Build castles in the air to land at City of Dreams Stockholm, to explore Ear, Nose and Throat Disorders 2019

Stockholm is the capital of Sweden and the most crowded city in the Nordic nations; 952,058 individuals live in the district, around 1.5 million in the urban territory, and 2.3 million in the metropolitan region. The city extends crosswise over fourteen islands where Lake Mälaren streams into the Baltic Sea. Simply outside the city and along the drift is the island chain of the Stockholm archipelago. The territory has been settled since the Stone Age, in the sixth thousand years BC, and was established as a city in 1252 by Swedish statesman Birger Jarl. It is likewise the capital of Stockholm County. Stockholm is the main capital on the planet with a national urban stop.

Stockholm is the social, media, the political and financial focal point of Sweden. The Stockholm area alone records for over 33% of the nation's GDP and is among the best 10 locales in Europe by GDP per capita. It is a critical worldwide city and the fundamental community for corporate home office in the Nordic locale. The city is home to a portion of Europe's best positioning colleges, for example, the Stockholm School of Economics, Karolinska Institute and Royal Institute of Technology (KTH). It has the yearly Nobel Prize functions and feast at the Stockholm Concert Hall and Stockholm City Hall. One of the city's most prized historical centers, the Vasa Museum, is the most visited non-craftsmanship gallery in Scandinavia. The Stockholm metro, opened in 1950, is notable for the stylistic layout of its stations; it has been known as the longest craftsmanship exhibition on the planet. Sweden's national football field is found north of the downtown area, in Solna. Ericsson Globe, the national indoor field, is in the southern piece of the city. The city was the host of the 1912 Summer Olympics and facilitated the equestrian bit of the 1956 Summer Olympics generally held in Melbourne, Victoria, Australia
