Bulid Castles in the air to land at Tokyo, Japan, to explore Applied Science & Innovative Engineering 2019

Tokyo, officially Tokyo Metropolis one of the 47 prefectures of Japan, has served as the Japanese capital since 1869. Tokyo has 39 million residents, 50% more people than any other urban area, Tokyo would have the 8th-largest economy in the world. Tokyo is often referred to as a city but is officially known and governed as a "metropolitan prefecture", which differs from and combines elements of a city and a prefecture, a characteristic unique to Tokyo. Tokyo ranks first in the Global Economic Power Index and third in the Global Cities Index. Tokyo has numerous outlying islands, which extend as far as 1,850 km from central Tokyo. Because of the islands' distance from the administrative headquarters of the Tokyo Metropolitan Government in Shinjuku, local sub prefectural branch offices administer them. Tokyo mixes the ultramodern and the traditional, from neon-lit skyscrapers to historic temples. The opulent Meiji Shinto Shrine is known for its towering gate and surrounding woods. The Imperial Palace sits amid large public gardens. The city's many museums offer exhibits ranging from classical art to a reconstructed kabuki theater.
