Welcome Message

Dear All,

The **2nd International Conference on Advances in Skin, Wound Care and Tissue Science** will be organized on **November 09-10, 2017** in **Frankfurt, Germany**. Topics of this conference will include all aspects of wound care, wound healing and tissue repair. As one of the major scientific organizations interested in wound care and wound healing, the **Euro-Mediterranean Council for Burns and Fire Disasters (MBC)** and its official publication, the **Annals of Burns and Fire Disasters** have been invited to collaborate actively with the organizers for the success of this conference.

As **MBC President**, I have been invited together with several pioneers of wound healing to be part of the organizing committee. As you may be well aware, in addition to its major interest in burns management and prevention, MBC has already organized and collaborated in the organization of several local, regional and international conferences on wound care and wound healing among which are the 2nd WUWHS Meeting in 2004 in Paris, the 9th French National Conference on Wound Healing in 2005 in Paris, the 3rd Hellenic Wound Healing Conference in 2007 in Athens, the 3rd WUWHS Meeting in 2008 in Toronto, the 1st International Global Wound Care Conference in 2011 in Cape Town, the 4th International Burns & Wound Healing Symposium and Surgical Masterclass in 2013 in Hong Kong, and the Middle East Wounds and Scar Meeting in 2014 in Dubai. It is thus only natural that MBC contributes and collaborates in the organization of this conference in Frankfurt.

I invite all **MBC members and readers of Annals of Burns and Fire Disasters** to attend and actively participate in the 2nd International Conference on Advances in Skin, Wound Care and Tissue Science next November in Frankfurt.

Bishara Atiyeh, MD, FACS
President, MBC | APSLD

Organizing Committee Members

Bishara Atiyeh
President
Euro-Mediterranean Council for Burns and Fire Disasters, USA

Jasmina Begic
President
Association for Wound Management
Bosnia and Herzegovina

Valentina Dini
President
International School of Tissue Repair
Italy

Denis Barritault
President
OTR3
France

Marco Romanelli
President
World Union of Wound Healing Societies
Italy

Ferdinando Mannello
Director
University of Urbino
Italy

Barbul joins
Vice Chairman
Medstar Washington Hospital Center
USA

Keynote Speakers

Title: A Prospective, Randomized, Double-Blind Multicenter Study Comparing Continuous Diffusion of Oxygen Therapy to Sham Therapy in the Treatment of Diabetic Foot Ulcers

Joel Michalek, Professor, University of Texas, USA

Title: A prospective, open-label, uncontrolled study evaluated the clinical performance of RD1 in chronic diabetic foot ulcers at three wound care clinics in the USA

Igal kushnir, MD, Founder, RedDress Ltd, Israel

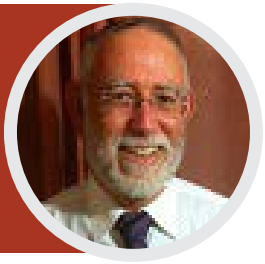

Title: French national PU ten year prevalence survey (conducted by PERSE)

Brigitte Barrios, PMR MD, PERSE (French PUAP), FRANCE

Title: Common pathophysiological mechanisms underlying dementia and pressure ulcers

Efraim Jaul, Head Geriatric Skilled Nursing Department, Hebrew University Medical School, Israel

Preliminary Tentative Programme

2nd International Conference on

Advances in Skin, Wound Care and Tissue Science

November 9-10, 2017 | Frankfurt, Germany

Sessions	Schedule	Lecture	Speaker	Short Title
Thursday November 9, 2017 | Day 1				
	08:00-08:45	**Registration Desk opens**		
Session 1	08:45-09:00	**Opening Ceremony & Inaugural Address**		
	09:00-09:25	KN	Igal kushnir	A prospective, open-label, uncontrolled study evaluated the clinical performance of RD1 in chronic diabetic foot ulcers at three wound care clinics in the USA
	09:25-09:40	PL	Maria Shaw	Foot ulcers: A different technique to total contact casting for healing chronic foot ulcers
	09:40-10:55	PL	Claudia Benjamin	ADP treatment improves wound healing in diabetic mice
	10:55-11:05	PL	Judith A. Barnard	The Design and Implementation of a Local Strategy to Increase the Accuracy of Pressure Ulcer Classification: The Pressure Ulcer Guidance (PUG) Too
	11:05-11:30	**Networking & Refreshments Break**		
Session 2	11:30-11:55	KN	Jasmine Begic	Appliance of polarized light (480-3400nm) in the treatment of Chronic wound different etiology: New possibilities
	11:55-12:10	PL	Edoardo Raposio	New approach for the treatment of chronic cutaneous wounds: Comparison between two methods
	12:10-12:25	PL	Marjorie E. Viscardi	Use of Regen BCT Plus Kit for Diabetic Foot Ulcers
	12:25-12:40	PL	Steven S. Gale	DOMINATE WOUNDS
	12:40-12:55	PL	Andrea Pokorna	Are pressure ulcers (PU´s) monitored by physicians and do PU´s influence the hospitalization?
	12:55-13:25	**Networking Lunch**		

