PLAN A TRIP TO Zurich: DESTINATION OF Chemistry Education 2018

Zurich is the largest city in Switzerland and the capital of the canton of Zurich. It is located in north-central Switzerland at the northwestern tip of Lake Zurich. The municipality has approximately 400,028 inhabitants, the urban agglomeration 1.315 million and the Zurich metropolitan area 1.83 million. Zurich is a hub for railways, roads, and air traffic. Both Zurich Airport and railway station are the largest and busiest in the country.

Permanently settled for about 2000 years, Zurich was founded by the Romans, who, in 15 BC, called it Turicum. However, early settlements have been found dating back more than 6400 years ago. During the Middle Ages, Zurich gained the independent and privileged status of imperial immediacy and, in 1519, became a primary centre of the Protestant Reformation in Europe under the leadership of Huldrych Zwingli.

The official language of Zurich is German but the main spoken language is the local variant of the Alemannic Swiss German dialect. Many museums and art galleries can be found in the city, including the Swiss National Museum and the Kunsthaus Schauspielhaus Zurich is one of the most important theatres in the German-speaking world.

Most of Zurich's sites are located within the area on either side of the Limmat, between the Main railway station and Lake Zurich. The churches and houses of the old town are clustered here, as are the most expensive shops along the famous Bahnhofstrasse. The Lindenhofin the old town is the historical site of the Roman castle, and the later Carolingian Imperial Palace.

Zurich is a leading global city and among the world's largest financial centres despite having a relatively small population. The city is home to a large number of financial institutions and banking giants. Most of Switzerland's research and development centres are concentrated in Zurich and the low tax rates attract overseas companies to set up their headquarters there.
