Who are Attending

Pediatricians, Pediatric Cardiologists, Pediatric Surgeons, neonatologists, professors, Scientists, post doc/phD students, young researchers, pediatric nurses, pediatric surgery physicians, pediatric and neonatal pharmacologists, Pediatric nutritionists, pediatric oncologists, pediatric nephrologists and all others working in the field today

Major Sessions

Pediatrics
Pediatric Cardiology
Pediatric Oncology
Clinical Pediatrics
Pediatric Care & Nursing
Pediatric Nutrition
Pediatric Infectious Diseases
Preterm-birth Complications and Neonatal Intensive Care
Neonatology
Autism
Pediatric Surgery
Pediatric Dermatology
Advances in Pediatrics
Pediatrics Vaccines
Pediatrics Medical Emergency
Pediatric Psychology
Pediatric Gastroenterology
Pediatric Rheumatology
Pediatric Neurology
Pediatric Radiology
Pediatric Obesity
Pediatric Breast Feeding
Pediatric Hematology
Pediatric Immunology

Supporting Journals

Journals of Pediatric & Therapeutics
JOurnal of Molecular & Genetic Medicine
International Journal of Emergencey Mental Health and Human Resilience

Host City

Paris is the capital and the most populous city of France. One of the most breath-taking works of architecture : The Eiffel Tower, The Notre Dame, Place De La Concorde, Arc De Triomphe, The Louvre, Les Invalides are the most famous pieces of architecture that attracts the tourists to feast their eyes upon in this city.

Paris has been one of Europe's major centers of finance, commerce, fashion, science, music, and painting. The city is a major rail, highway, and air-transport hub served by two international airports. Paris is especially known for its museums and architectural landmarks: the Louvre was the most visited art museum in the world in 2017, with 8.1 million visitors. Paris is a dream place to visit for the art and architecture lovers

Vision & Plan

Pediatric market analysis reports and industry analysis

Pediatrics is the branch of medicine dealing with the care of infants, children and adolescents and the prevention and treatment of their diseases. Although most thinking and analysis of health care is taken from the adult health care system, issues surrounding pediatrics are unique and challenging and should be treated differently than adults. A major challenge the paediatric healthcare community faces is in relation to Medicaid funding. While the cost of health care for most children is relatively low, those who require hospitalization or specialty care experience a tremendous increase in total cost. Additionally, with a focus on preventative medicine, more resources need to be allocated to pediatrics. Medicaid funding for children estimates about 20 percent of total funds, yet children makes up about 60 percent of enrollees. Typically, nursing homes and geriatrics utilize the most Medicaid dollars but for a much smaller population. While healthcare reform is an on-going issue, the unique needs of children need to be included.

According to report titled, "Pediatric Healthcare Products and Services Market - Global Industry Analysis, Size, Share, Growth, Trends, and Forecast, 2018 – 2026" . the global pediatric health care products and services market was valued at US$ 88,000 Mn and US$ 520,000 Mn, respectively, in 2017 and is projected to expand at a CAGR of 4.5% and 5.5% from 2018 to 2026. Rise in disorders and diseases among children are expected to drive demand for drugs used in the treatment of these conditions from 2018 to 2026.The report offers detailed segmentation of the global paediatric health care products and services market based on drug class, diseases/disorders, and services type. In terms of drug class, the antibiotics segment is projected to capture major share of the market from 2018 to 2026. The antidepressants segment is likely to account for 4.0% market share by 2026 due to rise in the number of children and adolescents affected with depression and anxiety across the world.

