# ABOUT VENUE

The Emirate of Dubai is the second largest of the seven United Arab Emirates but has the largest population with over 3.33 million inhabitants as of Sept.2019. Size has been synonymous with Dubai as it continues to push the boundaries of construction. Dubai's cityscape is always transient and ever-changing with its constant urge to construct bigger and better than before. If there was a Palm Island, Nakheel thought of the World Island. Burj Al Arab was eclipsed when Burj Khalifa cropped up.

Dubai is an extravagant city, which pushes the limits on its architecture and its cultural diversions. The Burj Khalifa, at a height of 828 metres (2,716 feet) and more than 160 stories, is currently the tallest building in the world, though two towers under construction - one in Jeddah and one in Dubai - will top it when they open in 2019 and 2020. The Palm Jumeirah, the first completed of three planned Palm Islands in Dubai, is the world's largest artificial island, and includes high-end housing and hotels. The Dubai World Cup is the richest horse race in the world. Dubai has even built a ski-hill in a mall.

Dubai constantly competes with itself, trying to magnetize tourists to a dream-like world of attractions. This drive is clearly visible in its tourist attractions, landmarks, shopping centres, parks and hotels. Dubai's economy is based on tourism, banking, and the development of industry-specific zones for different economic activity, such as healthcare services, media, financial services, technology, etc.
