ABOUT VENUE

PARIS, FRANCE

Paris is one of the most beautiful cities in the world. It is known worldwide for the Louvre Museum, Notre-Dame cathedral, and the Eiffel tower. It has a reputation of being a romantic and cultural city. The city is also known for its high-quality gastronomy and the terraces of its cafés.

Since the 17th century, Paris has been one of the world's major centres of finance, diplomacy, commerce, fashion, gastronomy, and science. For its leading role in the arts and sciences, as well as its very early system of street lighting, in the 19th century it became known as "the City of Light".

French is one of the most romantic languages in the world Considered across the world as one of the most attractive languages, the language spoken by Parisians is one of the many reasons why Paris is known as the city of love.

It is known as the most romantic city in the world, and is home to some world famous sights that are constantly shown in travel magazines, movies, and other works of art. Paris, the capital of France, has a population of over two million people and is one of Europe's most-visited cities.

Part of this project includes Smart 2050 by architect Vincent Callebaut. Under this architectural project, high-rise buildings will integrate several smart energy-production techniques to lower their energy demand and encourage inhabitants to be eco-friendly in their daily lives.
