ABOUT VENUE

LONDON, UK

London, the capital of England and the United Kingdom, is a 21st-century city with history stretching back to Roman times. At its centre stand the imposing Houses of Parliament, the iconic ‘Big Ben’ clock tower and Westminster Abbey, site of British monarch coronations. Across the Thames River, the London Eye observation wheel provides panoramic views of the South Bank cultural complex, and the entire city.

London is situated in southeastern England, lying astride the River Thames some 50 miles (80 km) upstream from its estuary on the North Sea. In satellite photographs the metropolis can be seen to sit compactly in a Green Belt of open land, with its principal ring highway (the M25 motorway) threaded around it at a radius of about 20 miles (30 km) from the city centre. The growth of the built-up area was halted by strict town planning controls in the mid-1950s. Its physical limits more or less correspond to the administrative and statistical boundaries separating the metropolitan county of Greater London from the “home counties” of Kent, Surrey, and Berkshire (in clockwise order) to the south of the river and Buckinghamshire, Hertfordshire, and Essex to the north. The historic counties of Kent, Hertfordshire, and Essex extend in area beyond the current administrative counties with the same names to include substantial parts of the metropolitan county of Greater London, which was formed in 1965.

London grew from three distinct centres: the walled settlement founded by the Romans on the banks of the Thames in the 1st century CE, today known as the City of London, “the Square Mile,” or simply “the City”; facing it across the bridge on the lower gravels of the south bank, the suburb of Southwark; and a mile upstream, on a great southward bend of the river, the City of Westminster. The three settlements had distinct and complementary roles. London, “the City,” developed as a centre of trade, commerce, and banking.
