# Renewable energy

Abbas Shaheed , An najaf , Iraq

I am Safi, a news and reports editor working for an international news agency. I wish to participate and attend the World Climate Conference. My desire is because of the importance of this event, which aims to change the reality of climate and nature and save the earth from potential disasters due to the use of the resulting energies of toxic gases and other harmful traditional methods that cause global warming.

Website of the Free Iraq News Agency:
