title: Network enabled feature search on distributed servers around the world for human identification in video sequences

Vijayan K Asari, University of Dayton, USA

Title: GForces' NetDirector Footfall

Sendos Mohamad, GForces, UAE

Day 2 April 22, 2016

Grand Hall A

Keynote Forum

Title: Automatic pipeline threat detection by aerial surveillance

Vijayan K Asari, University of Dayton, USA

Title: Well-iris is a new wellness program

Issa SALIM, Rashid Hospital, UAE

Title: Millimeter-wave multiband RFIC chips for next-generation communications and sensing systems

Cam Nguyen, Texas A&M University, USA

Communication in Defence and Aviation | Wireless Sensors & Actuators Networks | Access Point | ADSL | Broadband and Wifi | Bluetooth | Computer Networks & Wifi Extender | 3G & 4G internet | Mobile & Communication | Wimax | Ethernet, Modem, Router, Wifi Router, Wireless Router & Wifi Booster | Communications and Signal Processing

Session Chair: Mario Marques da Silva, Universidade Autónoma de Lisboa, Portugal
Session Co-chair: Vijayan K Asari, University of Dayton, USA

Session Introduction

Title: A MIMO optimization for physical layer security

Mario Marques da Silva, Universidade Autónoma de Lisboa, Portugal

Title: OULU 5G test network – Rationale, structure and rollout

Ari Pouttu, University of Oulu, Finland

Coffee Break

Title: Wireless Friendly and Energy Efficient Buildings (WiFEEB)

Hasim Altan, British University in Dubai, UAE

Title: Bridging the Gap: Differential modulation in cooperative communications

Sara AlMaeeni, Khalifa University, AbuDhabi, UAE

Title: Modeling and optimizing mechanical properties of FSW thick pure copper plates utilizing Artificial Intelligent techniques

Aydin Azizi, University of Technology in Oman

Title: Using 3D virtual environment as an educational tool in a Middle Eastern University

Ahmad F Shubita, University of Petra, Jordan

Lunch Break

Title: Efficient distributed localization algorithm for ownership identification of reindeer calf using wireless sensor networks

Gemma Morral Adell, Tromso University, Norway

Title: Internet of Things (IoT) and its application in oil industry

Jahangir Dadkhah Chimeh, Telecommunication Research center, Iran

Title: Comparison of submerged and floating wireless sensor networks for monitoring underwater sediment transport

Archie Watt, University of Wales Trinity Saint David, UK

Title: Ultralow power wireless transceivers for IoT

Mihai Sanduleanu, Masdar Institute of Science and Technology, UAE

Coffee Break

Poster Presentations 16:10-17:10

Title: Integrated broadband power line and visible light communication (VLC) system using OFDM and Turbo code

Nader Nassar, University of Wollongong, Dubai

Title: Efficient distributed localization algorithm for ownership identification of reindeer calf using wireless

Samavia Rizwan, University of Wollongong, Dubai

Title: Low-complexity channel estimation in massive MIMO wireless communication systems

Yassine El Mouden, University of Wollongong, Dubai

Title: Comparison of different modulation techniques in a VLC environment

Luke McShine, University of Wollongong, Dubai

Title: Biomedical sensing data transmission using VLC systems

Ilyass Elataoui, University of Wollongong, Dubai

Title: Dimming control in visible light communication

Afrah Ali, University of Wollongong, Dubai

Title: Underwater communication system for divers using

Ayesha Adnan, University of Wollongong, Dubai

Title: An adaptive FIR filter for a high speed VLC system

Nour El Sayed, University of Wollongong, Dubai

Title: GraceWarn mobile application

Amro Mosaad, Canadian University Dubai, UAE

Title: Efficient distributed localization algorithm for ownership identification of reindeer calf using wireless sensor networks

Gemma Morral Adell, The Arctic University of Norway, Norway

Panel Discussion

Awards & Closing Ceremony 17:10-17:20
