AGENDA

Biography

EuroSciCon

Title: Predictive models for radio-induced effects after SRS for uveal melanoma

Antonella del Vecchio
San Raffaele Scientific Institute,
Milan Italy

Biography:

Antonella del Vecchio. Medical Physicist has a long expertise in Imaging, Radioprotection and Gamma Knife Stereotactic Radiosurgery. From 2015 she is the PI of a research program in collaboration with the Oncological Ophthalmology Dept. of her Institute, to understand how to optimize the treatment of the uveal melanoma. Her new approach to the problem allows the team to understand not only the best irradiation technique in using gamma rays, but also how to try to reduce the late effects and how to predict them by using a simple score.

Title: Dry Eye - Some review and Details for Success

Daniela Roehe
Federal University of Rio Grande do Sul - UFRGS,
Brazil

Biography:

Dr Roehe completed her specialization in anterior segment and cornea in 2008 in Fundação Altino Ventura- Recife -Pernambuco. She did too in 2004 the Glaucoma fellowship in Hospital de Clínicas de Porto Alegre – Porto Alegre- Rio Grande do Sul Brazil. She worked with residents during the last years with glaucoma and cataract monitoring and actually attend nearby 1500 patients per month, big amount of them claiming of dry eye just because use of continuous antiglaucomatous drops. Having tried different kinds of approaches for each case and having some success with difficult ones, we felt the necessity of spread the knowledge about dry eye and support the importance and impact that a good result of that treatment will give in a patient life, culminating to the doctors life and joy and patients confidence and fidelity to the doctor's office.

Title: Robot-assisted Retinal Surgery

Iulian Iordachita
Johns Hopkins University,
USA

Biography:

Dr. Iordachita (IEEE M'08, S'14) is a research faculty at the Mechanical Engineering Department, Whiting School of Engineering, Johns Hopkins University, faculty member of the Laboratory for Computational Sensing and Robotics (LCSR), and the director of the Advanced Medical Instrumentation and Robotics Research Laboratory (AMIRo). He received the B.Eng. degree in mechanical engineering, the M.Eng. degree in industrial robotics, and the Ph.D. degree in mechanical engineering in 1984, 1989, and 1996, respectively, all from the University of Craiova, Romania. His current research interests include medical robotics (with a specific focus on robot-assisted retinal surgery), image guided surgery, robotics, smart surgical tools, and medical instrumentation.

Title: New laser workstation to change permanently eye color for congenital and secondary heterochromia patients

Pedro Grimaldos
Eyecos Corp, Spain

Biography:

Pedro Grimaldos has focused his large clinical activity on anterior segment eye surgery for nearly 30 years. In early 90s worked hard to improve modern cataract phacoemulsification technique with topical anesthesia. Seven international meetings were held to introduce worldwide significant advances. In 1996 he started laser assisted keratomileusis procedures to correct myopia, hyperopia and astigmatism errors. Since 1999 Dr Grimaldos introduced an innovative technique to treat presbyopia with only laser, named Presbylaser, a gold standard so far. In 2010 several research lines were addressed to correct any pigmentary iris disorder as heterochromia, congenital and secondary as well. Finally, in 2012 Laser Cosmetic Iridoplasty clinical trials were stablished in order to reach a safe, effective and predictable procedure. Now, after a remarkable effort on innovation, Dr Grimaldos introduce IRÎZ workstation, an integral laser system to change permanently eye color.
