Plan a Trip to Berlin, Germany

Germany's location at the heart of Europe has shaped its history both for good and bad. It is the fifth largest country in Europe and shares its border with nine neighbor countries. Germany's central and southern regions have forested hills and mountains cut through by the Danube, Main, and Rhine river valleys. In the north, the landscape flattens out to a wide plain that stretches to the North Sea. Between these extremes, Germany is a country of incredible variety. Germany is the land of cultural heritage where it is known for its famous historical spots and world class institutions. It has been called the Land of Poets and Thinkers." Germans are famous in all forms of art, but particularly classical music. Germany's famous composers include Bach, Brahms, Schumann, Wagner, and Beethoven and some of the world's greatest philosophers include Kant, Hegel, Schopenhauer, Nietzsche, and Heidegger are from Germany. This country boasts some of the world's most famous inventions like the light bulb, insulin, the automated calculator, and the automobile. Germany has more cultural activities and places than any other country – it's a cultured place, with 6,200 museums, 820 theaters, 130 professional orchestras and 8,800 libraries. Berlin is the capital of Germany featured with art museums, and other historic places. A feature of Berlin, aside from its exuberance, is the way it continuously reinvents itself. It also called as greener city of Germany by its forests, lakes and sprawling parks.
