Invitation

Invitation Dear Colleagues, Womens Health Meet 2022 cordially welcomes you to attend the 12th International Conference on Women's Health and Cancer Cure which is going to be held in Rome, Italy during December 05-06, 2022. We would like to invite all the participants who are interested in sharing their knowledge and research in the area of Women's Health & Cancer Cure. The conference anticipates more than 500 participants around the globe with thought provoking keynote lectures, oral presentations, and poster presentations. This is an excellent opportunity for the delegates from universities and institutes to interact with the world class scientists and share their research. The main theme of the conference is "Empowering and creating opportunities for every woman to establish a healthy future". The interested participants can confirm their participation by registering for the conference along with their colleagues. We look forward to seeing you in Rome, Italy this December. Sincerely, Womens Health Meet 2022 Organizing Committee.

What is Womens Health Meet 2022?

The Women's Health Meet 2022 aims to discuss a comprehensive overview of the latest developments, innovations, challenges, and strategies in the arena of Women's Health ranging from Reproductive Medicine, Gynecology, Gynecologic Oncology, Maternal & fetal health, female infertility, In Vitro Fertilization (IVF), Intrauterine insemination (IUI), operative gynecology, cancer cure and many more. Many eminent Gynecologists, Fertility specialists, researchers, scientists, and experts from both the Hospitals, Academia, and Industries will participate in this Women's Health Congress to share their research experience via presentations, interactive case studies, Workshops, Symposiums, Oral Presentations, Poster Presentations, One to one meetings, Networking sessions, e-posters, and Plenary sessions, B2B, etc. To recognize the Young Researchers and expert individuals who exhibited outstanding research in the area of Gynaecology, Obstetrics, Reproductive Medicines, and other related expertise in Women's Health, the Women's Health Meet 2022 Conference is planned to present the Young Research award through its Young Researcher Forum (YRF), Best Poster Award, and Best Presentation Award.

Who are attending?

Doctors, Physician, Women's Healthcare Students, Breast Cancer Surgeons, Gynecologic Oncologists, Pathologists, Obstetricians, Women's Healthcare Researchers, Healthcare Faculty, Medical Colleges, Business Entrepreneurs, Training Institutes, Software Developing Companies, Medical Devices Manufacturing Companies, Data Management Companies, Cancer research Students, Gynecological Pathologists, Directors of Maternity Hospitals, Infertility specialists, Heads of the Obstetrics & Gynecology Departments, Cancer research Scientists, Pharmaceutical Companies, Radiologists, Students of Medicine Disciplines, Cancer Associations and Societies, Healthcare Scientists, Women health care center administrators, Centres for Disease Control and Prevention, Pharma Entrepreneurs, Nursing scholars, Health care systems, Hospitals, Associations and Societies.

Major Sessions

- Health risks associated with Surrogacy
- Women Oncology Rehabilitation and Pregnancy
- Avoidance of Miscarriage and Abortion
- Nutritional importance for Mental Growth in Women
- Impact of Cancer Treatment on Reproductive Health and Fertility
- Impact of Gender Differentiation and Women Abuse on Mental Health

Host City

Rome is a city and special commune in Italy. Rome is the capital of Italy and also of the homonymous province and of the region of Lazio. With 2.7 million residents in 1,285.3 km2 (496.3 sq mi), it is also the country's largest and most populated commune and the fourth-most populous city in the European Union by population within city limits. The urban area of Rome extends beyond the administrative city limits with a population of around 3.8 million. Between 3.2 and 4.2 million people live in Rome metropolitan area. The city is located in the central-western portion of the Italian Peninsula, on the Tiber within Lazio (Latium). Rome is the only city in the world to contain in its interior a whole state; the enclave of Vatican City. Rome has the status of a global city. Rome was the 11th-most-visited city in the world, 3rd most visited in the European Union, and the most popular tourist attraction in Italy. The city is one of Europe's and the world's most successful city "brands", both in terms of reputation and assets.

Its historic centre is listed by UNESCO as a World Heritage Site. Monuments and museums such as the Vatican Museums and the Colosseum are among the world's most visited tourist destinations with both locations receiving millions of tourists a year. Rome hosted the 1960 Summer Olympics. Although associated today only with Latin, ancient Rome was in fact multilingual. In highest antiquity, Sabine tribes shared the area of what is today Rome with Latin tribes. The Sabine language was one of the Italic group of ancient Italian languages, along with Etruscan, which would have been the main language of the last three kings who ruled the city till the founding of the Republic in 509 BC. Urganilla, or Plautia Urgulanilla, wife of Emperor Claudius, is thought to have been a speaker of Etruscan many centuries after this date, according to Suetonius' entry on Claudius. However Latin, in various evolving forms, was the main language of classical Rome, but as the city had immigrants, slaves, residents, ambassadors from many parts of the world it was also multilingual

Vision & Plan

International Market Approach

The global gynaecological devices market is marked by a high degree of fragmentation due to the presence of numerous large manufacturers, reports Transparency Market Research (TMR) in a new business intelligence study. This leaves ample scope for market consolidation in the near future. Top companies like Boston Scientific Corporation, Cooper Surgical, and Olympus Corporation hold distinction on account of their widespread product portfolio and geographical outreach. These companies are struggling to introduce non-invasive devices to serve a larger consumer base which will eventually help expand their geographical outreach. The increasing demand for medical help for women-centric health issues is bringing in immense scope for growth in the gynaecological device market. The small regional players play an important role and hold a significantly higher share in the gynaecological device market. The increasing entry barriers and stringent rules and regulations for the approval of a product are limiting the entry of new companies. Insufficient funding from venture capitalists is also creating a challenging situation for the entrance of newer companies. As per projections of a TMR report, the global gynaecological devices market will clock 4.8% CAGR between 2017 and 2023. This will translate opportunities in the market to generate revenue of US$22,589.9 mn by 2023 from US$17,015.9 mn in 2017. In terms of device type, gynaecological surgical devices

hold prominence in the market. The rising prevalence of single incision laparoscopic surgeries and advances in conventional endoscopic surgeries account for advances in gynaecological surgical instruments. Geography-wise, North America is a lucrative market for gynaecological devices due to the early adoption of advanced gynaecological devices

Tentative Agenda

Day 1 / December 05, 2022

SESSION

Opening Ceremony

Introduction

Keynote Presentations

Morning Break
