About Destination Rome

Rome is the capital city of Italy and it is one of the most ancient cities in Europe. Rome is located in the central portion of the Italian peninsula, on the Tiber River about 15 miles (24 km) inland from the Tyrrhenian Sea. The city of Rome itself has tremendous environmental advantages, which made it easier for Rome to become an important city. Rome is located at the first place that people can easily cross the Tiber River, so it is the natural location of the main north-south road in Italy. The reason you can cross the Tiber at Rome is that there is an island in the river there.

Since World War II, Italy has evolved from an economy based on agriculture into an economy of industrial ranking, with approximately the same total and per capita output as France and the United Kingdom. Yet, the country remains partially divided by the private companies developing in the industrial north and the public enterprise that governs the agricultural south.