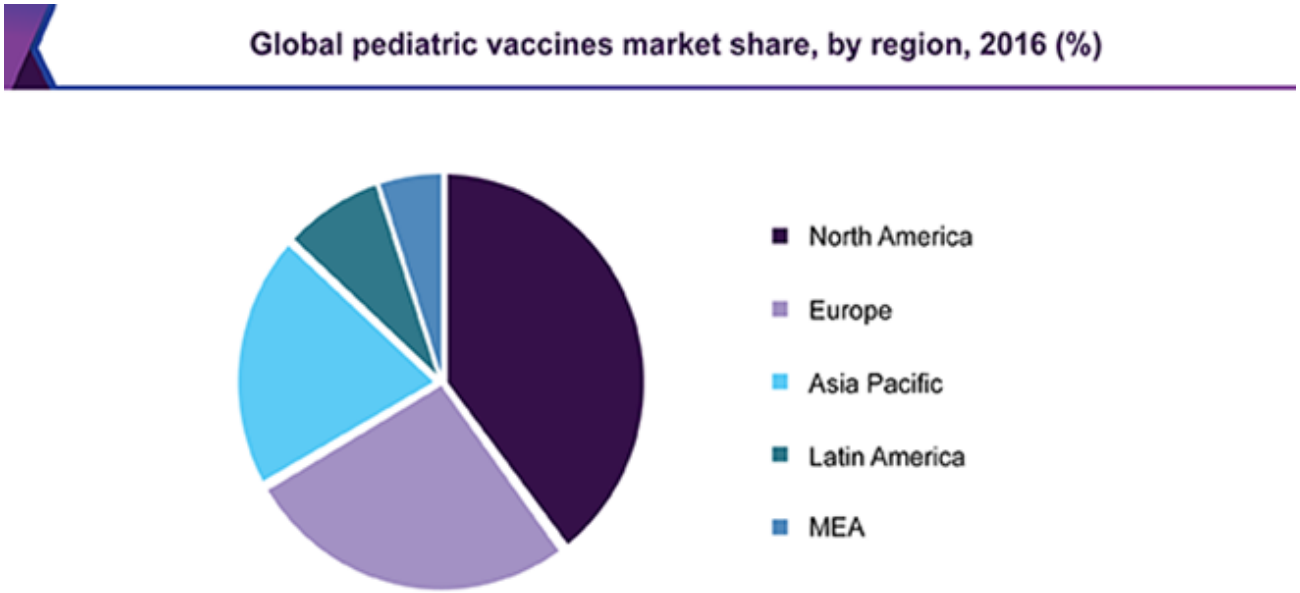

According to the report, the global pediatric health care products and services market was valued at around US$ 88,000 Mn and US$ 520,000 Mn, respectively, in 2017 and is projected to expand at a CAGR of around 4.5% and 5.5%, respectively, from 2018 to 2026. Unhealthy lifestyle habits and rise in obese paediatric population propel the paediatric health care products and services market. The world is going through a rapid nutritional and epidemiological shift, rise in prevalence of obesity, cardiovascular disease, nutrition-related chronic diseases, and cancer. Changes in lifestyle, for instance, in eating habits, have led to an increase in obesity. Obesity is a growing problem in developed as well as in developing countries. Obese or overweight children are likely to remain obese in their adulthood and are susceptible to non-communicable diseases, such as cardiovascular diseases and diabetes, at a younger age. According to a study conducted by the World Health Organization (WHO), in 2016 the number of overweight children, under the age of five, was estimated at more than 41 million globally. Almost half of all overweight children under five years of age lived in Asia and one quarter lived in Africa.

Vision & Plan

Pediatric Vaccines Market Analysis

The global paediatric vaccines market size was estimated at USD 22.4 billion in 2016. Increase in government and non-government funding for development of novel vaccines, along with initiatives for raising awareness about immunization, is likely to have a positive impact on market growth. High prevalence of chronic diseases is one of the major factors boosting the market for paediatric vaccines. According to WHO, around 5 billion severe illnesses and 0.5 billion annual deaths are reported globally. Infants are at a higher risk of contracting severe diseases, and therefore, vaccination plays an important role in their prevention. According to WHO, in 2015, around 134,200 people died due to measles, which accounted for nearly 15 deaths every hour. It also estimated that around 19.5 million children worldwide did not receive DTP vaccines in 2016.

Visitors by Country

Sponsorship and Exposure

Diamond

- Three workshop slots (audio visual included).
- Two complimentary exhibit booths with priority to purchase exhibition space and choose booth location (Booth size-3X3 sqm)
- Four complimentary registrations
- Logo recognition on congress website front page with link, sponsorship page
- One A4 color advertisement in the congress souvenir
- Three inserts provided by the sponsor in the congress delegate bags

Platinum

- Two corporate sponsored workshop slots
- One complimentary exhibit booth with priority to purchase exhibition space and choose booth location (Booth size-3X3 sqm)
- Three complimentary congress registrations
- Logo recognition on congress website front page with link and logo recognition on congress sponsorship page
- One A4 color advertisement in the congress souvenir
- Two inserts provided by the sponsor in the congress delegate bags.

Gold

- Two complimentary congress registrations
- One corporate sponsored workshop slot
- One complimentary exhibit booth with priority to purchase exhibition space and choose booth location (Booth size-3X3 sqm)
- Logo recognition on congress website sponsorship page
- One A4 color advertisement in the congress program or book of abstracts (excluding cover pages)
- One insert provided by the sponsor in the congress delegate bags
- Priority to purchase additional sponsorship items

Exhibition

- One complimentary congress registration
- Set up of one tailor-made exhibit booth (Booth Size 3x3 sqm)
- Logo recognition on congress website sponsorship page
- Color Advertisement in Congress souvenir
- Inclusion of your company's leaflet/insert in the congress delegate bags
- An exclusive online promotion on all our social Networking Sites
- Shape and raise your corporate image through logo branding
- Press Release on behalf of your company
