An unusual case of arachnoid cyst

Reem Zakzouk

Prince Sultan Medical Complex, KSA

Abstract

Arachnoid cysts are benign, congenital, intraarachnoidal space-occupying lesions that are filled with CSF (Cerebrospinal fluid) . We report an unusual case of a multi-compartmental arachnoid cyst of 26 year old male who complained of gradually increasing headache . computed tomography and magnetic resonance imaging revealed a large arachnoid cyst involving the left middle and anterior cranial fossae with sub-falcine extension into the right anterior cranial fossa.
