PhD (USA), DSc, FRCP, MD (MA), PGD, FTJ/BUMS, DHMS, RMP (NCT/H) GoP

Member: National Council for Tibb (MoNHSR&C) Government of Pakistan

Founder Chairman: International Alternative Medical Council (IAMC) Pakistan

CEO: Sadri Awareness, Development & Research Institute (SADRI) Pakistan

The Need for Herbal Spagyrics Manufacturing as a Future Medicine

According to my 27 years of Research & Experience Nutria & Herbal Medicine Manufactures must manufacture Herbal Spagyric Medicine as a Future Medicine of the Coming Century.

That Herbal Spagyric Medicine is more effective & harmless than western chemicals. Herbal Spagygics essences are too easy to use as subcutaneous, Intramuscular & Intra vines.

Nutra & Herbal Pharmaceuticals industries should be Introduced Herbal Injections as per Herbal Spagyric Philosophy.

Spagyric Medicine is an Italian biological medical modality that incorporates Complex homeopathy, herbology, and pharmacology based on the observations and research of one of the most famed physicians of all time, Paracelsus.

The word spagyric stems from the Greek words spien and agera, which means to separate and unite. As a result of continuous rhythmic separation, and again conjoining, an enhancement in quality results. The term spagyric, therefore, expresses the universal method of positive enhancement.

Some of the main concepts associated with spagyric medicine are of systemic healing, self-healing, and treating the whole organism by means of complete treatment.

Modern medicine has become a science of great complexity. Recent statistics confirm that we face a growing problem and that current approaches to these complex medical issues have been unsuccessful, aiming for the management of symptoms rather than comprehensive healing and restoration. Spagyric medicine takes a different approach – by correcting the underlying cause of dysfunction and retraining the body to heal itself, enduring health results prevail and symptoms naturally subside.

Spagyric medicines combined only herbs with the same temperaments herbs.

all enhanced and evolved to their highest potential through an intricate production process. Dynamized and Electro complex herbology attenuated ingredients are combined with purified, concentrated, and bioavailable medicinal plants and herbs to form a dynamic medicine where all ingredients work synergistically to become much more than the sum of their parts. The end result is a biological medicine unlike any other.

Currently, the application and effectiveness of spagyric medicines are still primarily based on experience and observation. This is because despite the fact that they have been used for decades and even centuries, up until now detailed, controlled clinical studies have been lacking. However, modern scientific research has validated the impressive and successful therapy results realized using spagyric remedies for today's complex medical issues.

It has been noted through the clinical application that spagyric medicine has a therapeutic effect on the biochemical level, psycho-neuro-endocrine-immunological level, and informational level.

Spagyric medicines are able to provide therapeutic action on the PNEI level – a pathway that carries signals which trigger specific bio-physical actions. Signaling at this level are responsible for the activation of T-cells, B-cells, natural killer (NK) cells, and macrophages – all of which play a critical role in immune function and each individual's reaction to the presence of certain pathogenic, environmental, or psycho-emotional triggers.

On the informational level, spagyric medicine utilizes a unique production process that allows for a purified and concentrated biological formulation. This allows for the bioenergetic transfer of information that is transmitted to cells through integral-membrane-receptor-effector-proteins. Proteins comprising DNA and RNA instruct feel to replicate and re-organize in accordance with this new information, resulting in new signals and biochemical activity that leads to pathophysiological changes and reactions.

Spagyric medicine is safe, gentle, non-toxic, and produces no known side effects.
