ABOUT LONDON

London is the capital and largest city of England and the United Kingdom, with a population of just under 9 million.[1] It stands on the River Thames in south-east England at the head of a 50-mile (80 km) estuary down to the North Sea, and has been a major settlement for two millennia.[9] The City of London, its ancient core and financial centre, was founded by the Romans as Londinium and retains its medieval boundaries.[note 1][10] The City of Westminster, to the west of the City of London, has for centuries hosted the national government and parliament. Since the 19th century,[11] the name "London" has also referred to the metropolis around this core, historically split between the counties of Middlesex, Essex, Surrey, Kent, and Hertfordshire,[12] which largely comprises Greater London,[13] governed by the Greater London Authority.[note 2][14]

As one of the world's major global cities,[15] London exerts a strong influence on its arts, entertainment, fashion, commerce and finance, education, health care, media, science and technology, tourism, and transport and communications.[16][17] Its GDP (€801.66 billion in 2017) makes it the largest urban economy in Europe,[18] and it is one of the major financial centres in the world. With Europe's largest concentration of higher education institutions,[19] it is home to some of the highest-ranked academic institutions in the world—Imperial College London in natural and applied sciences, the London School of Economics in social sciences, and the comprehensive University College London.[20][21] London is the most visited city in Europe and has the busiest city airport system in the world.[22] The London Underground is the oldest rapid transit system in the world.[23] London is home to the most 5-star hotels of any city.