Session 3	13:25-13:45	KN	Joel Michalek	A Prospective, Randomized, Double-Blind Multicenter Study Comparing Continuous Diffusion of Oxygen Therapy to Sham Therapy in the Treatment of Diabetic Foot Ulcers
	13:45-14:00	PL	Zhi Ren Liu	Extracellular PKM2 Facilitates Wound Healing by Promoting Myofibroblast Differentiation
	14:00-14:15	PL	Akobi Oliver Adeyemi	Bacteriological Profile of Wound sepsis and Antimicrobial Pattern of Isolates at Federal Medical Centre, Bida, Niger State
	14:15-14:30	PL	Preeti Fernando	24 Habits of Highly Effective People
	14:30-14:45	PL	Cheng Jen Wang	Extracorporeal Shockwave Therapy for Treatment of Keloid Scars
	14:45-15:00	PL	Danijela Semenic	Funcional offloading treatment of complicated diabetic chronical wounds on the foot
	15:00-15:15	PL	Mohammad Sadegh	Microbiologic and histopathological findings of osteomyelitis in diabetic patients
	15:15-15:30	PL	GVN Rathna	Bioactive nano fiber mats for efficient wound healing
	15:30-15:45	PL	Ferdinando Mannello	Biochemistry of wound healing: From bench to bedside
Session 4	15:45-16:00	**Networking and Refreshments Break**		
	16:00-16:25	KN	Efraim Jaul	Common pathophysiological mechanisms underlying dementia and pressure ulcers
	16:25-16:40	PL	Friederike Rosner	Treatment of Chronic wounds is not only the application of Wound Dressing
	16:40-16:55	PL	Mohammed Nazrul	Effects of Low Level Laser (Diode- 830nm) Therapy On 'Human Bone Regeneration'
	16:55-17:10	PL	Bishara Atiyeh	Tissue Engineering & Wound Healing
	17:10-17:25	PL	Zuhal Bahar	Determination of The Quality of Life of İndividuals with Stoma

2nd International Conference on

Advances in Skin, Wound Care and Tissue Science

November 9-10, 2017 | Frankfurt, Germany

	17:25-17:40	PL	Valentina Dini	Atypical Wounds: Diagnosis and Management
	17:40-18:00	PL	Saed Jaber	Intravenous Phenytoin: Potential New Therapy for Gastrointestinal Fistlae
Friday November 10, 2017 | Day 2				
	08:30-08:45	**Registration Desk opens**		
Session 1	08:45-09:00	**Opening Ceremony & Inaugural Address**		
	09:00-09:25	KN	Brigitte Barrios	French national PU ten year prevalence survey (conducted by PERSE)
	09:25-09:40	PL	Marcy Cain Purnell	Bio-Electric Field Enhancement: The Influence on Membrane Potential and Cell Migration in Vitro
	09:40-10:55	PL	Robert G. Frykberg	The Use of a Fetal Bovine Dermal Scaffold in the Management of Full Thickness Lower Extremity Wounds
	10:55-11:05	PL	Edoardo Raposio	The effect of shoe modification on wound care in diabetic patients: a literature review
	11:05-11:30	**Networking & Refreshment Break**		
Session 2	11:30-11:55	KN	Sandeep Shrivastava	Translating Wound Management
	11:55-12:10	PL	Michelle Secic	How To Report Statistics in Medicine
	12:10-12:25	PL	Bishara Atiyeh	Tissue Engineering & Wound Healing
	12:25-12:40	PL	Indah Julianto	Mesenchymal Stem Cells derived Secretomes in Wound Healing and Skin Rejuvenation State of art
	12:40-12:55	PL	Willa Damayanti	Platelet-Rich Plasma Partnership With Mesenchymal Stem Cell For Tissue Regeneration in Acne Scar:A casr series
	12:55-13:25	**Networking Lunch Time**		

