Dear Colleagues!!

On behalf of World Optometry 2018 Organizing Committee, we would like to take an immense pleasure and honor to welcome optometrists, ophthalmologist , researchers, professors, scientific communities, therapists, delegates, students, business professionals and executives to attend the upcoming 18th World Congress on Optometry and Vision Science which is to be held during September 26-27, 2018 at Montreal, Canada.

Theme: Ophthalmologist's Outlook: Breaking the Barriers in Eye Research through Clinical and Academic Advancements.

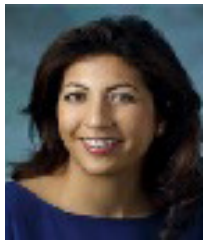

Optometry plays a vital role in detection of eye diseases. As this World Optometry 2018 conference aims to highlight the links between eye health and systemic health. The optometrist is well placed to detect early signs of potential systemic and ocular disease, whilst detailed history and symptoms discussion can allow the practitioner to determine a patient's health and lifestyle choices and needs. By offering advice and support based on this information, an optometrist therefore performs an essential public health function in helping to reduce and prevent vision loss from both ocular and systemic disease.
