About Paris

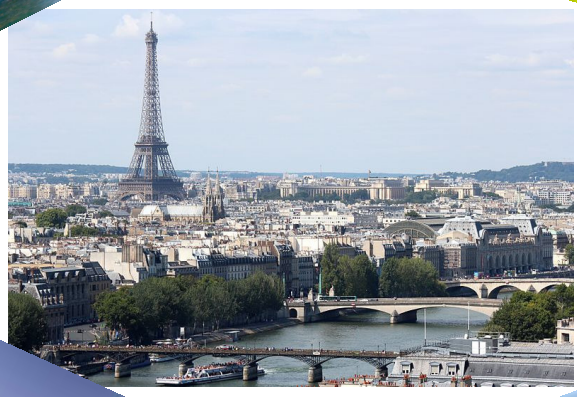

Paris is the capital and most popular city of France. Paris has been one of Europe's centers of Finance, Commerce, Fashion, Science and Arts. Paris is especially known for its museums and architecture landmarks. It was ranked 3rd most visited travel destination in the world in 2018. Paris is often referred to the city of light, both because of its leading role during the Age of Enlightenment and more literally because Paris was one of the 1st large European cities to use gas street lighting on a grand scale on its boulevards and monuments. Paris has typical western European oceanic climate which is affected by the north Atlantic current.