Session 3	13:25-13:50	KN	Denis Barritault	The Heparan sulfates mimics (RGTA) and their uses in skin healing
	13:50-14:05	PL	Susanti R Dewi	Tissue Engineering and Regenerative Medicine (TERM)in Skin Regeneration, Wound Healing and Their Clinical Applications
	14:05-15:20	PL	Wisuda Putra Negara	Adult and Fetal Mesenchymal Stem Cells (MSCs)-derived Secretome For Tissue Regeneration: Case Series
	15:20-16:35	PL	Patricia Oktaviani	Effect of Pirdot (Saurauia Vulcani Korth.) leaf extraction on wound contraction, reepithelization time, and histological appearance, in albino Sprague Dawley rat exicised wound healing process
	16.35-16.50	PL	Denis Martin Anthony	A comparison of the performance of the Braden Q and the Glamorgan paediatric pressure ulcer risk assessment scales in general and intensive care pediatric and neonatal units
	16:50-17:00	**Networking & Refreshment Break**		
Session 4	17:00-17:10	PP	Amin meftahi	The Effect of Coated Microbial Cellulose with Iranian Honey for applying as a wound dressing
	17:10-17:20	PP	Feven Teshome	Magnitude And Factors Affecting The Development Of Pressure Ulcer Among Bedridden Patients At Public Hospitals Of Harari Regional State, Eastern Ethiopia
	17:20-17:30	PP	Mina Zavareh	Is 1% Povidone-Iodine Solution Superior to Normal Saline for Simple Traumatic Wound Irrigation?
	17:30-17:40	PP	Srinivasa Rao	Wound Infections- Critical Colonisation
	17:40-17:50	PP	Nikki Castel	Combination of Strap Muscle Flaps and Z-Plasty for Management of Tracheostomy Scars
	17:50-18:00	PP	Selvaraj Vimalraj	Nitric Oxide Regulates Intussusceptive-like Angiogenesis in Wound Repair

	18:00-18:10	PP	Monireh Ahmadi Bani	The effect of shoe modification on wound care in diabetic patients: a literature review
	18:10-18:20	PP	Camille C Paez	Determination of the Wound Healing Enhancement Property of Acid- Soluble Collagen from the Scales of Chanos Chanos (Chanidae) Forsskal
	18:20-18:30	PP	Ai-Xi Yu	Thermo-sensitive chitosan/β-glycerophosphate hydrogel loaded with β-Cyclodextrin-curcumin for the treatment of cutaneous infected wound in rats
	18:30	**Closing Ceremony**		

KN= Key Note	PL= Plenary Lecture	WS=Work Shop	SM= Symposium
SP= Sponsor Promotion	SO= Student Oral	PP= Poster Presentation

Conference Highlights

- *Skin & Skin Biology*
- *Skin Infections and Disorders*
- *Advances in Skin & Wound Care*
- *Skin and Nutrition*
- *Skin and Skin Cancer*
- *Skin and Cosmetic Dermatology*
- *Anti-Aging Skin Care*
- *Skin Diseases Education*
- *skin and wound care*
- *Skin and Ayurveda*
- *Wound Care and Nursing*
- *Skin and Laser Technologies*
- *Skin and Wound Healing*
- *Wound Care and patient management*
- *Wounds and Pain Management*
- *Burns and Advanced Wound Care*
- *Wound, Ostomy and Continence Nursing*
- *Stemcells and Tissue Regeneration*
- *Tissue Science and Regenerative Medicine*
- *Wound Healing and Tissue Repair*

About Frankfurt

Frankfurt is a metropolis and the fifth-largest city in Germany. The city is at the centre of the larger Frankfurt Rhine-Main Metropolitan Region. Frankfurt is home to influential educational institutions, including the Goethe University, the UAS, the FUMPA, and graduate schools like the Frankfurt School of Finance & Management. Its renowned cultural venues include the concert hall Alte Oper, Europe's largest English Theatre and many museums. Today, Frankfurt am Main is an important international financial centre and an important industrial, service and exhibition centre. The airport is one of the largest in the world, the main railway station is a central railway junction and the Frankfurter Kreuz is the most frequented road junction in Germany. It has more than 30 museums. Frankfurt is on the Main river. The city's name means ford of the Franks - a ford is a place in a river where it is so shallow that you can walk through it, and the Franks were a Germanic people which existed in the first millennium. Frankfurt is a very international city. Every third inhabitant is not German. Most immigrants come from south-eastern Europe, Turkey and North Africa, but there are people from almost every country living in Frankfurt. There are also many international business companies here, and the big airport links Frankfurt with many countries in the world. Many banks are based in Frankfurt, and the city has some of the tallest buildings in Europe.
