Plan A Trip To Madrid: Destination Of Pediatric Cardiology 2019

Madrid is the capital of Spain and the largest municipality in both the Community of Madrid and Spain as a whole. The city has almost 3.2 million inhabitants with a metropolitan area population of approximately 6.5 million. It is the third-largest city in the European Union. Madrid lies on the River Manzanares in the centre of both the country and the Community of Madrid (which comprises the city of Madrid, its conurbation and extended suburbs and villages); this community is bordered by the autonomous communities of Castile and León and Castile-La Mancha. As the capital city of Spain, seat of government, and residence of the Spanish monarch, Madrid is also the political, economic and cultural centre of the country. The Madrid urban agglomeration has the third-largest GDP in the European Union and its influences in politics, education, entertainment, environment, media, fashion, science, culture, and the arts all contribute to its status as one of the world's major global cities. Due to its economic output, high standard of living and market size, Madrid is considered the major financial centre of Southern Europe and the Iberian Peninsula. While Madrid possesses modern infrastructure, it has preserved the look and feel of many of its historic neighborhoods and streets. This city as measured by universal landings and has the world's biggest city air terminal framework measured by traveler movement.
