Dental & Dental Hygiene

2018

Why take this course?

- Increases revenue by introducing orthodontic practice in his/her clinic.
- TREAT most of the malocclusion by nonextraction and non-surgical method
- Start designing orthodontic appliances to work with and not against nature
- Students treat actual patients in their practice.
- ONGOING support will be provided in diagnosis and treatment planning (Teledentistry)
- Our program is the closest thing out there is to an orthodontic residency without having to leave/ close practice and go to ortho school full time.
- Continuous training from diagnosis to retention will be provided to Kirst 2 cases.
- Develop comfort level from actually treating your patients with our support
- Hands on course Bond brackets on typodont and even learn to position brackets in actual patient setup

Topics (Basics only)

- Biology of tooth movement
- Biomaterials commonly used in orthodontics
- Biomechanics
- Documentations did before starting treatment
- The Iatrogenic Effects of Orthodontic Treatment
- Different types of brackets
- Bene>its of Self-ligating brackets
- Things to be done before bonding
- Bonding, rebonding and debonding
- Social 6 smile in 4-6 months
- Emergencies in orthodontics
- Retention and relapse

Social 6 smile

• Its quick and effective method to straighten teeth in less than 6 months

• Social 6 smile is much cheaper than other options of braces

• Can avoid more expensive cosmetic procedure like veneers or lumineers to straighten the teeth.

• Can avoid unnecessary RCT or grinding of teeth for veneers.

• Great smile will increase person's selfesteem and con>idence level.

• As braces is only on front 6 teeth, so we need less force compared to traditional braces meaning more comfortable for patients.

• Keeping clean is much easier compared to traditional braces.
